Hightech in Aluminium

Witte was founded in 1969 and initially manufactured complex, high-precision parts for the aerospace industry. Today Witte has developed into a leading manufacturer of fixturing systems and gauges for all kinds of applications. Almost all leading companies from automotive and aircraft industries now rely on Witte technology in order to maintain high quality in their production process.

**Certification**

Witte Gerätebau KG is certified according to
 • DIN EN ISO 9001 • DIN EN ISO 9100
 • QSFA (Aerospace suppliers)

Performance portfolio and set up

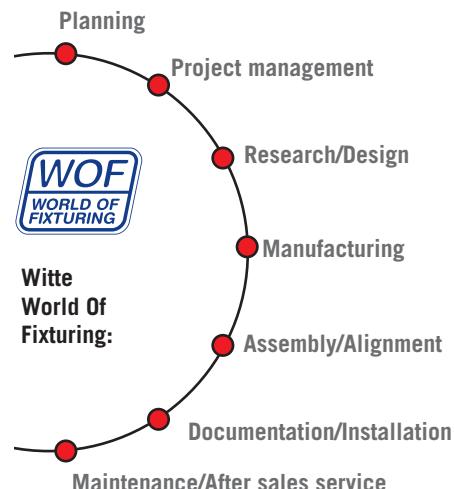

Why should you choose Witte ?

To decide on Witte system solutions and products is a decision for the future and reduces investment for measuring equipment and fixture cost for every following project.

The system components from product lines ALUFIX Classic and ALUFIX ECO can be 100% reused for new tasks, multiple retooling for a lifetime. Reusability presupposes durability!

Witte uses high-grade material quality without compromise. High manufacturing accuracy of the components themselves and in assembly with each other as well as hard-wearing surface protection guarantee "Systematic Quality".

All Witte system elements follow a consistent idea, are downwards compatible and at the same time build a basis for future additional items. Witte modular systems are an optimal match to today's requirements as well as being wisely combinable with each other. No matter what demand and individual application you have, Witte offers you the correct technical and cost-effective solution.

- As everything is done under one roof, time consuming interfaces and inevitable cost arising from overlapping are dispensed with.
- International sales and service network through own subsidiaries and regional solution partners.
- Experienced project teams with sound knowledge in almost all standards of the automotive industry and their related partners.

www - Witte worldwide
 We meet the challenges of our customers wherever they occur.
 Our sales and service network guarantees support worldwide.
 Witte companies and subsidiaries in Singapore, Mexico and USA as well as long term partners in all major industrial nations ensure the same high service level all over the World.

Product spectrum Modular Fixturing Systems

Alufix Classic is the worldwide renowned and proven modular clamping and fixturing system for almost all applications in dimensional measuring technology.

Due to the high accuracy and quantity of intelligent elements Alufix sets are also in use as assembly and positioning systems. Right across all business areas ranging from automotive industry through aerospace to biomedical sciences people trust and use Witte Alufix Classic. If you have different materials, your parts vary in size, mass or stability, or you are measuring with tactile or optical equipment, Alufix Classic is the answer!

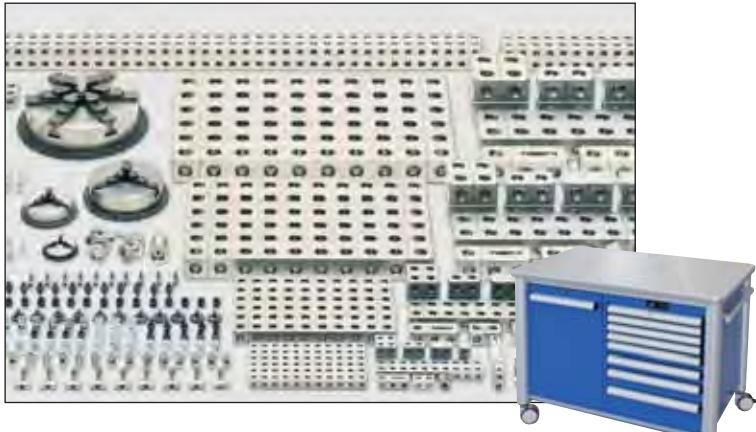

Due to the variety of components and of course the long experience of Witte Alufix Classic offers a solution for almost every task. Alufix Classic is not only an investment for current requirements but especially for the future, as all elements, according to the real idea of a modular system, are reusable and compatible with other Witte systems and elements.

Different demands call for diverse solutions!

All Witte - profiles are unique in their design but nevertheless universal. Depending on requirements with regard to targeted application and duration, material or product specification of a part to be fixed, Witte offers purposeful, economical solutions.

Independent of general specifications of individual parts or groups, holding or measuring fixtures, a crucial point is the degree of desired flexibility during use. ALUFIX CLASSIC offers the highest flexibility.

Fixtures are assembled with standard, catalogue components without any additional complex machining. At any time additions and/or modifications are just as easily possible as complete disassembly of the individual parts in order to build a new fixture for your next part. Witte profiles ALUFIX CLASSIC or ALUFIX ECO due to their system integration possibilities have extensive patented rights. This ensures that all profiles, connecting and positioning elements are compatible and complementary.

ALUFIX - Systematic flexibility...

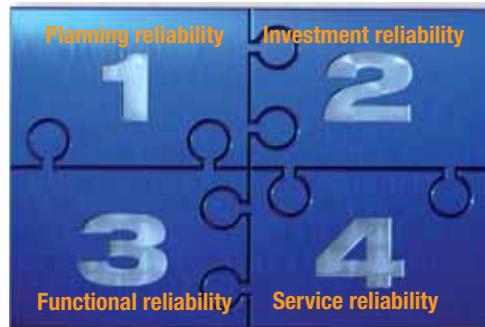

**Reliability from market leader in fixture building
with 30 years of experience and more than 10.000 systems sold worldwide**

Why and when do you need this system?

- You want a fast solution with short reaction times and high flexibility?
- Immediate availability is a must for you because planning time is getting shorter and shorter ?
- You want to remain independent and prefer "do it yourself"?

ALUFIX supports you fourfold to master these demands successfully

**What does
this mean?**

Planning reliability

**ALUFIX shortens your planning time and gives you
a high degree of freedom with**

100% compatibility

- Complete system is upwards or downwards compatible
- All system sizes can be combined
- No weight or size limits
- Can be used with other systems and clamps
- ALUFIX has been on the market for 25 years
- Basic design has always remained the same
- Original components still valid today
- Majority of components on stock
- Own manufacturing facilities with modern workshop

100% continuity

100% Verfügbarkeit

Investment reliability

ALUFIX offers you 4 tangible commercial advantages

100% quality

ALUFIX quality standard

- High quality aluminium raw material
- Comprehensive machining for highest precision
- Patented wear-resistant connection technology

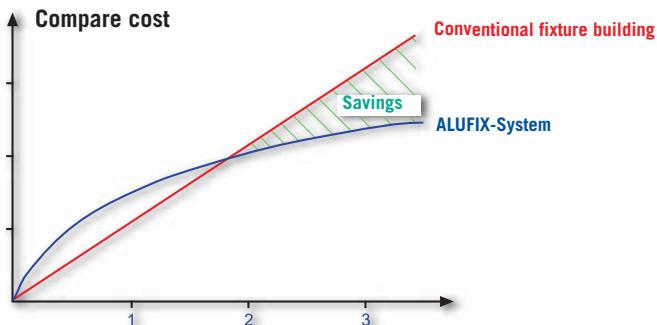

100% cost effective

- Fast return on investment
- Productivity advantage by minimizing your standing times
- Multiple application possibilities with few components

100% cost effective

- ▶ Fast return on investment
- ▶ Productivity advantage by minimizing your standing times
- ▶ Multiple application possibilities with few components
- ▶ Multiple retooling concept enables multiple use of most of the standard components built in to fixtures

Compared to dedicated fixtures Alufix gives you a financial advantage already from second application onwards.

**Functional reliability**

ALUFIX saves you time and money, because all tasks are solved quickly and accurately:

100% intelligence**High versatility due to patented system**

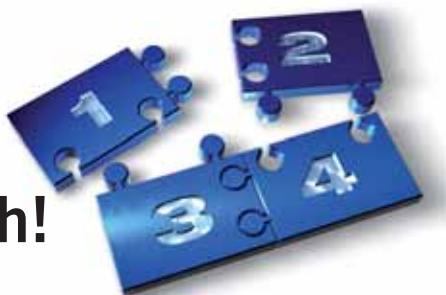

- ▶ The Alufix principle: Outer dimensions are always a multiple of the grid, grids are maintained even over several joined elements, through bores in three directions
- ▶ Low weight and high dimensional accuracy
- ▶ No large storage space required when fixtures are disassembled
- ▶ Few special assembly tools necessary
- ▶ ALUFIX-EXPERT software for short term feasibility studies, for planning or simple partlists and pre design drawings
- ▶ Parts library ALUFIX FIXMES for common CAD applications

100% easy handling**100% speed****100% Service****Service reliability**

Services around ALUFIX leave nothing to be desired:

- ▶ Service stations worldwide
- ▶ Advice, Demos, training and support directly on customer's site or at Witte
- ▶ Worldwide network
- ▶ Teams of assembly engineers for installation and startup on site

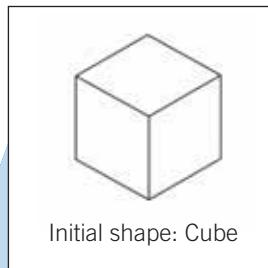

... a pleasure to work with!

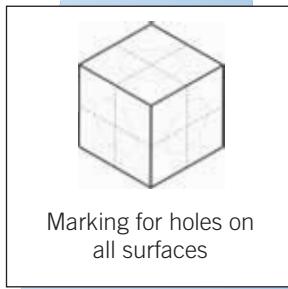

The ALUFIX-

Basic design

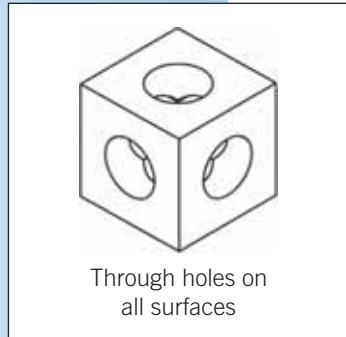

Origin of element geometry

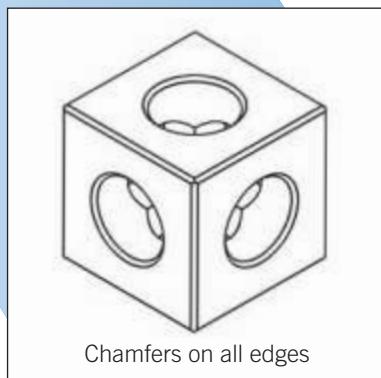

Initial shape: Cube

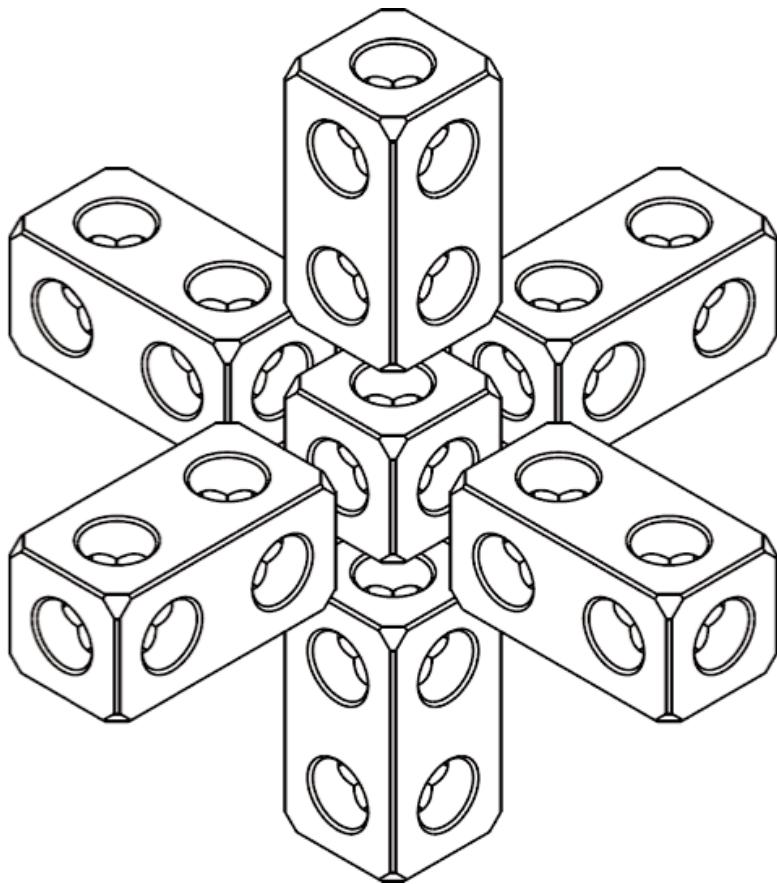

Marking for holes on all surfaces

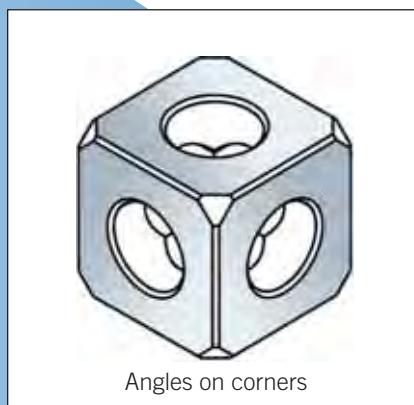

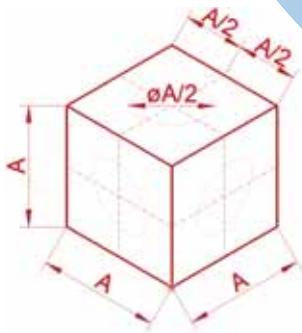

Through holes on all surfaces

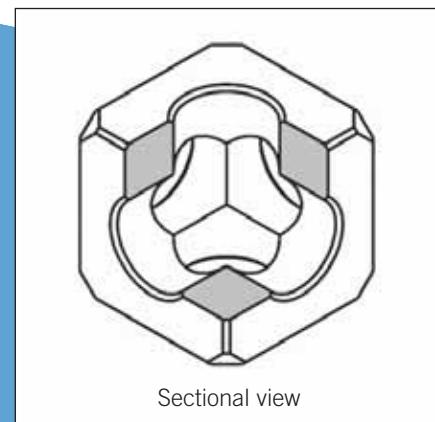

Chamfers on all edges

All further dimensions arise by multiplying the initial cube.
Through holes on all surfaces, thereby connecting possibilities on all six sides.

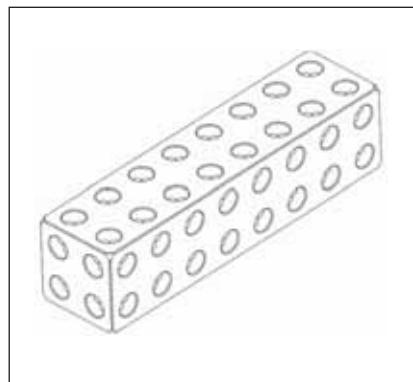

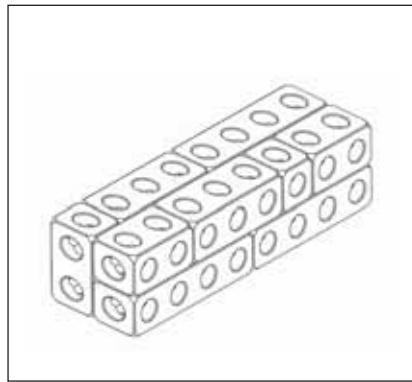

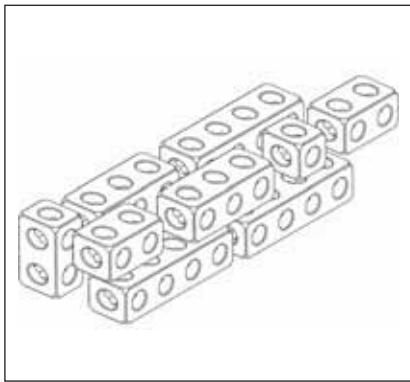

Angles on corners

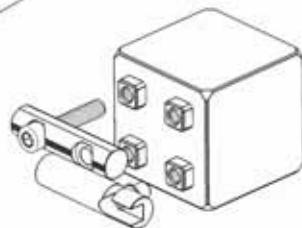

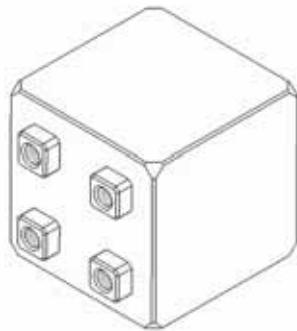

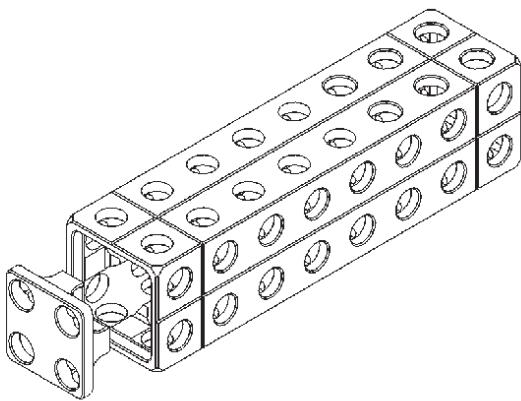

Sectional view

principle

Alufix element geometry guarantees that the grid in all directions across any number of joins will remain unchanged.

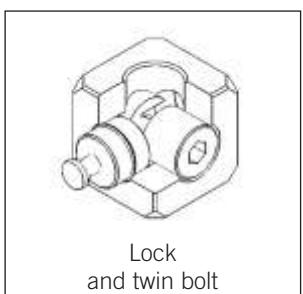

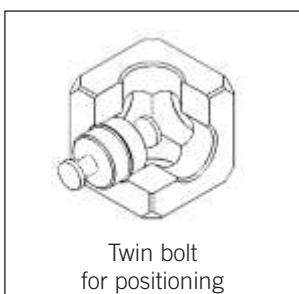

Hollow profiles (Light bars) are a logical extension for larger cross sections and lengths. Couplings mounted at both ends create 6 sided connection option.

Nubs are space saving connection solution for slides, quick couplings and contour blocks.

Connection technology

Each hole is not only for positioning but also for fixation

1 System for multiple applications

Simple part supports

- simple, direct and without design, built according to the Alufix principle.

Here a modular fixturing system with a large range of components comes into its own.

Fixtures

- According to design and requirements of workpiece data, concept for repeatable use
- From checking of purchase parts to series measuring

Sophisticated part supports

- With measuring, checking and adjusting elements, i.e. dial gauges, retractable plug gauges, moving slides

Gap and flush gauges

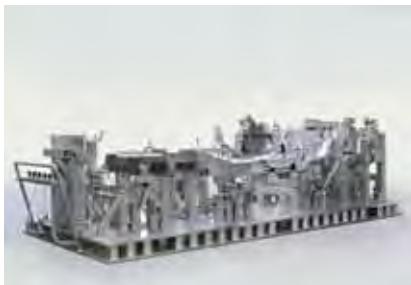

- with folding/removable contour stripe models and or measuring equipment

Meisterbocks

- Outer and inner for front, decklid, floor or complete body-in-white

Fuegemeisterbocks (Match metal fixtures)

- For front, rear, floor, sidepanels and a complete chassis

Cubings

- For supporting reference models and single parts in changeover

Frames for design models

- For supporting Uriol and clay models

**Alufix fixtures
can also be used for**
assembly and alignment,
glueing and welding,
milling and laser machining

2 Versions

ALUFIX CLASSIC

High tensile aluminium for highest demands on load, stability, long lasting, accuracy

ALUFIX ECO

Medium tensile aluminium as economical alternative for normal applications and moderate building intervals

3 Basic Components

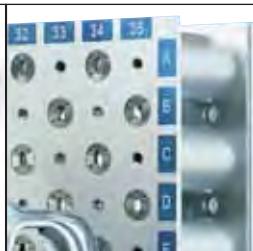

Base plates/grid base plates
(small to medium size fixtures)

Bars full/light

Sandwich plates and grid plates
(large fixtures, mobile)

4 System sizes

Alufix 16
for optical measuring,
Mounting small parts

Alufix 25
for small to medium single part fixtures

Alufix 40
for medium to large assembly part fixtures, meisterbocks etc.

Alufix 50
for mounting large, heavy parts

5 Element groups

Basic elements

Plates, bars, struts, angle brackets

Adjustable elements

Slides, rockers, jacks, rotary plates etc.

Contact elements

Centers, ball points, v-pieces, contour blocks etc.

Clamping elements

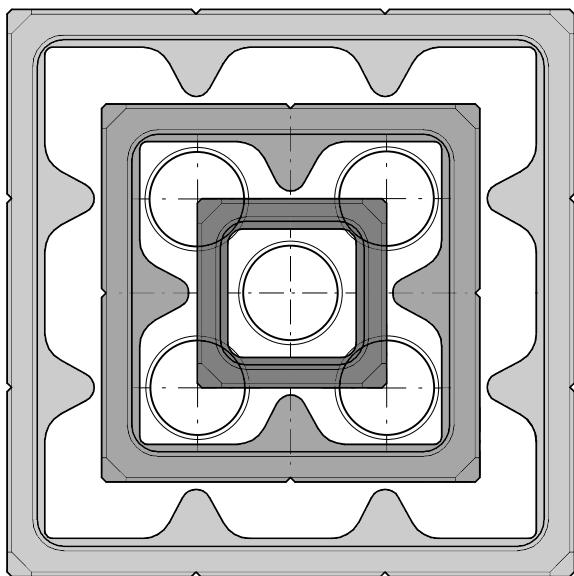

Hold-down springs, toggle clamps, clamps, jaw chucks, vises, magnets, vacuum suckers etc.

Connection elements

Couplings, quick and screw connectors

AF 25 Light, 25x25, 50x50, 75x75, grid hole ø 12,5

Profiles in original size

ALUFIX

Material: EN AW 7075 (high tensile aluminium)

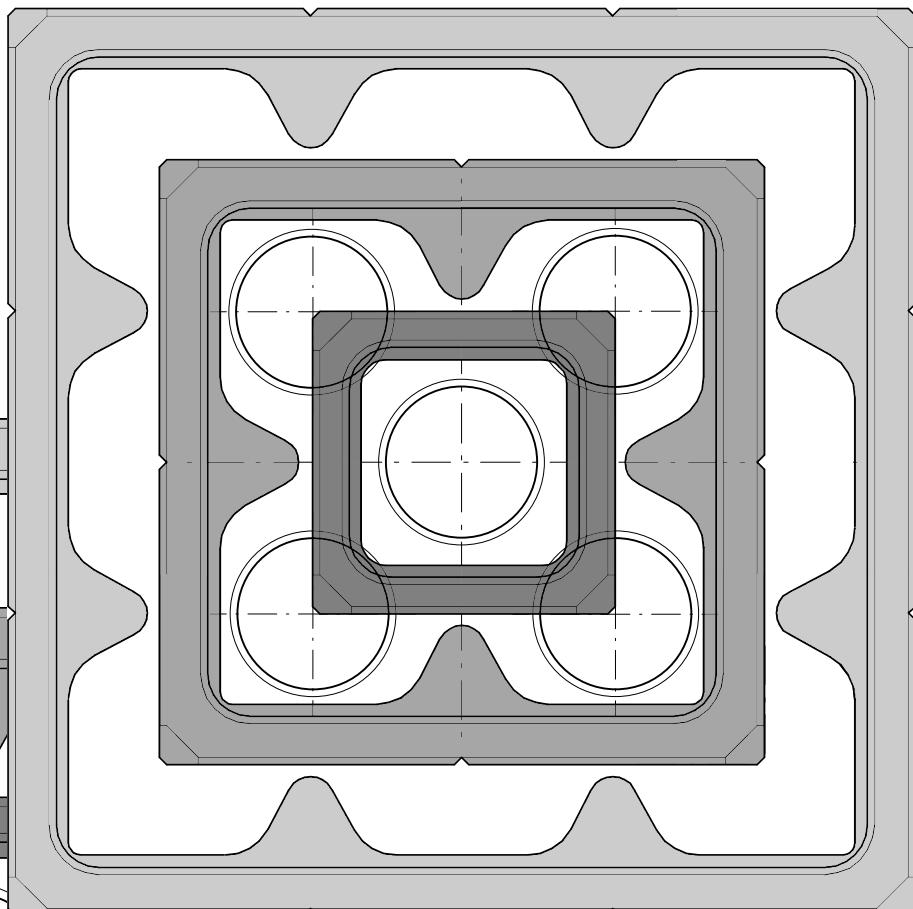

Tensile strength: Min. 480 N/mm²

Hardness: Min. 130 HB

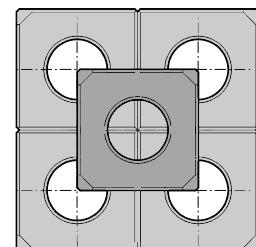

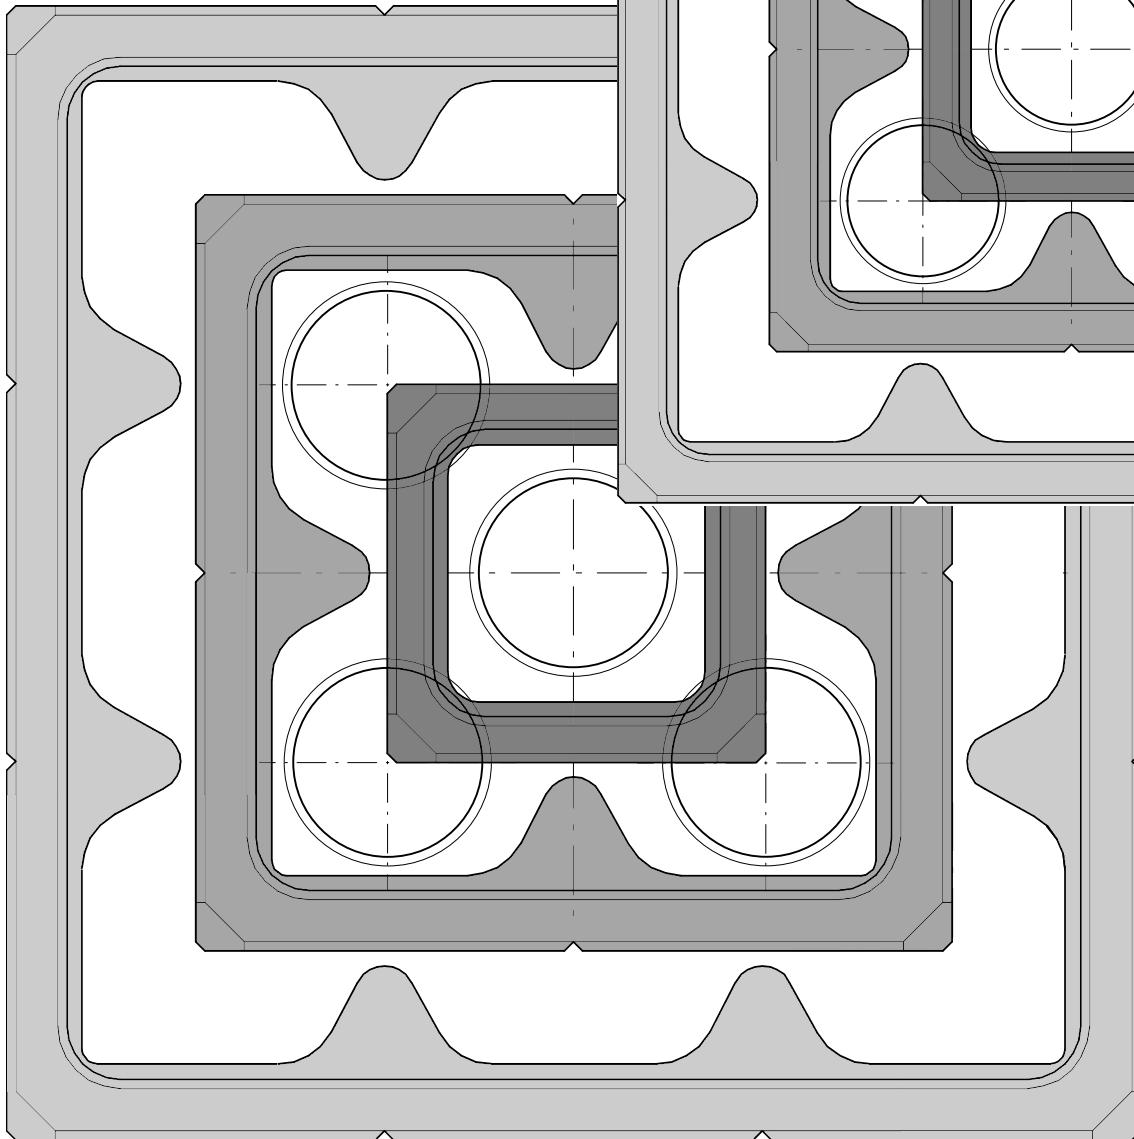

Yield strength: Min. 390 N /mm²

E Module: 72.000 N/m²

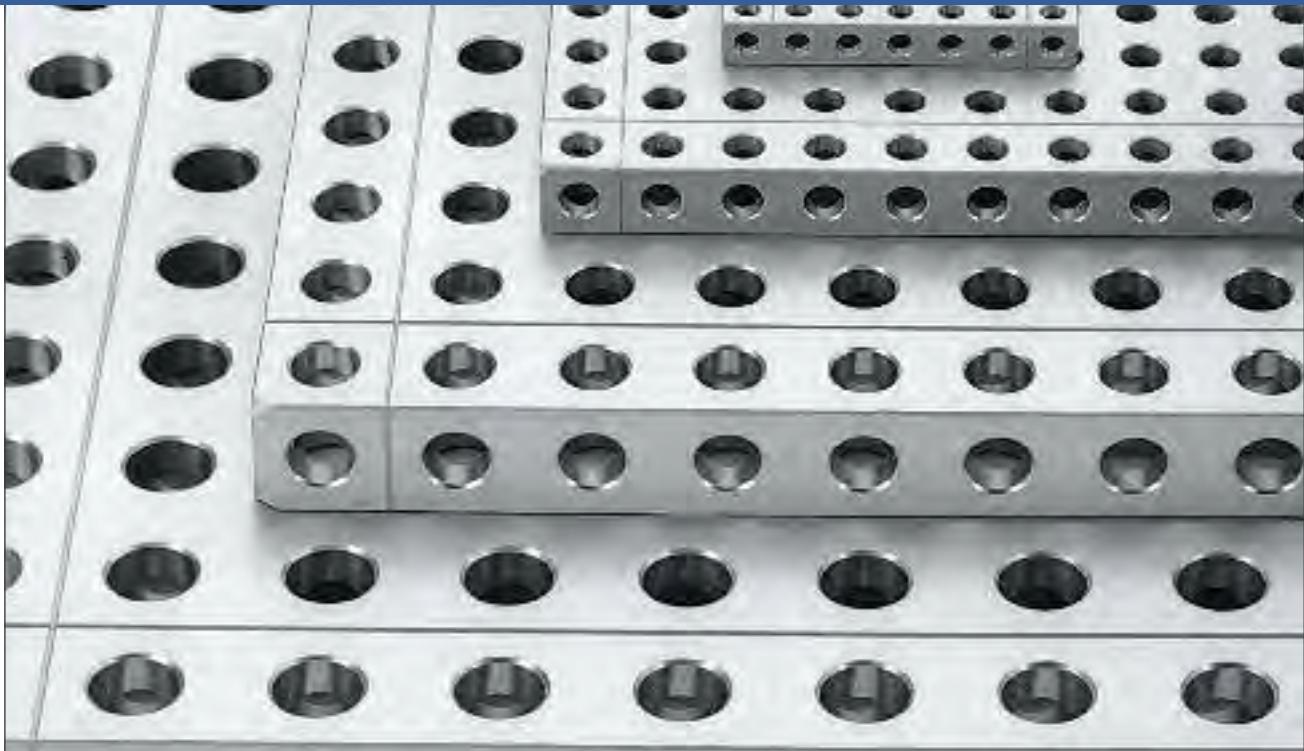

AF 40 Light, 40x40, 80x80, 120x120, grid hole ø 20

AF 50 Light, 50x50, 100x100, 150x150, grid hole ø 25

**AF 16 full,
16x16,
32x32,
grid hole ø 8**

ALUFIX CLASSIC Full Bars

Alufix full bars are suitable for building small to medium size fixtures as a link between base and workpiece contact point. They can be connected on all 6 sides using quick or screw connection technology and are extremely flexible for all kinds of applications. The sizes listed are standard, other dimensions on request.

Universal Struts

Witte universal struts comprising of strut tips and tubes are easy and quick to assemble because of angle and strut lengths which are both variable.

The strut tips can also be used in any grid point of systems (Alufix Classic 25 / 40 / 50).

More angle brackets: AF ECO, page 196

Special connection elements are required to assemble angle brackets, they are shown on page 155

ALUFIX CLASSIC

Quick Change Couplings

Quick change couplings comprise of a top and bottom section, which are aligned accurately together via ball seats. Locking is done with a short turn on a quick fastener. The total height is exactly in Alufix grid.

Hinges connect top and bottom sections if required and provide a fold function. The modular design enables following combination possibilities:

Quick change coupling,
Top and bottom sections separately, standard version

Quick change coupling
for folding back, hinge is
mounted at the rear

Quick change coupling
to fold sideways to the left, hinge is
mounted on the left

Quick change coupling
to fold sideways to the right, hinge is
mounted on the right

Quick change coupling with two folding options
One hinge on the left and one at the rear.
Not shown, one hinge on the right, one hinge at the rear

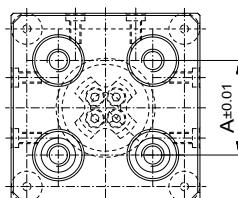

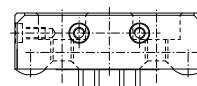

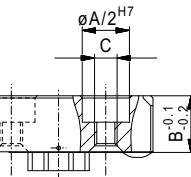

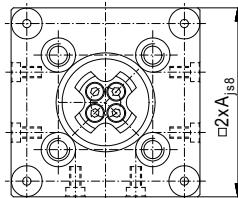

Quick change coupling with three folding options
One hinge on the left, one on the right and one at the rear.

Applications

Measuring fixture for hose.

The positions and angles required are easily calculated with the help of Alufix Expert software (page 238).

Fixtures like this are implemented very quickly.

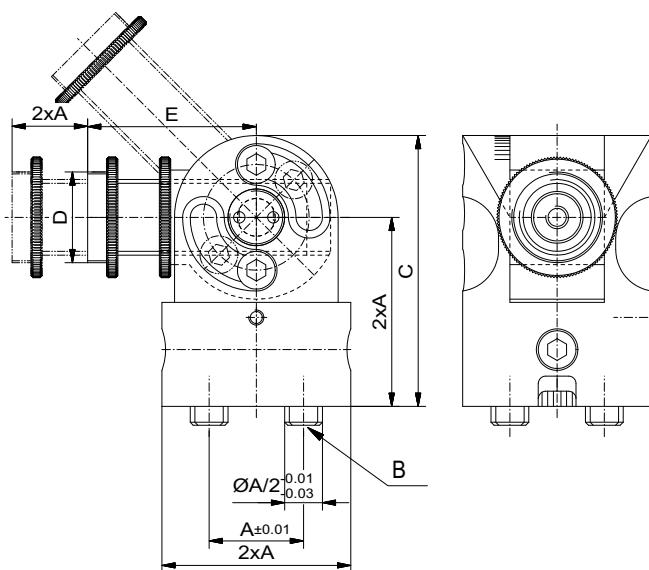

Rotary swing unit

with thread

Nr.	A (AF)	B	C	D	E	
93063	25	M6	72	24x1	44,6	342
99794	40	M10	115	32x1	69	750

 Rotary swing unit 99794 for Alufix 40 with worm gear for fine adjustment in both rotating axes

Rotary swing unit

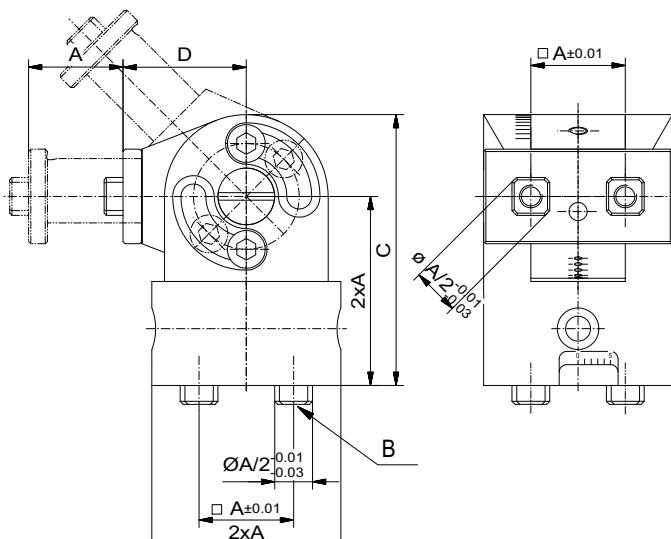

with nubs

Nr.	A (AF)	B	C	D	
93660	25	M6	72	32,6	370
99807	40	M10	115	50	750

 Rotary swing unit 99807 for Alufix 40 with worm gear for fine adjustment in both rotating axes

 Rotary swing unit 93660 and 99794 for Alufix 40 with fine adjustment

 ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

ALUFIX Jacks

Alufix jacks are used to position and level different sized parts for measuring.

These operator-friendly jacks are configured according to application and customer requirements.

Rack gear jack

with height adjustment using a gear jack, vernier 0,05mm

Nr.	A(AF)	B	C	max. load	g
82060	25	100	20	30 kg	570
81871	25	150	75	30 kg	800
82829	40	280	140	45 kg	2.314
90539	50	300	150	60 kg	1.715

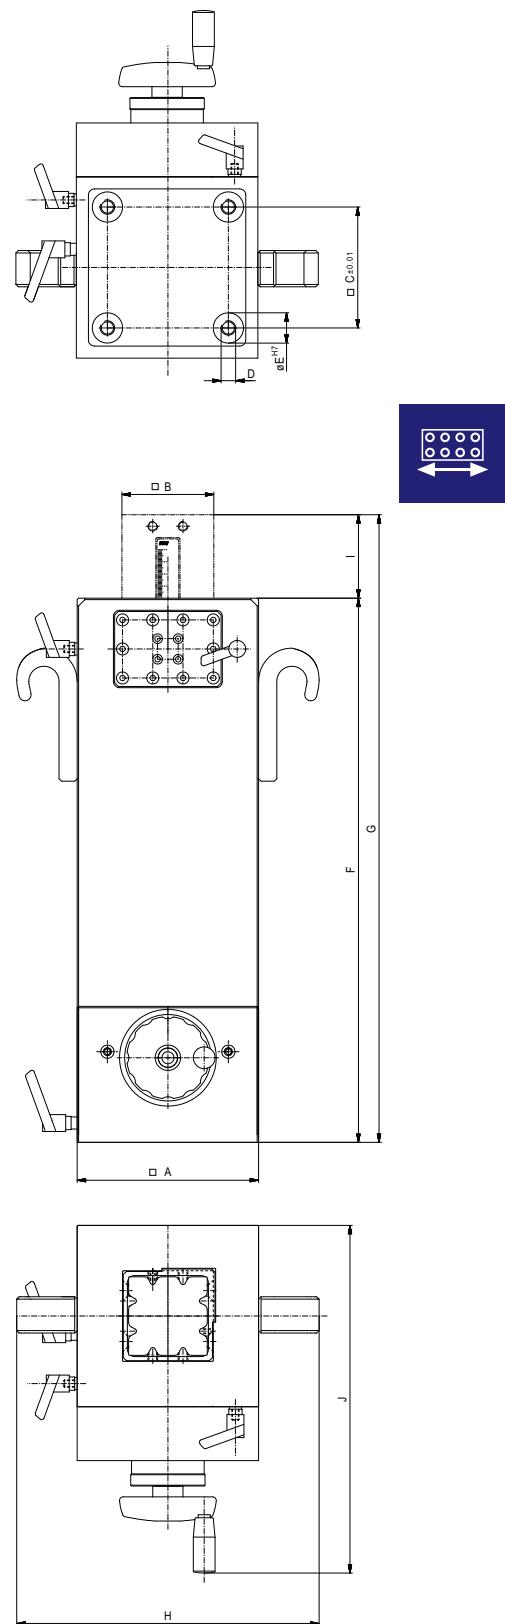

Jack 2000, Heavy Duty

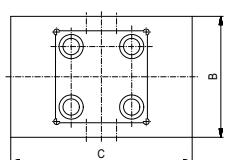

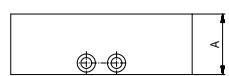

with height adjustment via crank handle, load capacity: 2000kg

Nr.	A	B	C	D	E	F	G	H	I	J	g
98230	150	76	100	M12	25	450	700	250	250	288	21.000

Top blocks are not included in jack supply, they must be ordered separately.

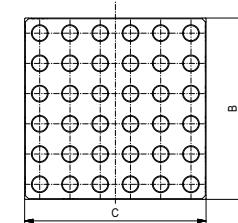

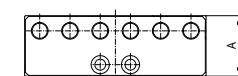

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Top block AF50 for jack

with AF50 holes and connectors

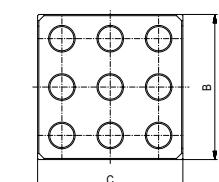

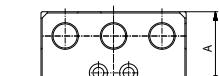

Nr.	A	B	C	\bar{g}
98217	50	100	150	1.924

Top block AF25 for jack

with AF25 grid and connectors

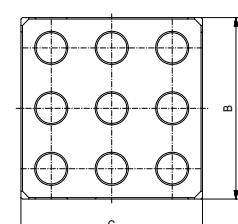

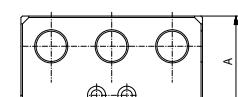

Nr.	A	B	C	\bar{g}
98218	50	150	150	1.823

Top block AF40 for jack

with AF40 grid and connectors

Nr.	A	B	C	\bar{g}
98219	60	120	120	2.150

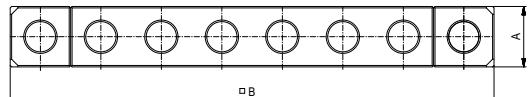

Top block AF50 for jack

with AF50 grid and connectors

Nr.	A	B	C	\bar{g}
98220	75	150	150	4.100

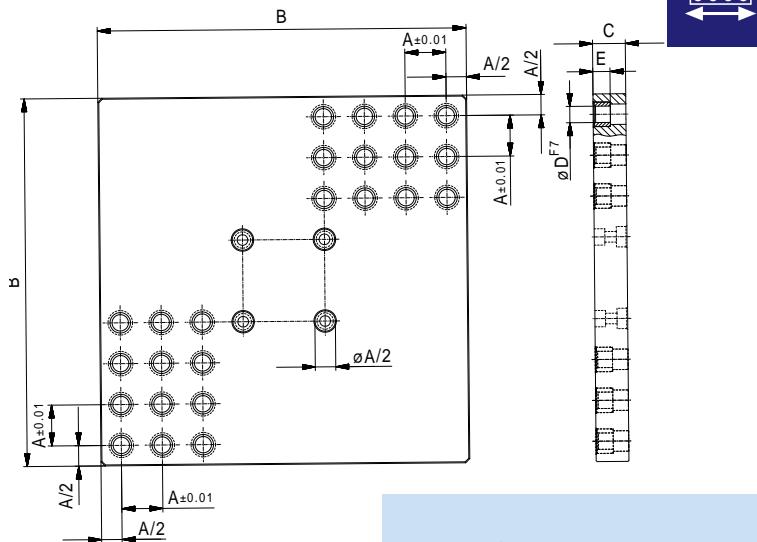

Base plate for jack grid AF25, including connectors

Nr.	A	B		g
98221	50	400		13.050

Base plate for jack

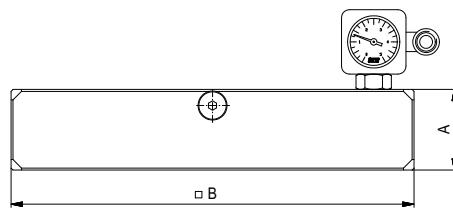

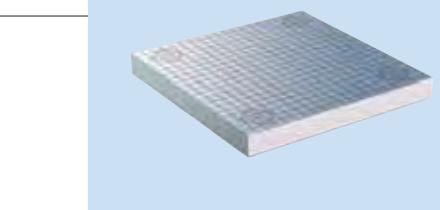

Nr.	A	B	C	D	E	g
337271-A	50	450	40	Ø20F7	21	21.500

Unmachined base plates for
jacks
or individually manufactured
base plates on request

Base plate for jack with hovercraft and magnetic function, including connectors

Nr.	A	B		g
281196	67	300		18.000

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Other dimensions on request

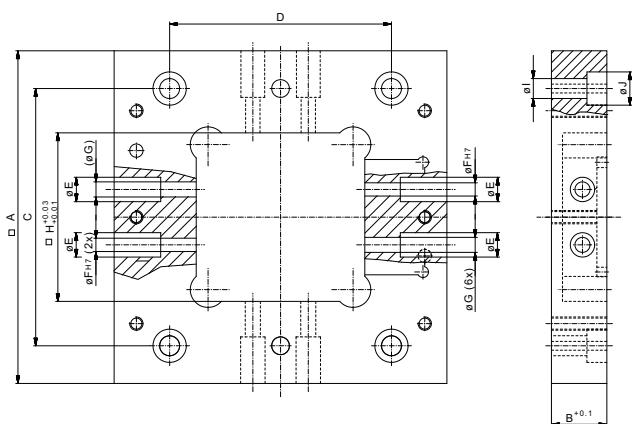

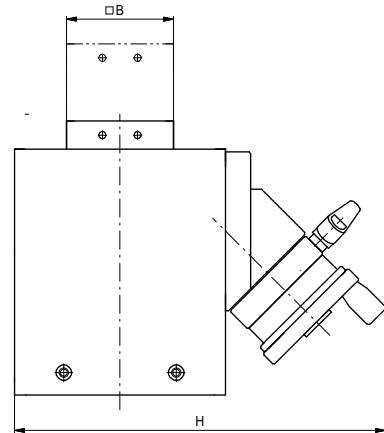

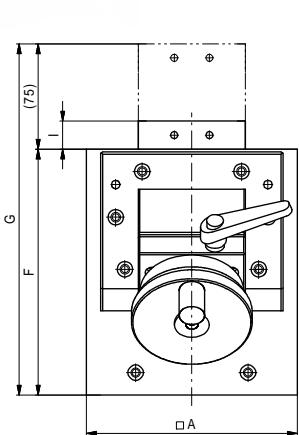

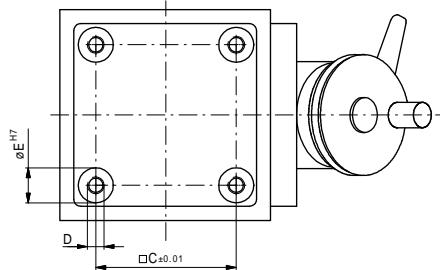

Top blocks are not included in jack supply, they must be ordered separately.

Jack 1000

with height adjustment via crank handle,
load capacity: 1000kg

Nr.	A	B	C	D	E	F	G	H	I	
92949	150	76	100	M12	25	175	250	265	20	10.115

Top block

for jack 92949

Nr.	A	B	C	D	E	F	G	H	I	J	
50219	150	25	116	100	11	6	6,8	76	9	15	1.200

Top blocks are not drilled but can be supplied with customized grid on request

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

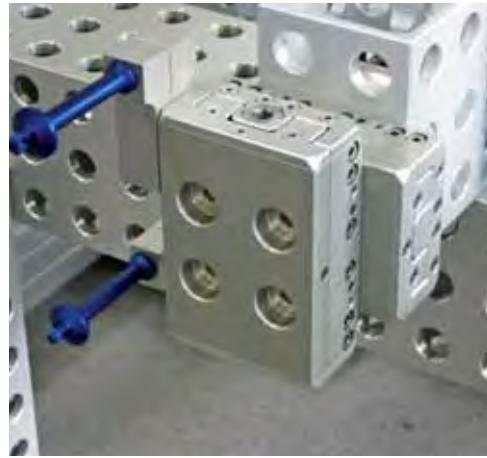

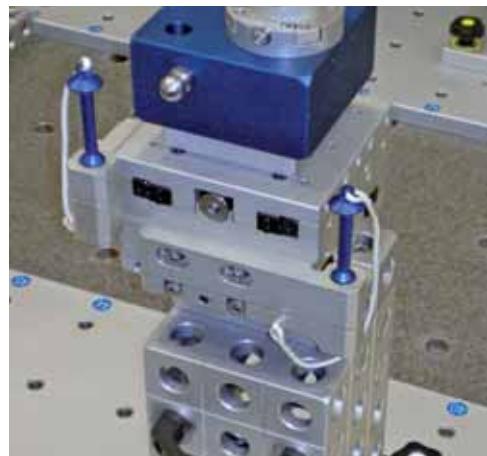

Right picture shows
jack 98230
with top block 98218
and base plate 98222

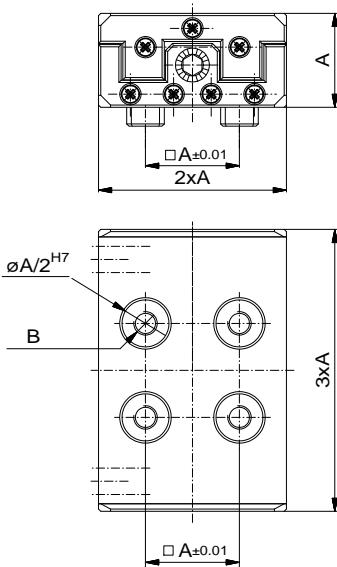

ALUFIX roller and guiding slides

Roller slide

adjustment using a screw spindle

Nr.	A (AF)	B	max. load	shift	g
82453	16	M4	20 kg	±9	89
82172	25	M6	50 kg	±13,5	242
82173	40	M10	150 kg	±22	970
82398	50	M12	250 kg	±27	1.910

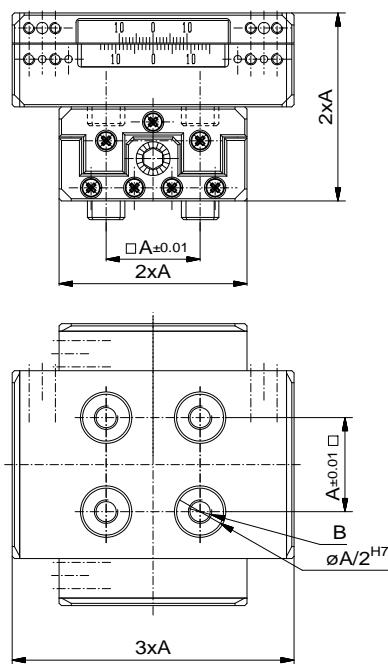

Cross roller slide

adjustment using a screw spindle

Nr.	A (AF)	B	max. load	shift	g
82461	16	M4	20 kg	±9	178
82462	25	M6	50 kg	±13,5	484
82463	40	M10	150 kg	±22	1.940
82399	50	M12	250 kg	±27	3.820

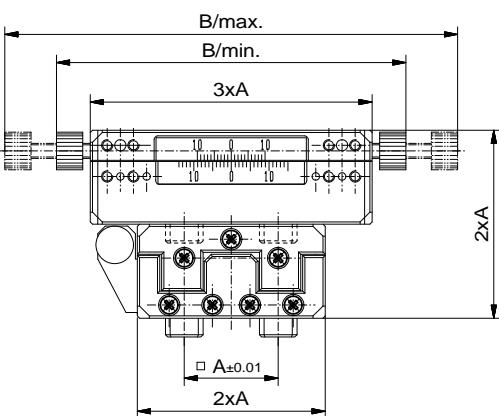

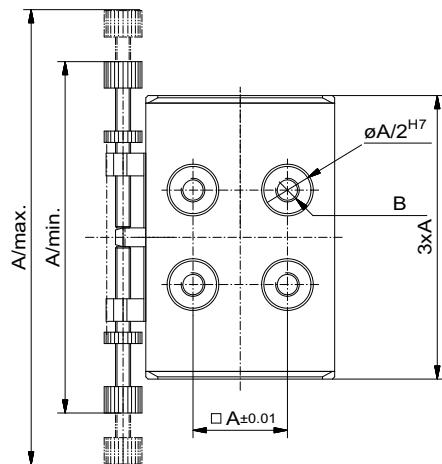

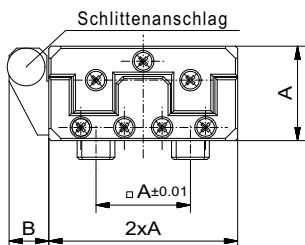

Roller slides and cross roller slides can be optionally equipped with rotating knob/s

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Other dimensions on request

Guiding slide with slide stop movement assisted by free floating rollers

Nr.	A(AF)	B	shift	A/min	A/max	max. load	g
82015	16	7	± 8,5	59	77	20 kg	70
82002	25	10,5	± 13,5	93	120,5	50 kg	250
82016	40	16,8	± 22	146,8	192	150 kg	1.024
82441	50	21	± 27,5	186	242	250 kg	6.000

Cross guiding slide with slide stop movement assisted by free floating rollers

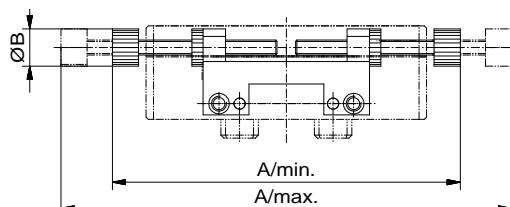

Nr.	A(AF)	B/min	B/max	max. load	shift	g
82436	16	59	77	20 kg	± 8,5	150
82437	25	93	120,5	50 kg	± 13,5	520
82438	40	146,8	192	150 kg	± 22	2.100
82439	50	186	242	250 kg	± 27,5	12.500

Slide stop

for guiding or roller slides

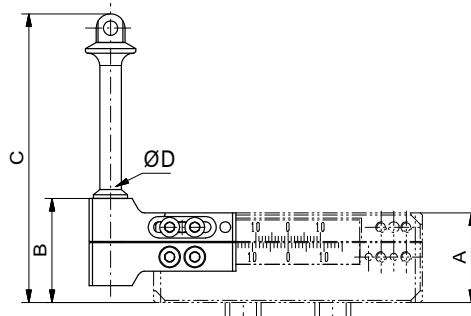

Nr.	AF	A/min	A/max	B	
82411	25	59	77	6,4	98
82412	40	93	120,5	10	115
82413	50	146,8	192	16	131
82414	50	186	242	19	140

Positioning guide and pin

to fix guiding slides in "O" position

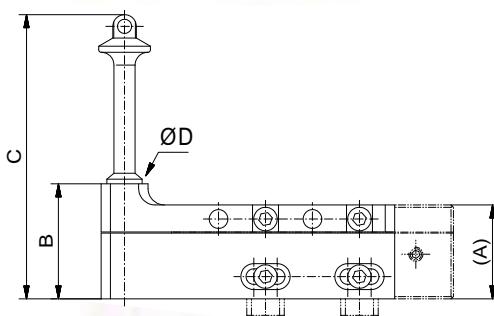

Nr.	A(AF)	B	C	D	Type	
82711	25	20	80,5	6	left	50
84321	25	20	80,5	6	right	50
82833	40	47	110	8	left	180
84320	40	47	110	8	right	180
83083	50	58	135	12	left	294
84322	50	58	135	12	right	294

Positioning guide and pin

to fix heavy duty (HD) guiding slides in "O" position

Nr.	A(AF)	B	C	D	Type	
92642	25	30,5	82	6	left	240
92643	25	30,5	82	6	right	240
92644	40	49	121	8	left	372
92645	40	49	121	8	right	372
92646	50	61	138	12	left	586
92647	50	61	138	12	right	586

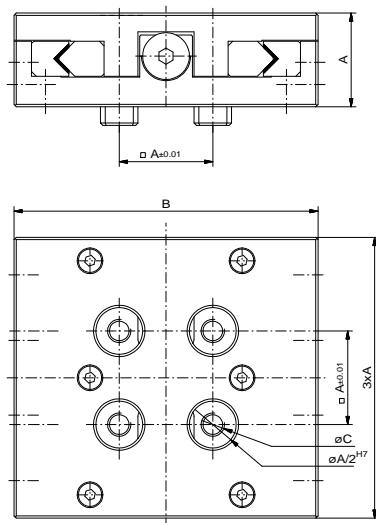

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Other dimensions on request

Witte heavy duty slides are available with slide bearing or roller bearing. Slides with roller bearing can cope with a higher load capacity than with free floating operation

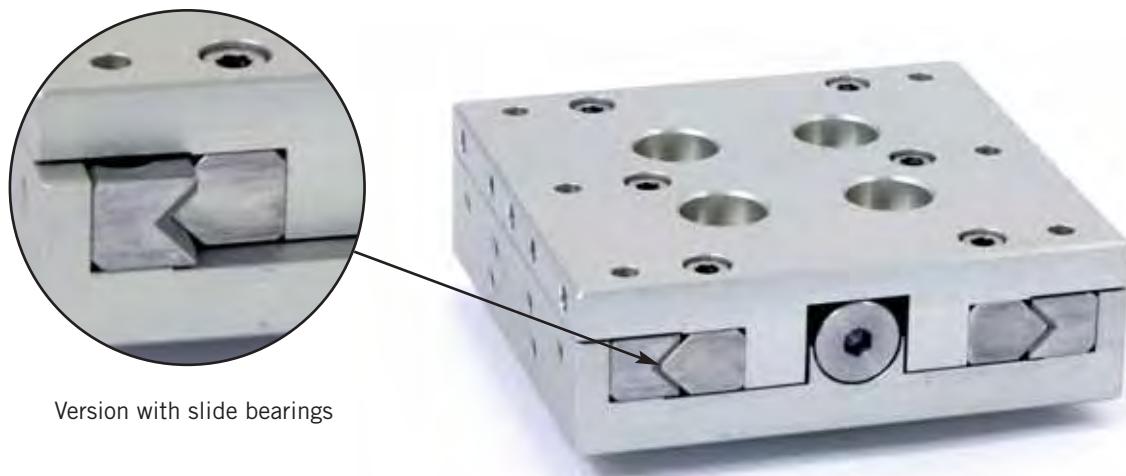

Guiding slide, heavy duty guided with slide bearings

Nr.	A (AF)	B	C	max. load	shift	g
92364	25	79	M6	75 kg	+/- 12,5	450
92423	40	130	M10	225 kg	+/- 20	2.000
92424	50	158	M12	375 kg	+/- 25	3.500

guided with roller bearings

Nr.	A (AF)	B	C	max. load	shift	g
280495	25	79	M6	150 kg	+/- 13	450
280496	40	130	M10	450 kg	+/- 21	2.000
280497	50	158	M12	750 kg	+/- 26	3.500

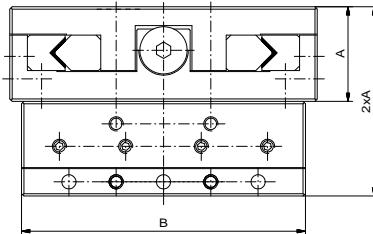

Application example:
Anodized black with positioning pin and
guide mounted

Cross guiding slide, heavy duty

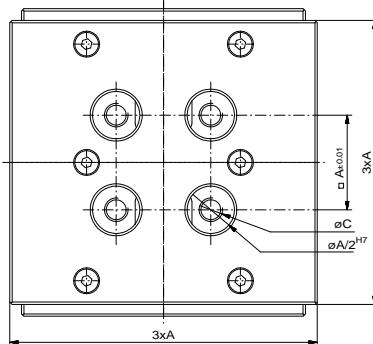

guided with slide bearings

Nr.	A(AF)	B	C	max. load	shift	g
92031	25	79	M6	75 kg	+/- 12,5	900
92425	40	130	M10	225 kg	+/- 20	4.000
92426	50	158	M12	375 kg	+/- 25	7.000

guided with roller bearings

Nr.	A(AF)	B	C	max. load	shift	g
280498	25	79	M6	150 kg	+/- 13	900
280499	40	130	M10	450 kg	+/- 21	4.000
280500	50	158	M12	750 kg	+/- 26	7.000

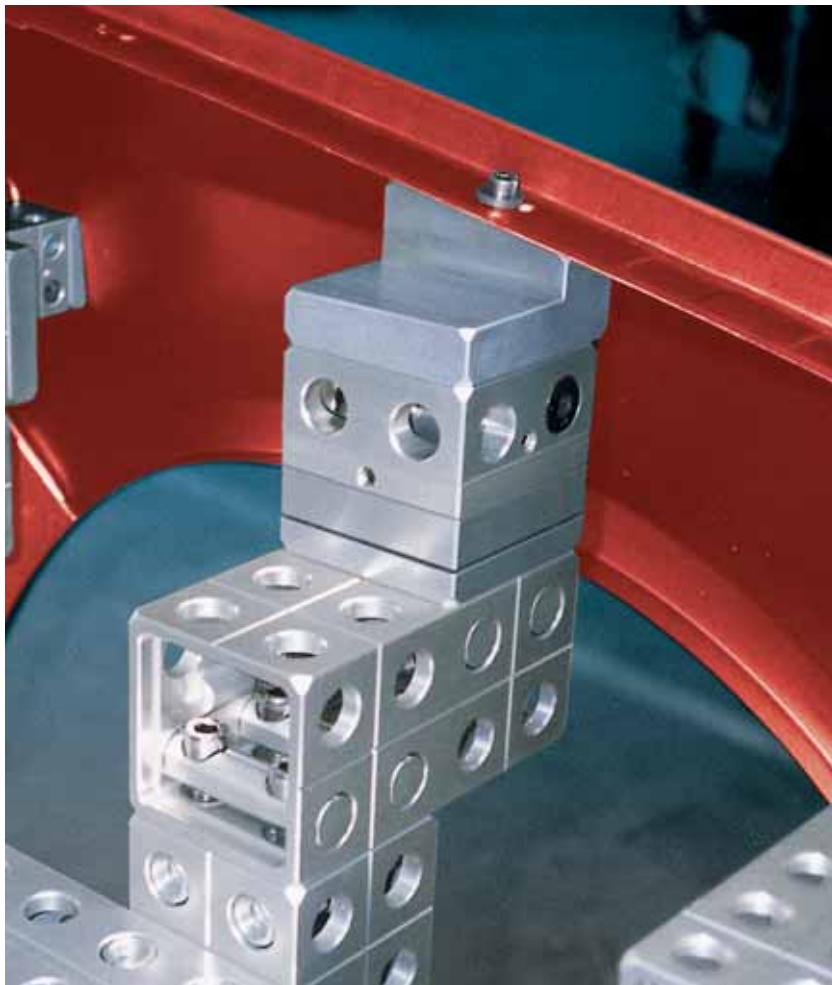

Version with roller bearings

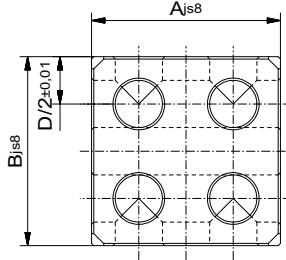

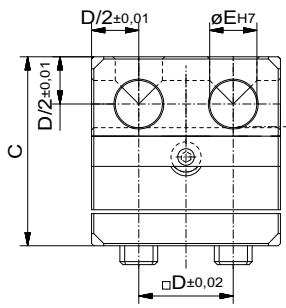

Application example:
Hook clamp with cross guiding slide
with slide bearings

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

ALUFIX Adjustment blocks

3D Adjustment block

for fine adjustment in three axes, centric clamping

Nr.	φE/D=AF	AxBxC	shift	g
82244	12,5/25	50x50x50	x,y: +/- 1,5; z: +/- 0,7	294
82339	20/40	80x80x80	x,y: +/- 2,0; z: +/- 1,0	1.240
82766	25/50	100x100x100	x,y: +/- 3,0; z: +/- 1,5	2.381

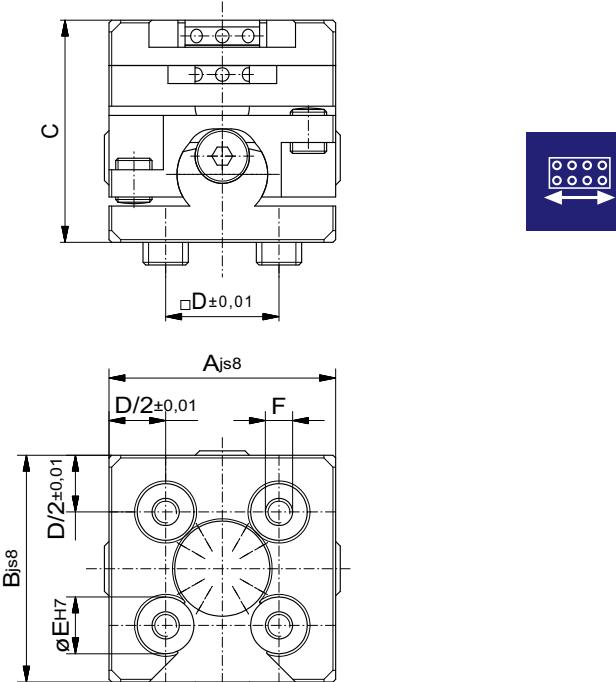

6D Adjustment block

for fine adjustment in six axes, centric clamping

Nr.	D (AF)	AxBxC	$\phi E / F$	linear x/y	linear z	rotation x/y	rotation z	\bar{g}
85340	25	50x50x50	12,5 / M6	+/- 2,0	+/- 1,5	+/- 12°	+/- 5°	318
85341	40	80x80x80	20 / M10	+/- 2,5	+/- 2,0	+/- 12°	+/- 5°	1.150
85390	50	100x100x100	25 / M12	+/- 3,0	+/- 2,5	+/- 12°	+/- 5°	2.482

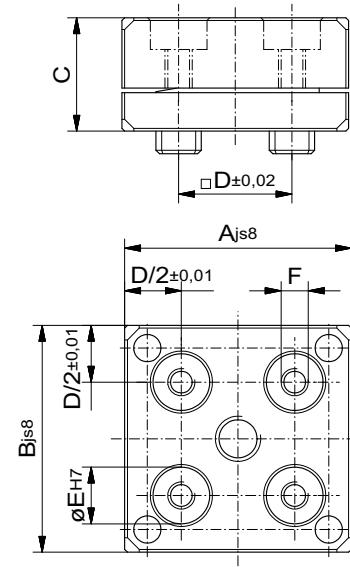

The 6D-adjustment block allows not only linear movement but also angled or rotated movement. Machining, assembly or workpiece tolerances can be easily evened out. Cylindrical guiding elements, which allow translatory and also rotary adjustment were incorporated into the design.

Levelling plate

for fine adjustment in one axis, screw clamping

Nr.	D(AF)	AxBxC	$\phi E / F$	shift	\bar{g}
91670	25	50x50x25	12,5 / M6	+/- 1,0	165
91671	40	80x80x40	20 / M10	+/- 1,3	680
91084	50	100x100x50	25 / M12	+/- 1,6	1.400

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Guiding slide with cross roller guides

Maximum load when evenly spread over whole surface: 20kN.

Maximum load when spread unevenly or at single points: 2,8kN

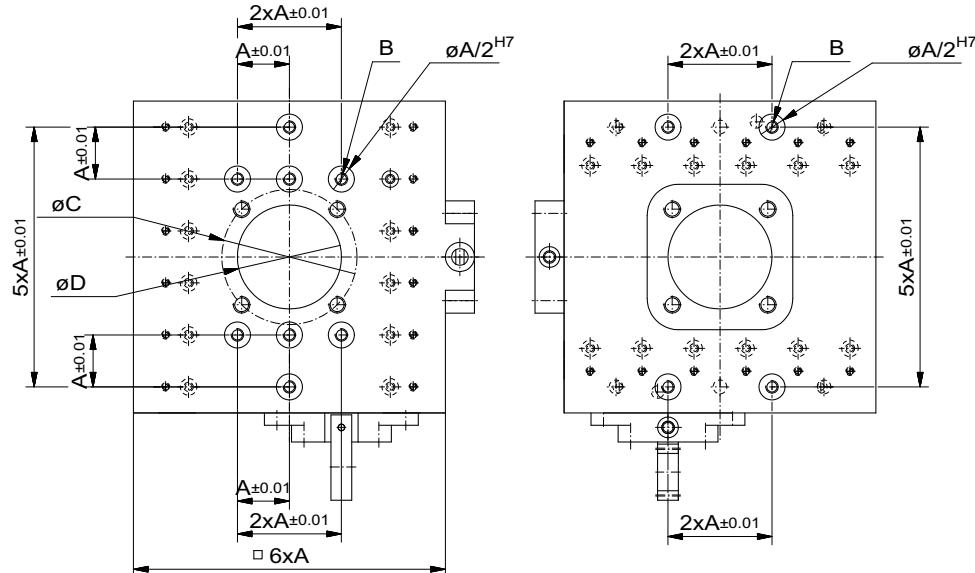

If foot for hook clamp is mounted, slide can carry 6kN.

Maximum sideways force against hook clamp tip: 4kN

Guiding slide with cross roller guides

AF25, with mounting hole for i.e. hook clamp

Nr.	A(AF)	B	C	D	g
92736	25	M6	65	50	3.000

Characteristics:

Material: High tensile aluminium

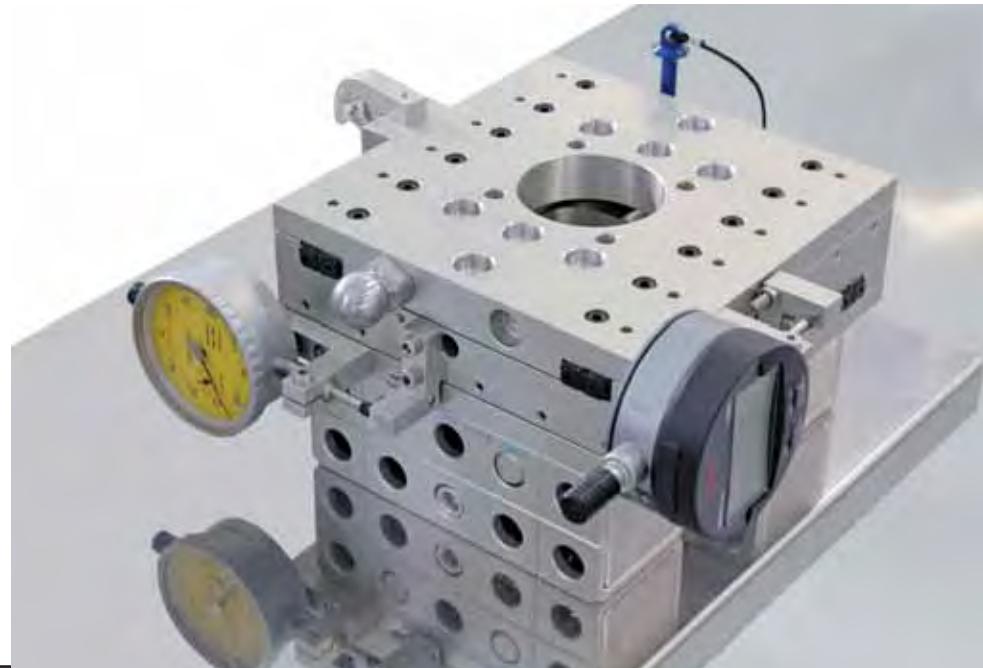

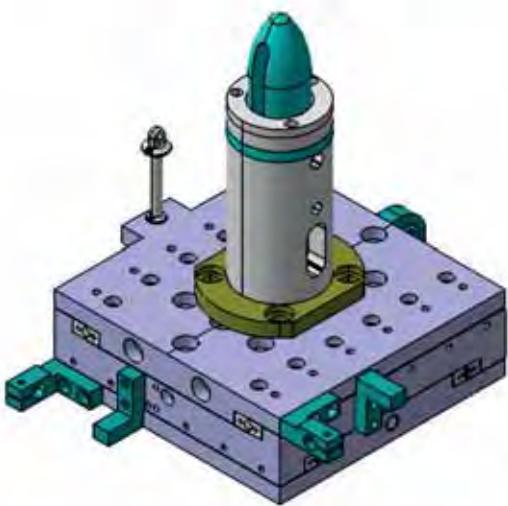

Dimensions: 150x150x50 (lxwxh)

Shift: +/- 25mm in both directions

Integrated zero pitch

Optional dial gauge holder can be mounted on top or bottom

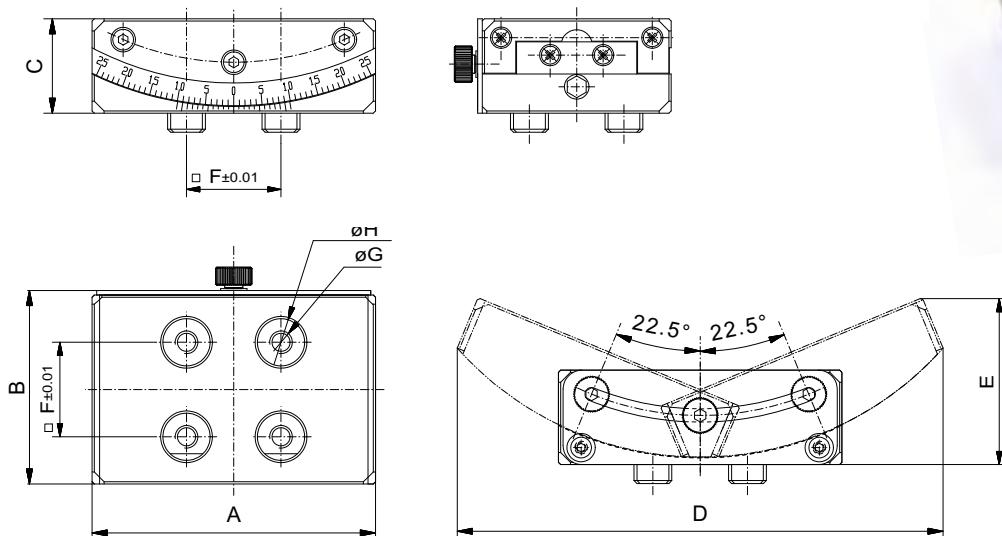

Anodized natural, black or other colour on request

Rocker AF25

for positioning, with screw clamping

Nr.	A	B	C	D	E	F(AF)	G	H	g
82972	75	51	25	128,5	44	25	M6	12,5	242
283778	120	82	40	206	70	40	M8	20	900

Tilt and turntable

#84918

with Alufix 25 grid in top surface

Dimensions:
L450 x W350 x H100 mm

Comprising of 4 levels, connected with a scissor mechanism, allowing a maximum tilt angle of 10° in X and Y axis.

The top level can be rotated horizontally +/- 10° in Z axis.

Adjustment of the tilt and turntable is effected with fine threaded spindles.

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

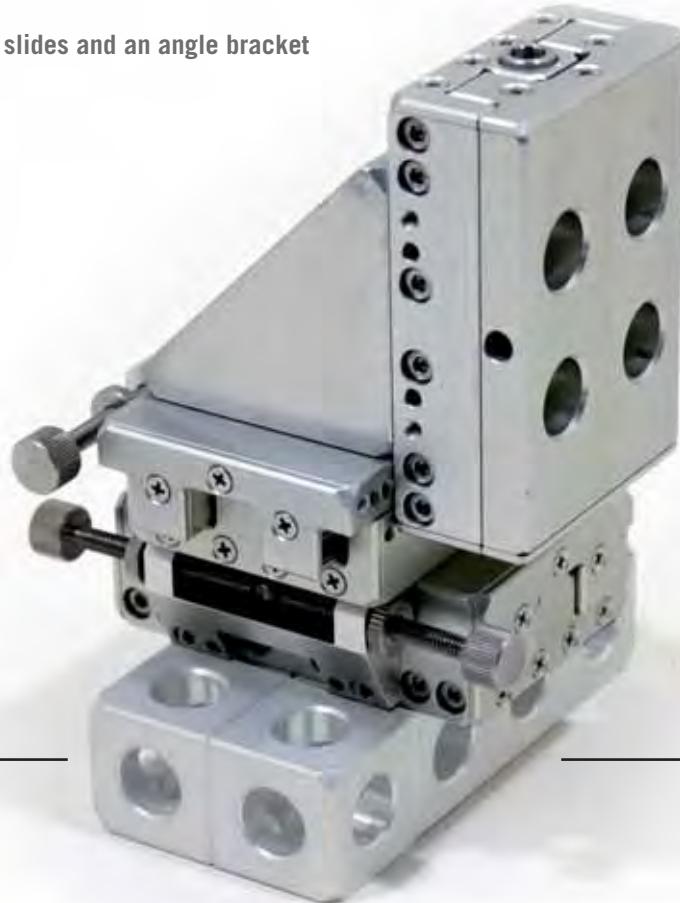

Other dimensions on request

Simple slide

with circular guides and regulating screw

**Short shift guiding slide
with lock****XYZ slide**

using three roller slides and an angle bracket

Motorized slide
with step motor

Motorized jack
with step motor

Control unit
for motorized adjusting elements with
selection of direction and step size

Power Unit
for up to 4 motorized adjusting elements

Pictures on these pages show special solutions.
Detailed information on request

Tilt/Turtable for individual workpiece location and clamping.

For linear measurement on surface, roughness and/or roundness measuring equipment it is necessary to align surfaces/outlines to be measured parallel to the measuring axis or to move the part into the corresponding axis.

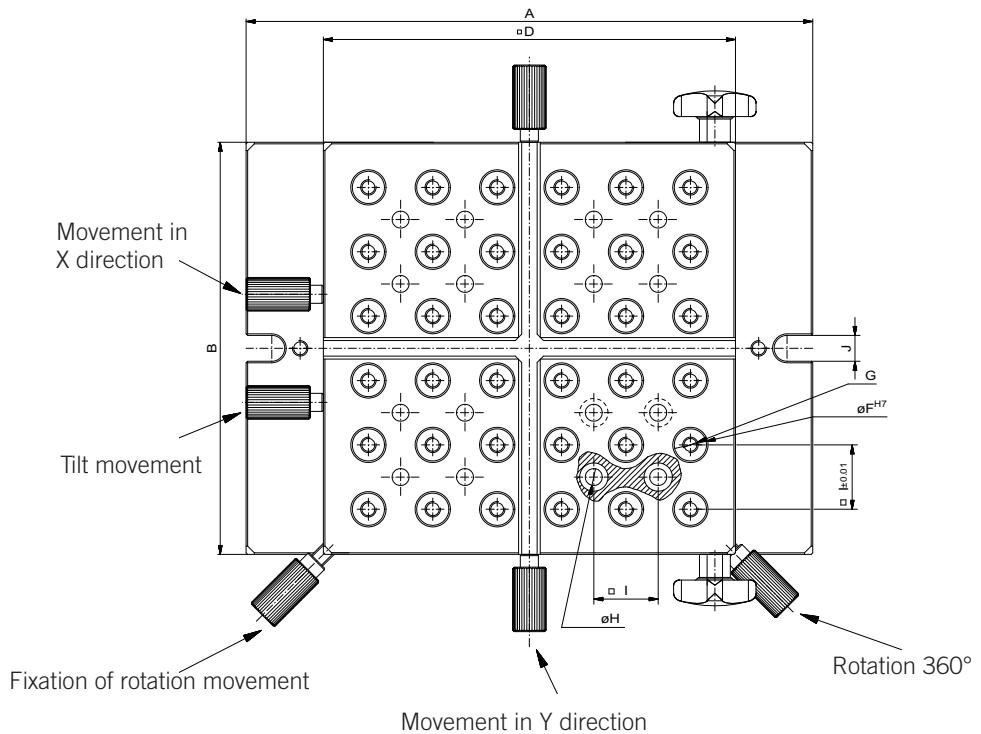

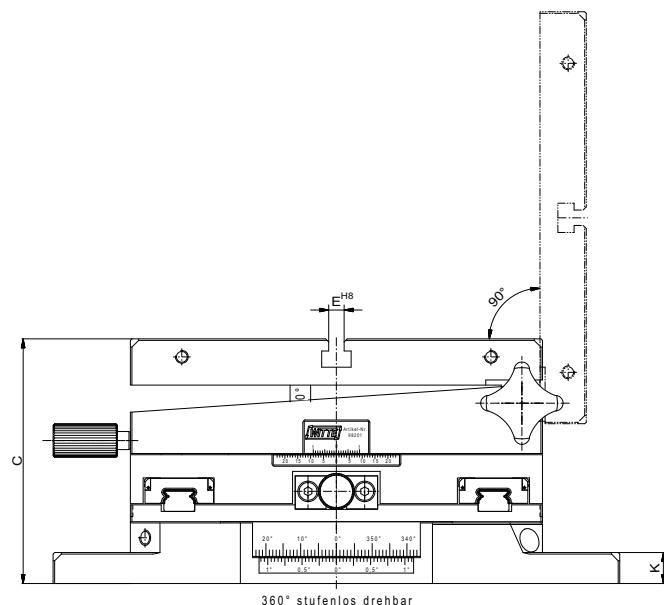

Because this is often a problem especially with uneven, convex or concave parts, so-called swivel tables are used.

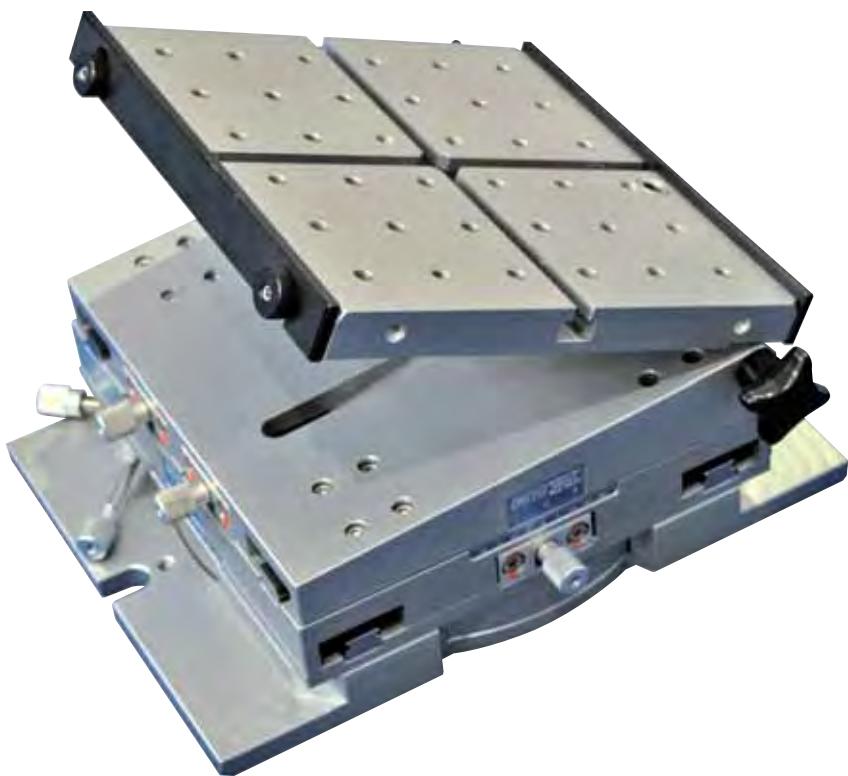

This novel Witte turntable concept offers advantages of our reknowned system technology - lightweight design with high stability, and together with modular fixturing elements is ideal for integrating into existing environments.

The Witte tilt/turtable is an excellent stand alone solution to combine with 3D coordinate measuring machines

Tilt and turtable for measuring instruments for positioning and clamping in 4 axes

Nr.	A	B	C	D	E	F	G	H	I	J	K	g
98201	220	160	95	160	6	12,5	M6	6,6	25	10	12	9.500

Technical data

Dimensions L x W x H:.....220 mm x 160 mm x 95 mm (folded)

Positioning:Rotation 360°

Setting:.....X- und Y-Axis with linear guide ±12,5mm

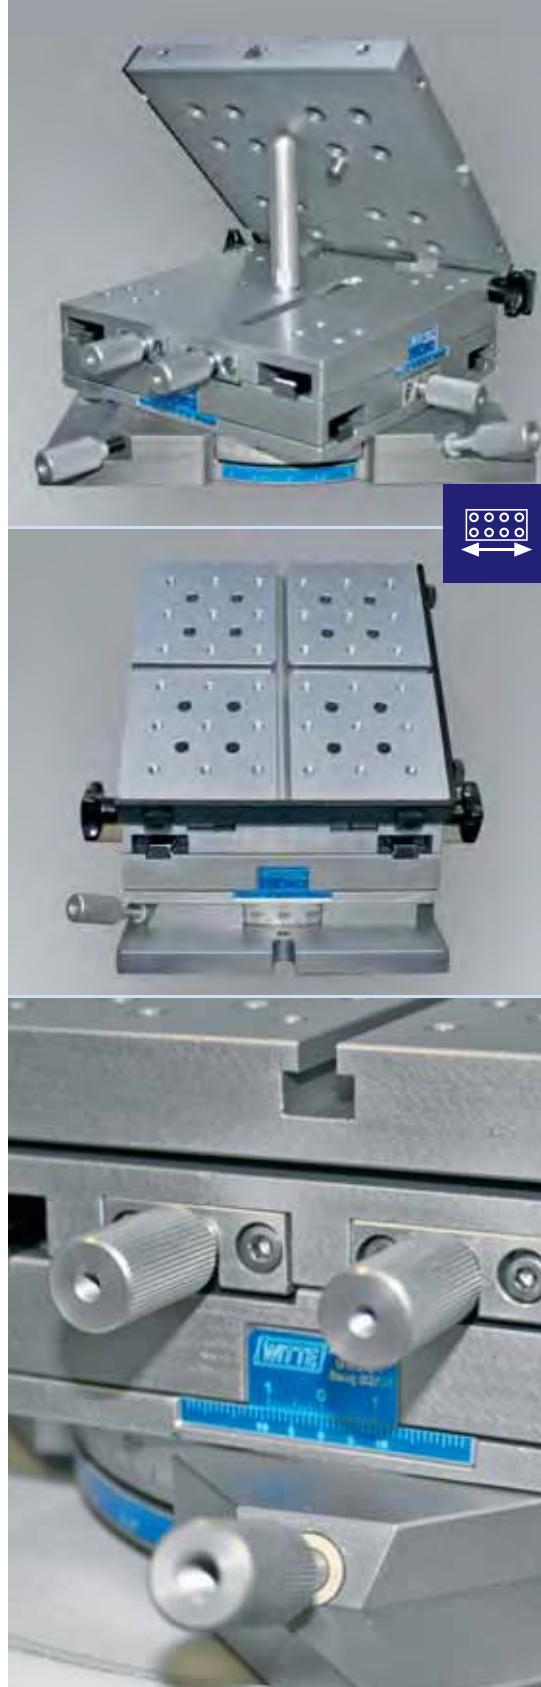

Angled table surface:±3°

(all above settings are infinite, lockable in any position)

Table angle:up to 90°; optional lock possibilities at 45° and 90°

Further technical information:

- T-slots in table centre (90° offset)
- 36 M5 threaded holes, 16 holes for fixing pins Dia. 6
- Moveable stops for outer edges
- Finely ground table under surface for accurate base connection
- Face end threads and slots for fixation
- Capacity max 100N

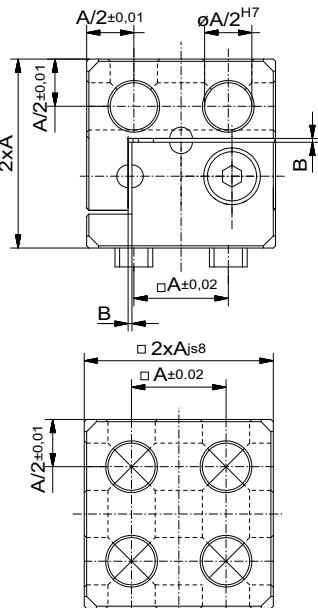

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

ALUFIX shim blocks

Adjustment in X,Y,Z takes place by inserting or removing shim foils or shims. After adjustment settings are fixed using pins.

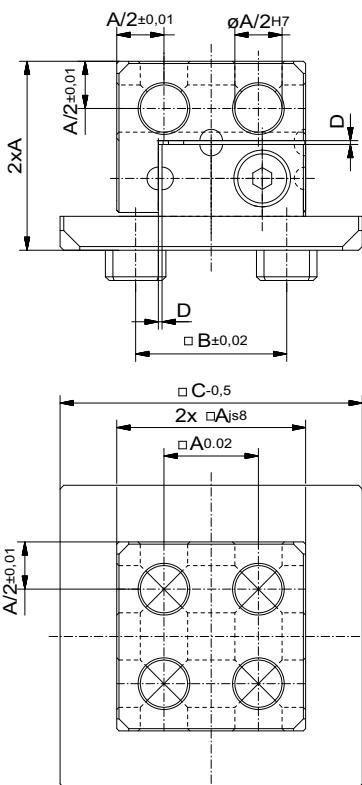

Values shown in the chart for range of adjustment are maximal values for one axis. Values in brackets show adjustment range when using more than one axis simultaneously.

3D Shim block AF

for fine adjustment in 3 axes X,Y,Z, using shim foils (page 78).

Nr.	ØE/D (AF)	AxBxC	shift	g
89177	12,5/25	50x50x50	x,y,z: +/- 1,0 (0,7)	294
89178	20/40	80x80x80	x,y,z: +/- 1,6 (1,1)	1.100
89179	25/50	100x100x100	x,y,z: +/- 2,0 (1,4)	2.326

3D Shim block, reducer

for fine adjustment in 3 axes X,Y,Z, using shim foils (page 78).

Nr.	E (AF)	AxBxCxD	F	shift	Typ	g
91837	40/25	50x50x50x80	12,5	x,y,z: +/- 1,0 (0,7)	left	537
280764	40/25	50x50x50x80	12,5	x,y,z: +/- 1,0 (0,7)	right	537
91838	50/25	50x50x50x100	12,5	x,y,z: +/- 1,0 (0,7)		632

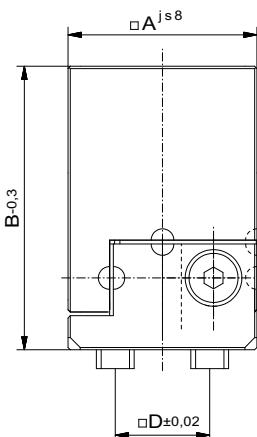

3D Shim block

with integrated contour block

for fine adjustment in 3 axes X,Y,Z, using shim foils (page 78).

Nr.	D (AF)	AxAx B	shift	
91834	25	50x50x70	x,y,z: +/- 1,0 (0,7)	473
91835	40	80x80x120	x,y,z: +/- 1,6 (1,1)	2.074
91836	50	100x100x150	x,y,z: +/- 2,0 (1,4)	4.275

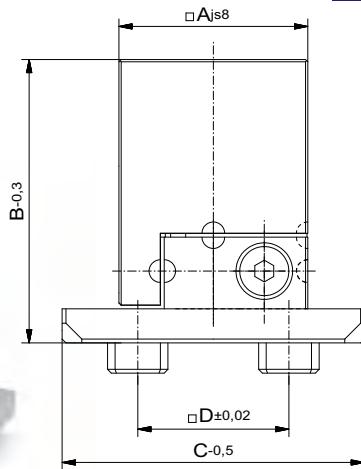

3D Shim block, reducer

with contour block

for fine adjustment in 3 axes X,Y,Z, using shim foils (page 78).

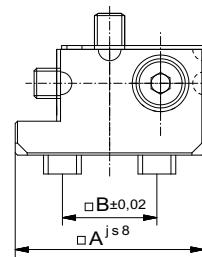

Nr.	D (AF)	AxAxBxC	shift	
91839	40/25	50x50x75x80	x,y,z: +/- 1,0 (0,7)	645
91840	50/40	50x50x75x100	x,y,z: +/- 1,6 (1,1)	743

3D Shim block base, side mounting

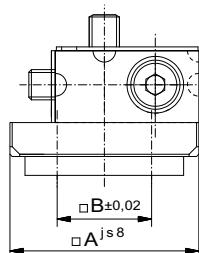

complete with shims and screws

Nr.	B (AF)	AxA	
92165	25	50x50	203
92166	40	80x80	778
92167	50	100x100	1.485

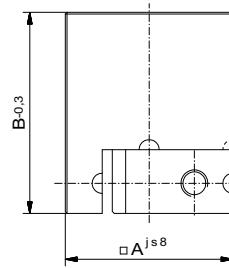

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Application example: Clamping unit with ratchet clamp (blue) mounted on machined contour block (orange) with 3D shim block base

Shim block premium

with two shim packages for each direction of adjustment

- Shim package I:
For setting zero position, held magnetically
- Shim package II:
To even out workpiece tolerances

Application example: Premium shim block with centering pin

Application example: Premium shim block with clamping unit with ratchet clamp mounted on machined contour block

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

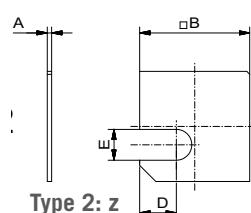

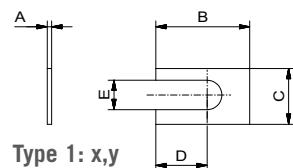

Detailed information on request

Peelable shim foil
for gaps between elements,
in various thicknesses.
Comprises of 0,05mm
thick laminated alu-foils.
The easy process of peeling
with a knife can be carried
out on the spot when spa-
cers are required.

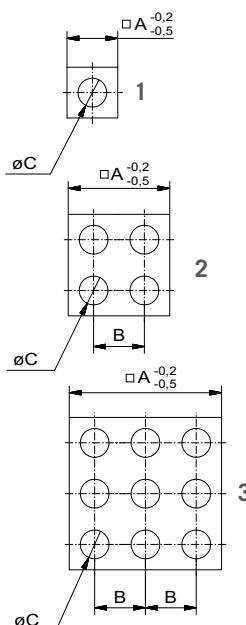

The advantages:
 • Tolerances are evened out
making remachining jobs
such as milling, grinding
etc. unnecessary
 • Reduces setting up times
 • Reduces amount of
machining required

Shimfoil type 1 or 2

peelable, in 0,05mm layers, for setting of shim blocks

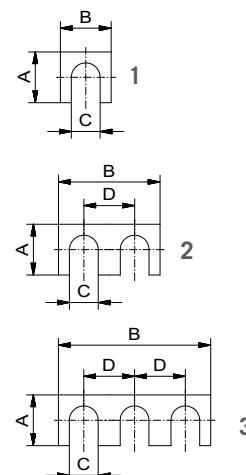

Nr.	System	Type	A	B	C	D	E	g
33013	AF25	2	1,0	37,5	-	12,5	10	1,5

Last three digits of order number correspond to shim thickness in 1/100mm.

Example:

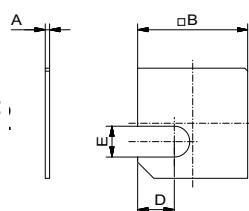

Shim AF25 type 2: **No. 123XXX**,

Desired thickness: 1,65 mm

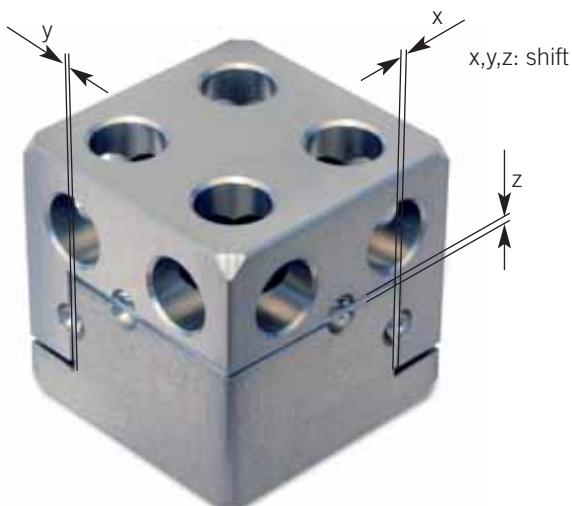

Order number is **123165**

Type 1: x,y

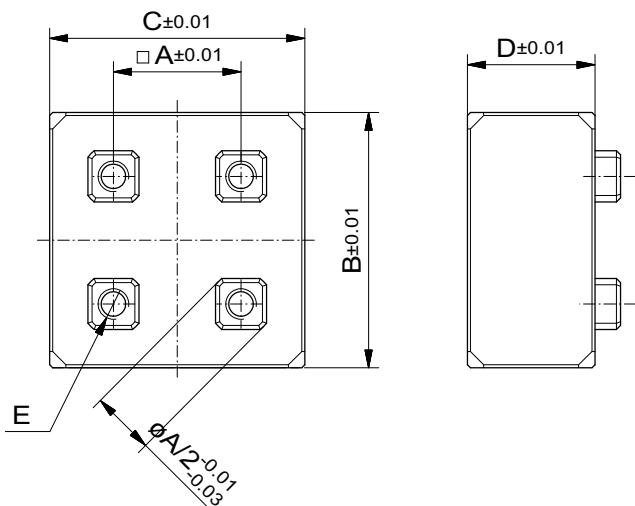

Type 2: z

Adjustment takes place by adding or taking away shims and/or shim foils.

After adjustment settings can be fixed using pins.

81836	AF 40	160	34	33,5	30	152	M8	226

Supply includes:
1 forming jaw,
2 bushes,
2 Threaded pins,
2 countersunk screws

Compound resin

Nr.	contents g	g
80692	100	120
80685	400	460

Technical details:

Tensile strength 300kg/cm²

Compression strength: 800kg/cm²

Heat resistance upto +200°C

Application example for compound resin in standard moulding cap

Plasticine compound resin

Knead blue and yellow components in ratio 1:1,

blend well until colour throughout is green.

Apply within 15 minutes.

The resin hardens to full strength within 3 hours.

Attaching the forming jaws with plasticine compound:

Positioning of workpiece:

The forming jaws with the compound resin are pressed together.

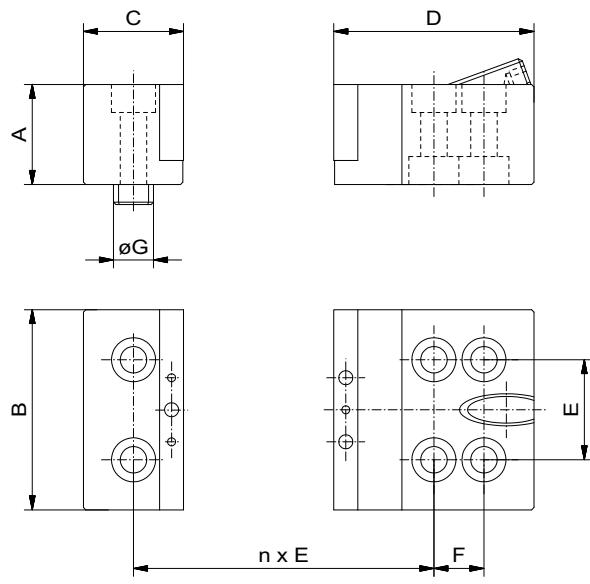

The compound resin adjusts to the contours of the workpiece

Universal Vise

2 pcs., without basic unit for mounting on base plates or grid base plates, Shift ±12,5 mm

Nr.	System	A	B	C	D	E	F	G	g
93498	AF25	25	50	25	40	25	12,5	10	296

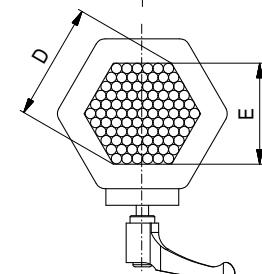

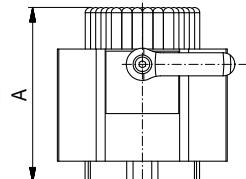

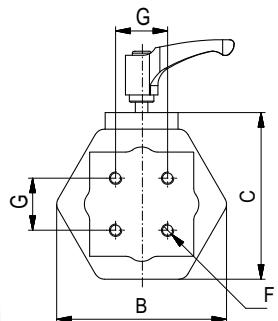

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Pin cushion

with rubberized pins

Nr	A	B	C	D	E	F	G	g
91940	84	81,5	80	55	48,5	6	25	1.400
98101	84	52	55	35	31	6	25	1.100

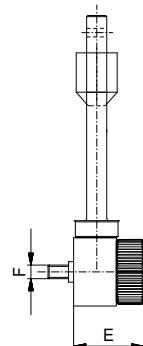

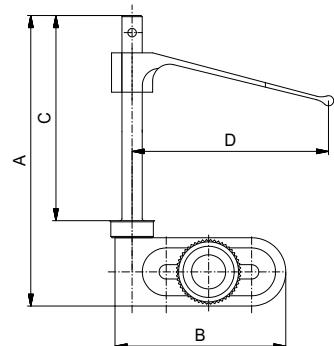

Hold-down column clamp

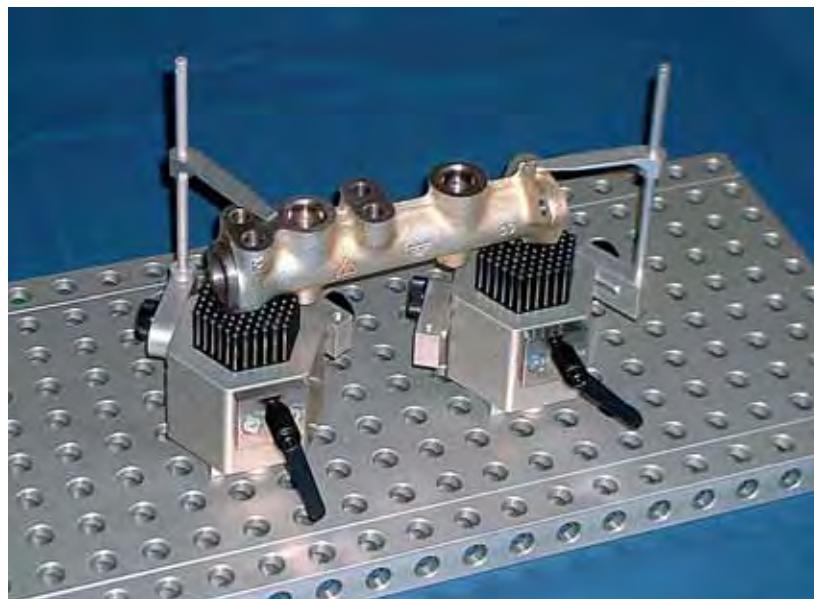

for pin cushion, in set (2 pieces)

with hold down columns and springs

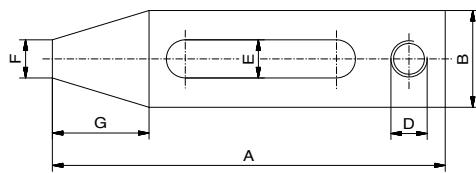

Nr	A	B	C	D	E	F	g
91941	85	50	60	57,5	20,5	M4	80

Easy to move pins adjust to shape of workpiece.
Then by using a locking device the resulting imprint is secured into place.
This enables repeatable clamping of workpieces, that can be secured with hold down springs and studs.

ALUFIX Hook Clamps

Hook clamps are used when workpieces with a hole (especially on the inside of a workpiece, where it is difficult to clamp conventionally) have to be positioned and clamped simultaneously. They are usually connected by means of a contour block but they can be mounted directly to Alufix.

How to order:

Hook clamps are individually manufactured for every hole or press cut and comprise of four parts:

- ① Basic unit
- ② Top pin
- ③ Support ring
- ④ Hook (optional two hooks)

When ordering a hook clamp please attach a 1:1 section drawing of the support with details of the center pin diameter and the shape of the bore (round or oval). Further we need details of clearance behind the hole, metal thickness, collar height and direction in which part has been stamped

When ordering basic unit please also state required hook size
See also our download inquiry form under www.alufix.de/downloads

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

i Internal excenter lever, top pin and support ring are 100% compatible (outer dimensions same as existing hook clamps). Sideways activation possible via hex key

i Other dimensions on request

Picture shows high base unit version #281887. Special lengths on request

Tolerances in workpiece thickness of up to +/- 0,3mm are evened out. Fast adjustment according to workpiece thickness possible. More space between operating lever and clamping surface = more freedom of movement and less part collision due to horizontal lever movement. Hook alignment independent of lever orientation, infinite rotary movement 360°. Support ring infinite rotary movement 360°.

Pneumatic hook clamps

customized versions

Characteristics

- Independent centering via springs
- Operation with compressed air
- Programme controlled
- Optimal part recognition via sensor
- Final position query at pneumatic cylinder via proximity switch
- Operating pressure 6 bar

ALUFIX CLASSIC Connection Elements

A variety of elements allows combination of Alufix components whenever two opposite holes, or a hole and a nub are to be connected. This works also between different system sizes using reducer sleeves.

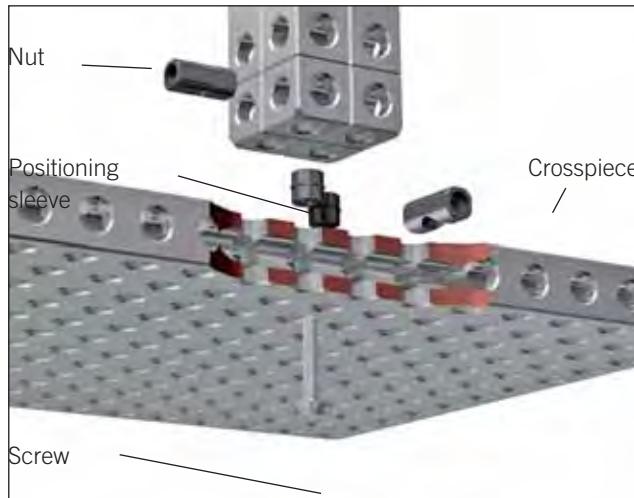

Quick connection

For fast, constantly changing fixtures we recommend using quick connection elements.

A twin bolt is positioned between Alufix elements to be connected. An eccentric slot on the lock slides round and grips the head of a twin bolt resulting in a tight connection.

Recommended torque must be adhered to otherwise head of twin bolt may be damaged.

Screw connection

For lasting tight connections the screw connection has proved to be the best.

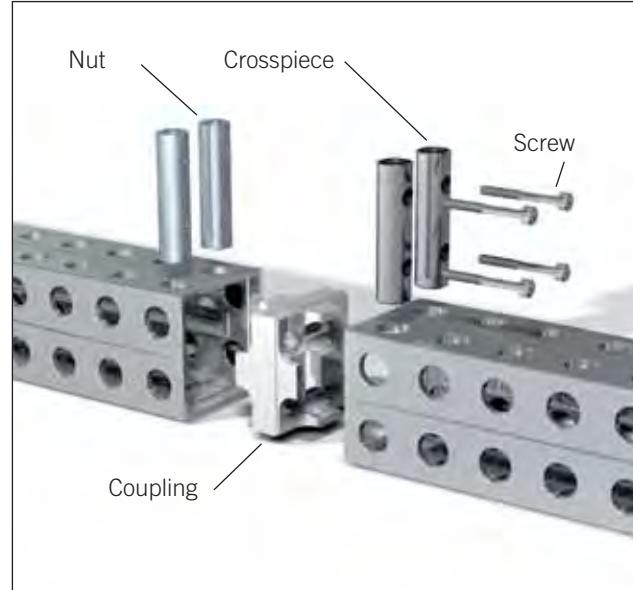

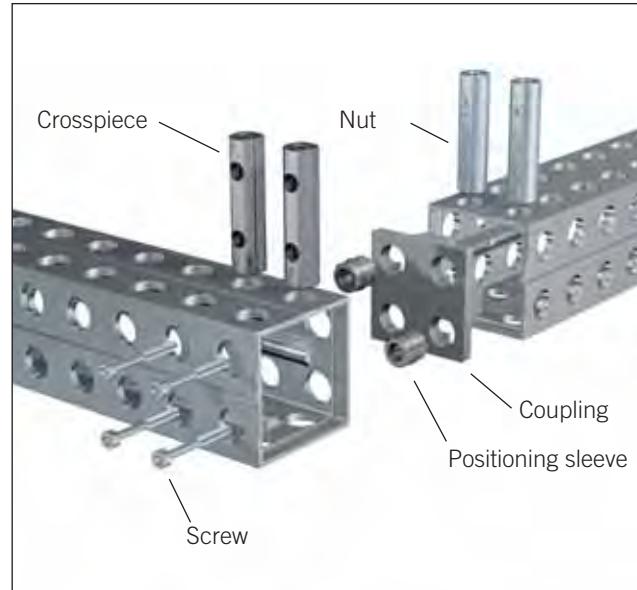

Connecting different system sizes

Alufix elements in different system sizes are connected using

- Reducer sleeves
- Reducer bolts

Connecting with couplings

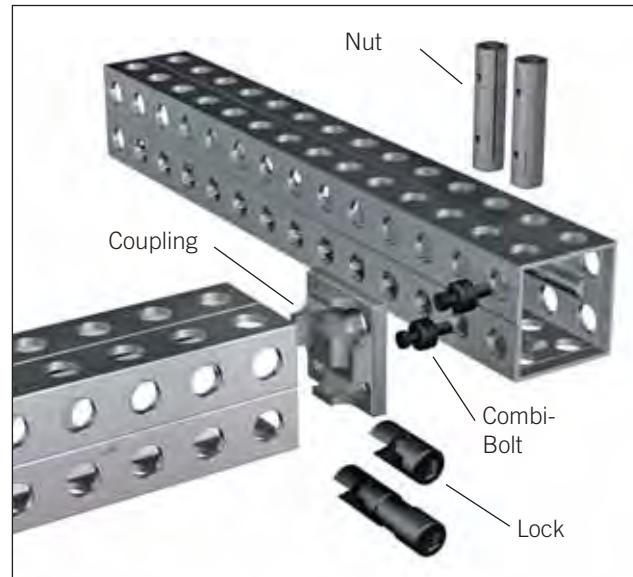

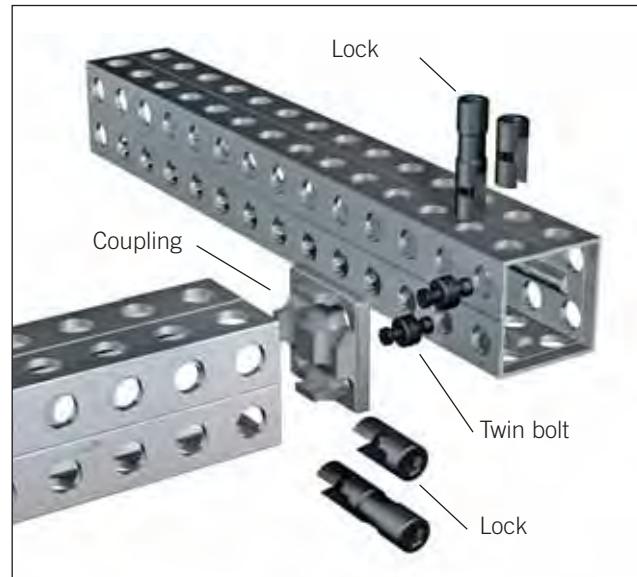

Single coupling with screw connection

is used in face ends of Light bars for accurate positioning of further elements. Picture shows assembly using screw connectors

Double coupling with screw connection

is used for centering two Light bars end to end. Picture shows assembly using screw connectors, quick connectors are also possible.

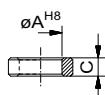

Single coupling with quick connection

is used in face ends of Light bars for accurate positioning of further elements. Picture shows assembly using quick connectors

Single coupling with screw/quick connection (combi bolt)

is used for centering two Light bars end to end. Picture shows assembly using screw and quick connectors.

Picture shows a screw connector with positioning sleeves which fit into Alufix bores

Classic version: Ideal for modular fixturing for fast easy handling

ECO version: Ideal for dedicated fixtures, without wear reducing helicoil inserts and without threaded hole for positioning rod

Standard thread sizes are printed in **bold** print

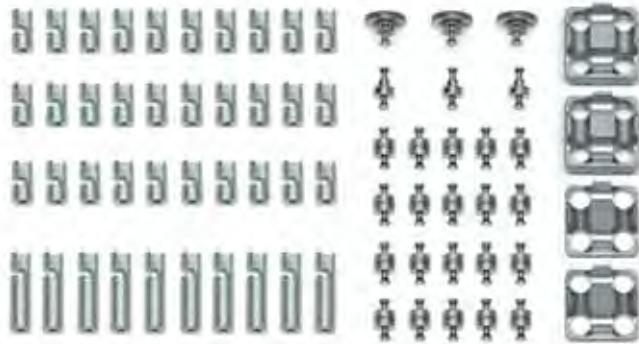

Quick connection set, AF 16, small

82672, (36-pcs.), 160g

comprising of:

Nr.	Pcs	Name
23250	20	Lock, short
23247	10	Twin bolt
23249	3	Combi bolt
23252	3	Bolt disk

Quick connection set, AF 25, large

81285, (70-pcs.), 1274g

comprising of:

Nr.	Pcs	Name
23240	30	Lock, short
23246	10	Lock, long
23223	20	Twin bolt
23228	3	Bolt for bar 1D
23239	3	Bolt disk
23330	2	Coupling, double
23325	2	Coupling, single

Quick connection set, AF 25, small

82673, (36-pcs.), 1000g

comprising of:

Nr.	Pcs	Name
23240	20	Lock, short
23223	10	Twin bolt
23225	3	Combi bolt
23239	3	Bolt disk

Quick connection set, AF 40, large

81516, (70-pcs.), 5020g

comprising of:

Nr.	Pcs	Name
23260	30	Lock, short
20385	10	Lock, long
23257	20	Twin bolt
23258	3	Bolt for bar 1D

ALUFIX

Tools

Alufix tool sets comprise of high quality components and are ideal for using with Alufix connecting elements.

#81492 Tools

Alufix 16 (5-pcs), comprising of:

Nr.	St.	Name
80622	1	Positioning rod
81175	1	Extended hex key WAF 3
54902	1	Pin spanner 14/17
81118	2	Key for knurled profiles 32/42

#81493 Tools

Alufix 25 (10-pcs), comprising of:

Nr.	St.	Name
80534	1	Positioning rod
80520	1	Handle 112,5
80521	2	Extension 150
10523	1	Hex insert bit WAF 3
10522	1	Hex insert bit WAF 4
10521	1	Hex insert bit WAF 5
21820	1	Pin spanner 14/17
81118	2	Key for knurled profiles 32/42

#81494 Tools

Alufix 40 (10-pcs), comprising of:

Nr.	St.	Name
80535	1	Positioning rod
80439	1	Handle 112,5
80435	1	Extension 200
80437	1	Extension 300
10484	1	Hex insert bit WAF 6
10485	1	Hex insert bit WAF 8
10486	1	Hex insert bit WAF 10
21820	1	Pin spanner 14/17
81118	2	Key for knurled profiles 32/42

#82263 Tools

Alufix 50 (10-pcs), comprising of:

Nr.	St.	Name
82551	1	Positioning rod
80439	1	Handle 112,5
80435	1	Extension 200
80437	1	Extension 300
10484	1	Hex insert bit WAF 6
10485	1	Hex insert bit WAF 8
10486	1	Hex insert bit WAF 10
27931	1	Pin spanner 17/23
81118	2	Key for knurled profiles 32/42

Torque wrench

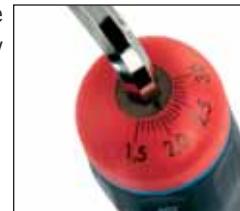

with adjustable torque incl. hex key
and 3, 4 and 5 mm bits

Nr.	System	maximum torque
82840	AF 16	3N/m
98022	AF 25	5N/m

! In order to guarantee function of the quick connectors,
recommended torque should not be exceeded.

Adjust torque
with hex key

Torque wrench

with pre-set torque

Nr.	System	maximum torque
82099	AF 40	25N/m
82789	AF 50	30N/m

! In order to guarantee function of the quick connectors,
recommended torque should not be exceeded.

Tools also available separately

ALUFIX CLASSIC Starter Kits

Fast clamping with ALUFIX

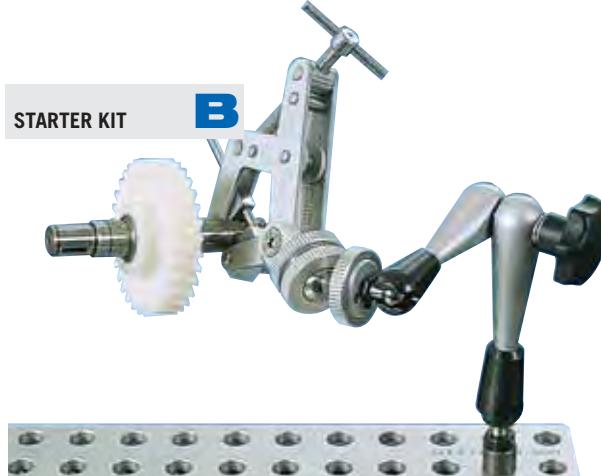

#83131

Screw clamp

with ball joint and foot plate

- max clamping width 25 mm
- extension 100 mm

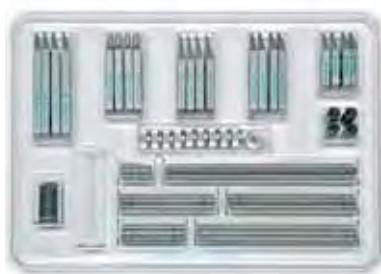

#83132

Screw clamp

with ball joint, swivel arm and screw clamp

- max clamping width 50 mm
- arm length 280 mm (2x140)
- hydraulic central clamping
- workpiece can be fixed in any position

STARTER KIT C

#81020

Clamping element set

M6, 69 Pcs

Comprising:

- 20 clamps in different shapes and lengths from 45 to 85mm
- 24 threaded rods M6 in 6 lengths from 25 to 150mm
- 4 coupling nuts, 10 knurled nuts and 10 washers

STARTER KIT D

#83134

Hold down spring

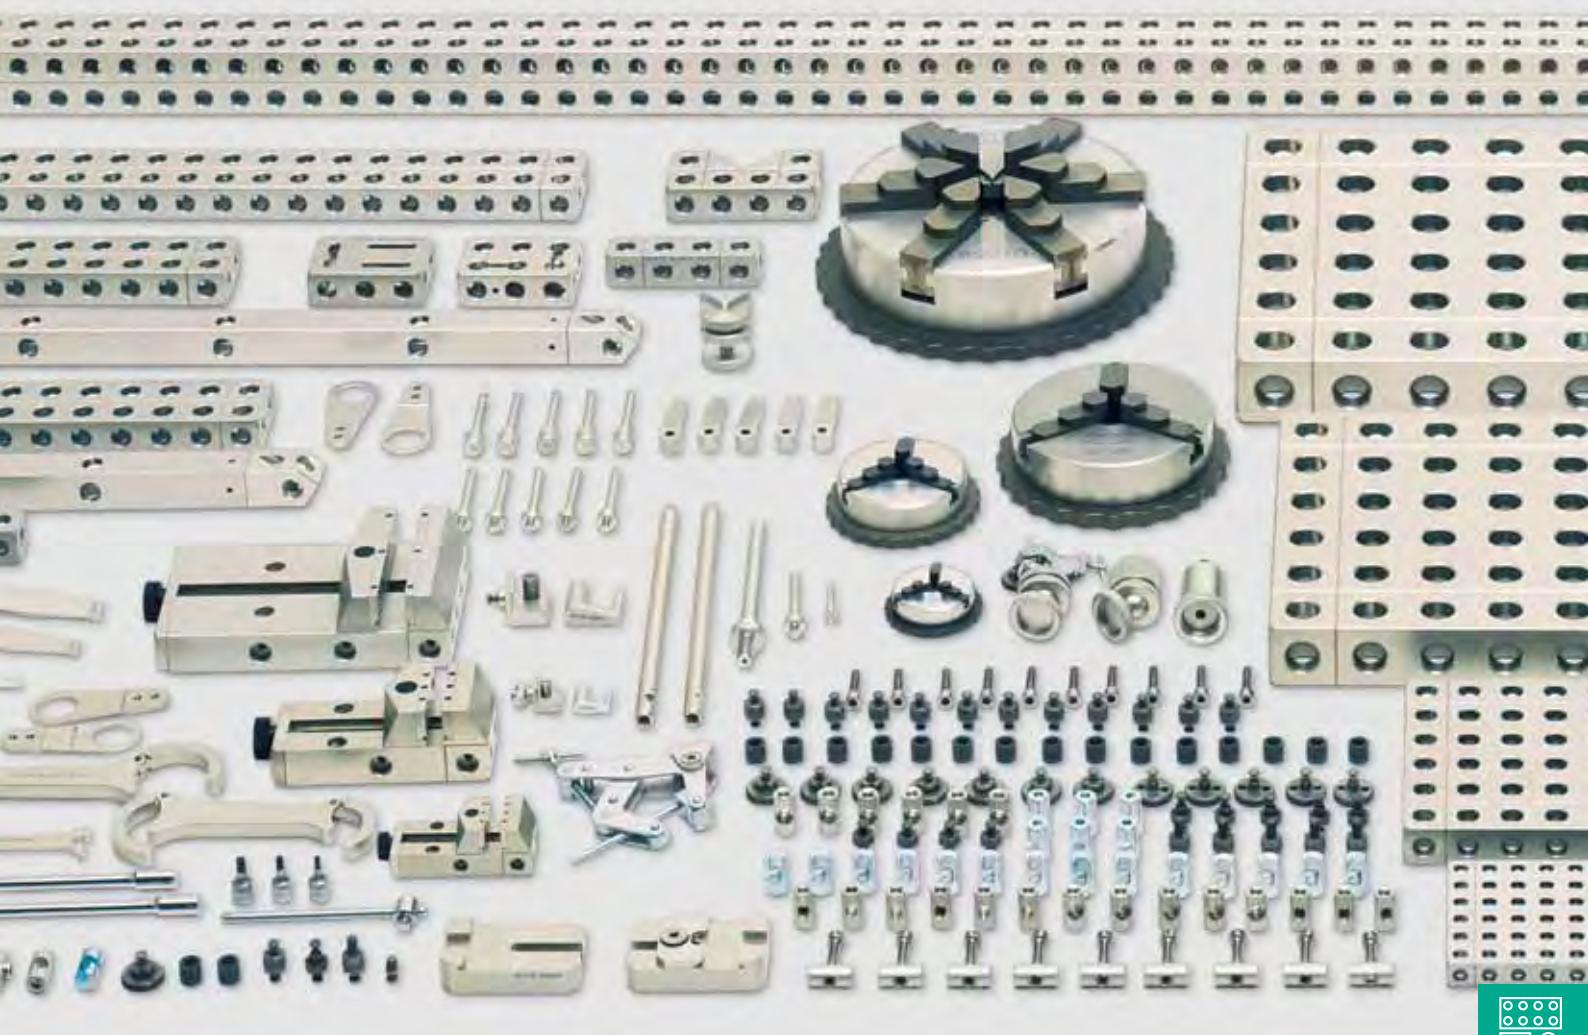

and hold down stud with M6 thread

Comprising:

- Hold down spring L=60mm
- Hold down stud L=60mm (other length on request)
- One reducer sleeve each with thread M8, M10 und M12

Workpieces and base plates shown in the pictures demonstrate application and are not included in delivery.

STARTER KIT

E

#83135

Vise**with pins, jaw width 50 mm**

- high tensile aluminium
- exchangeable jaws
- clamping width 65 mm
- optional accessories
- jaw width available from 32 up to 160 mm

STARTER KIT

F

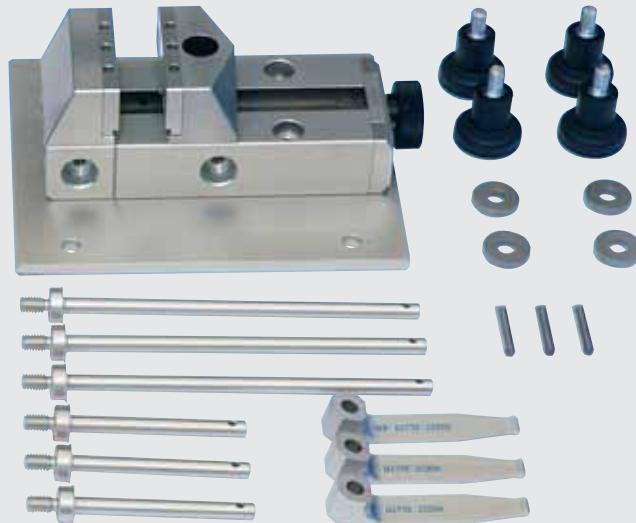

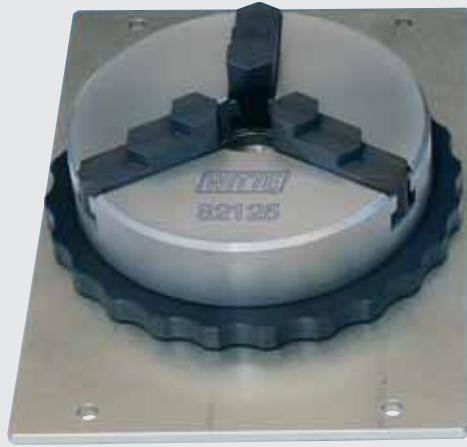

#82080

Keyless chuck**with reversible jaws, D80**

- high tensile aluminium
- centric clamping
- 3- or 6-jaw version
- optional accessories
- 6 models with diameters from 50 to 200mm

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

STARTER KIT

G

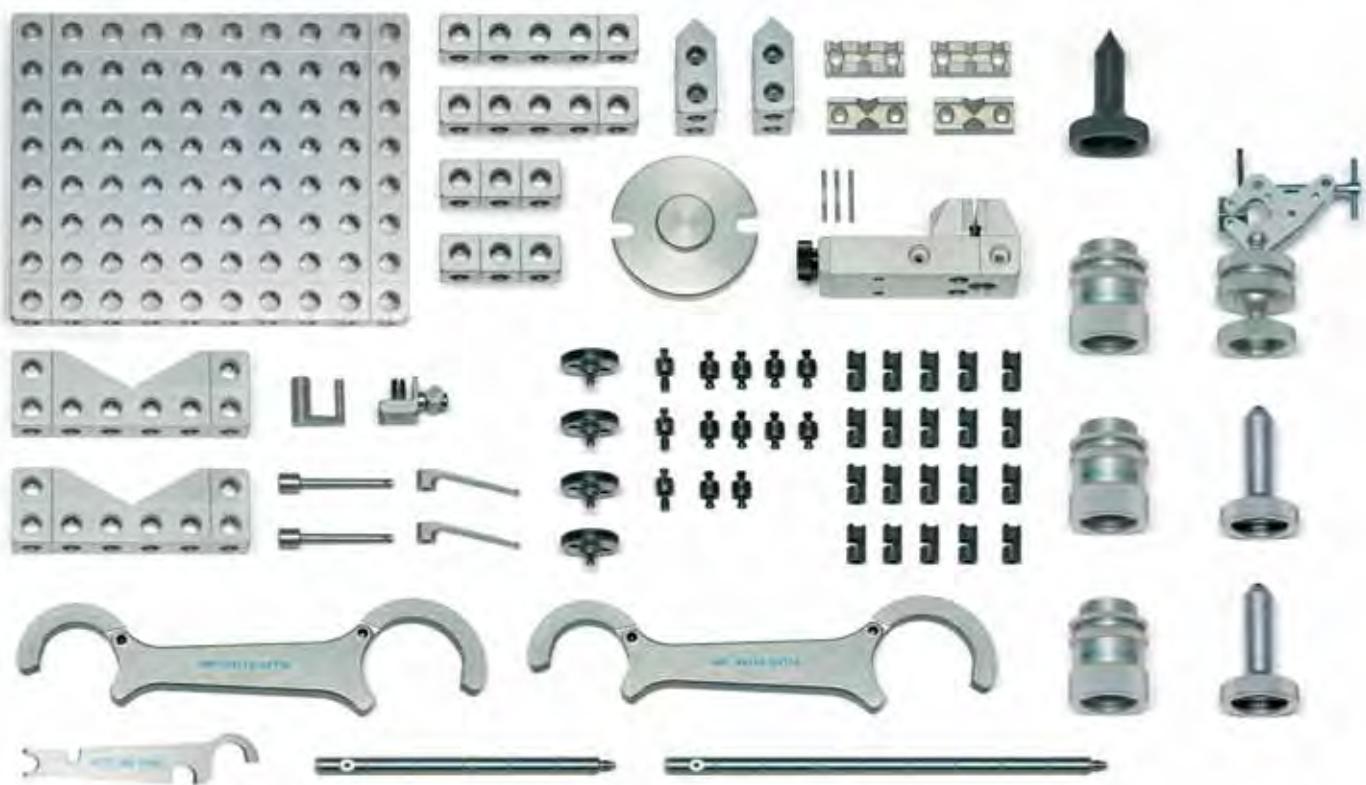

#96092 Basic Set

Clamp accessory kit for measuring machines
(23-pcs), 9,8kg

Nr.	Qty.	Name
96106	1	Keyless chuck ø125, 3 jaws
96107	1	Vise 50 AF25
24605	3	Pin for vise AF25
22258	3	Hod down spring
54766	3	Hold down stud AF25
54767	3	Hold down stud AF25
13086	4	Screw with knurled grip
21286	4	Washer ø6,4
96315	1	Storage box with inlay

Keyless chuck and vise mounted on aluminium plate

#90271 Basic Set

Alufix 16, medium (75-pcs), 2,3 kg

Nr.	Qty.	Name
21573	1	Base plate 16x96x160
21586	2	Bar 16x16x80
21584	2	Bar 16x16x48
22173	2	V Block 90°
82672	1	Quick connector set (36-pcs)
81492	1	Tools (4-pcs)
82139	3	Screw-jack h38-50
23252	1	Bolt disk with stud
21670	1	Universal plate

Nr.	Qty.	Name
21646	1	Center, long
80584	2	Center with ball
21988	2	V piece 120°
80925	1	Screw clamp w ball joint
80742	1	Winder
22274	1	Deflector
20244	2	Hold down spring
20338	2	Hold down stud
81790	1	Vise set with flat and V jaws (11-pcs)

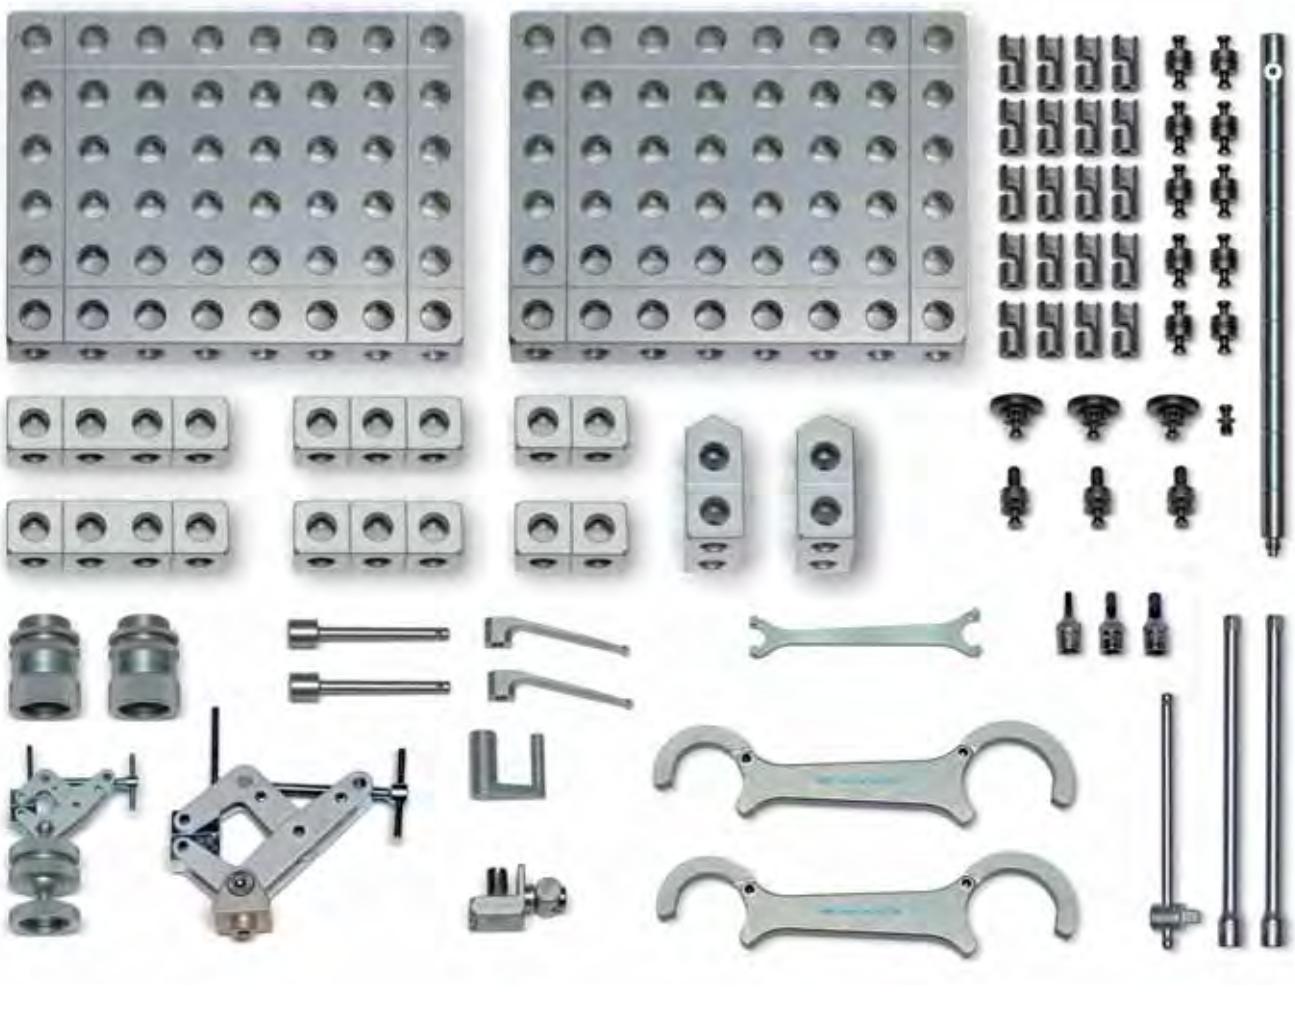

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

ALUFIXCOLOR

All Alufix basic sets are also available anodized black for use with tactile measuring systems.
Simply add -1 to the set number.

Exceptions are hard-anodized items like centres or connection elements in steel. These components retain their original colour unless specifically required and requested.

#90274 Basic Set 1

Alufix 25 (67-pcs), 4,5 kg

Nr.	Qty.	Name
21352	2	Base plate 25x150x200
21373	2	Bar 25x25x50
21374	2	Bar 25x25x75
21375	2	Bar 25x25x100
22256	2	Delta block 120° Form 3
82673	1	Quick connector set (36 pcs)
21500	1	Bolt, shortened for thread
81493	1	Tools (10 pcs)

Nr.	Qty.	Name
82139	2	Screw-jack h38-50
80925	1	Screw clamp with ball joint
80924	1	Screw clamp with joint
22258	2	Hold down spring
22260	2	Hold down stud
80743	1	Winder
22275	1	Deflector

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

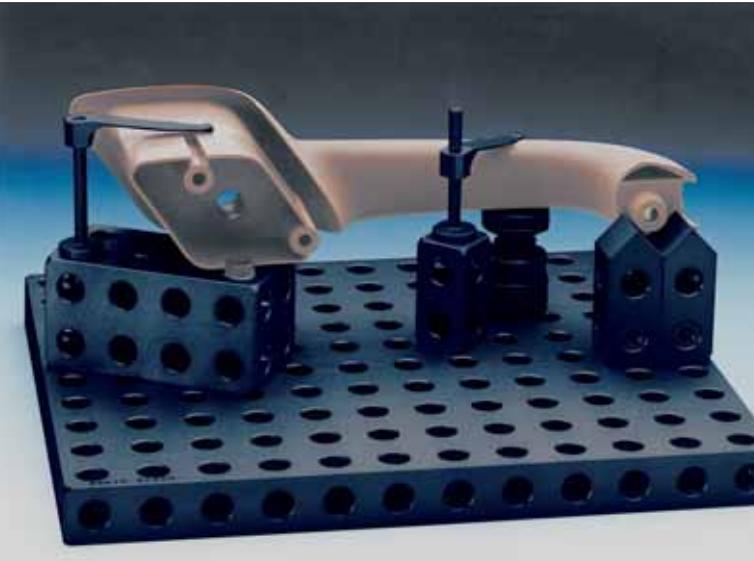

#90275 Basic Set 2

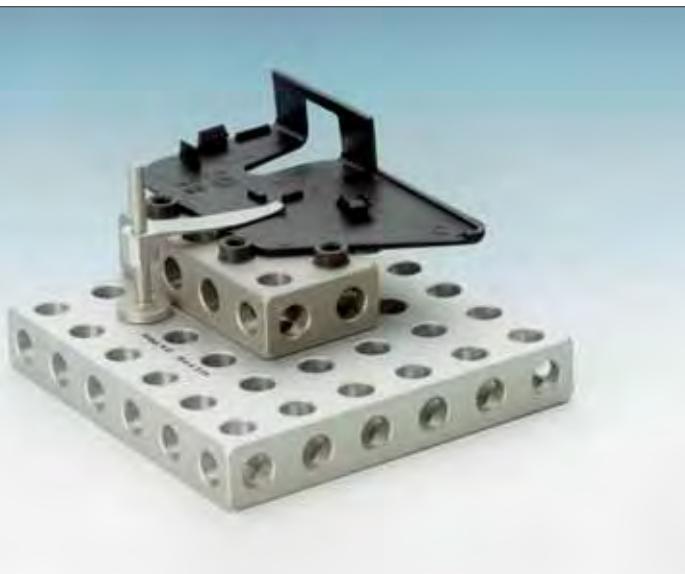

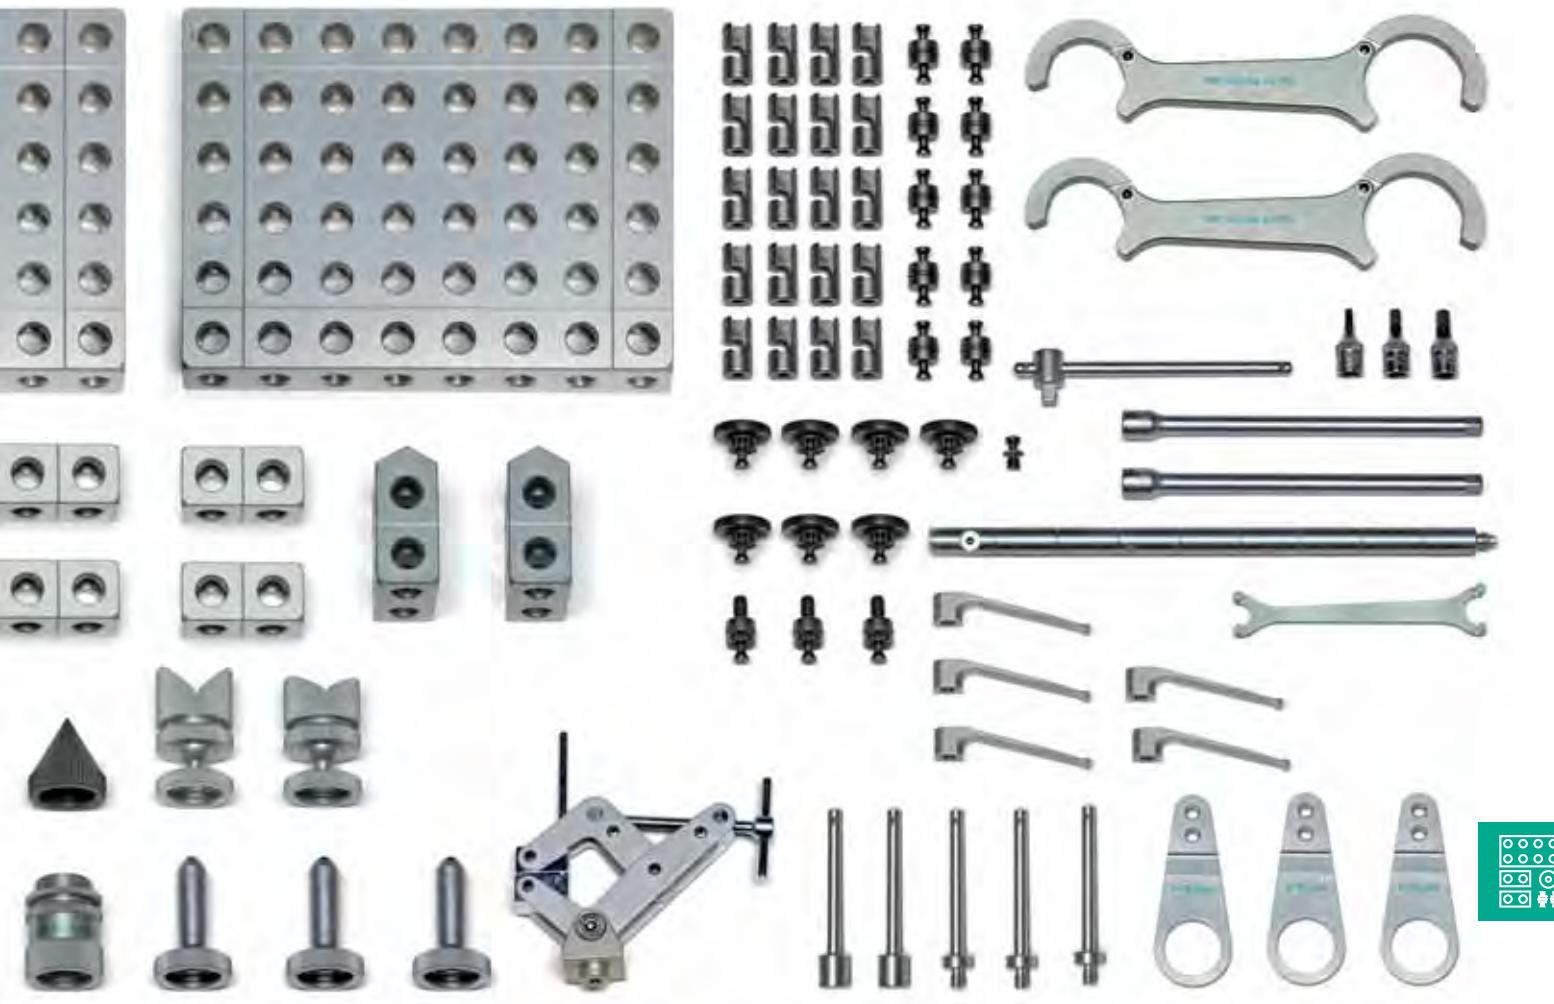

Alufix 25 (104-pcs), 5,9kg

Nr.	Qty.	Name
21352	2	Base plate 25x150x200
21373	2	Bar 25x25x50
21374	2	Bar 25x25x75
21375	2	Bar 25x25x100
21376	2	Bar 25x25x125
22256	2	Delta block 120° Form 3
82673	1	Quick connector set (36 pcs)
21500	1	Bolt, shortened for thread
81493	1	Tools (10 pcs)
82139	4	Screw-jack h38-50
23239	4	Bolt disk with stud
80924	1	Screw clamp with joint
21644	2	Center
21646	2	Center
80584	3	Center with ball
80733	1	V piece 120° with ball joint
80725	1	V piece 90° with ball joint
80925	1	Screw clamp with ball joint
81791	1	Vise Set 50mm (11 pcs)
22258	5	Hold down spring
22260	2	Hold down stud
22263	3	Hold down stud
22268	3	Traverse holder with heel
80743	1	Winder
22275	1	Deflector

Handle set up using standard Alufix Classic elements, anodized black

Workpiece set up on
screw-jacks and secured
with hold down springs

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

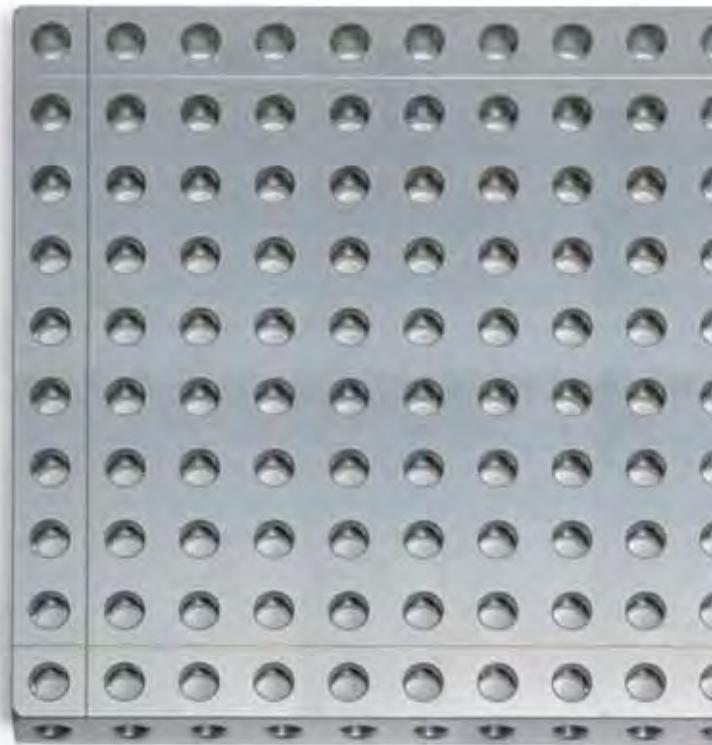

#90276 Basic Set 3

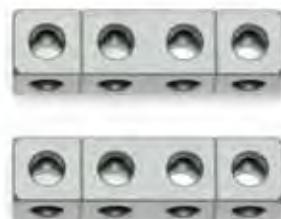

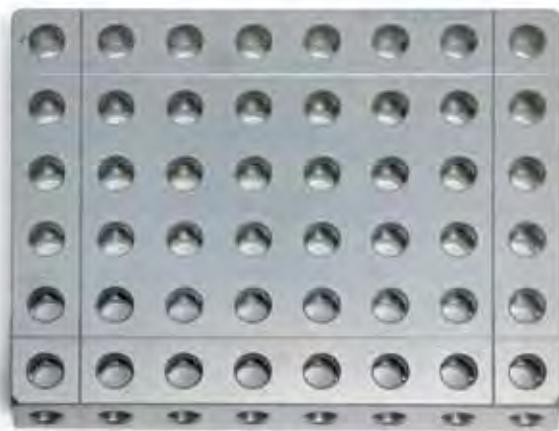

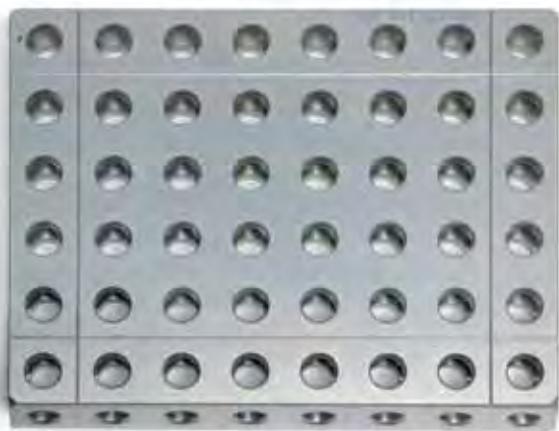

Alufix 25 (106-pcs), 12,6 kg

Nr.	Qty.	Name
21360	1	Base plate 25x250x300
22885	2	Base plate 25x50x250
21352	2	Base plate 25x150x200
21373	2	Bar 25x25x50
21374	2	Bar 25x25x75
21375	2	Bar 25x25x100
21376	2	Bar 25x25x125
22256	2	Delta block 120° Form 3
82673	1	Quick connector set (36 pcs)
21500	1	Bolt, shortened for thread
81493	1	Tools (10 pcs)
82139	4	Screw-jack h38-50
23239	1	Bolt disk
80925	2	Screw clamp with ball joint
21644	2	Center, short
21646	2	Center, long
80733	1	V piece 120° with ball joint
80725	1	V piece 90° with ball joint
81791	1	Vise Set 50mm (11 pcs)
22258	5	Hold down spring
22260	2	Hold down stud
22263	3	Hold down stud
22268	3	Traverse holder with heel
80743	1	Winder
22275	1	Deflector
80924	1	Screw clamp with joint
80584	3	Center with Ball D6/M24
12584	1	Storage case

Aluminium case #12584,
without inlays, version may be different
to case shown, included in supply free of charge

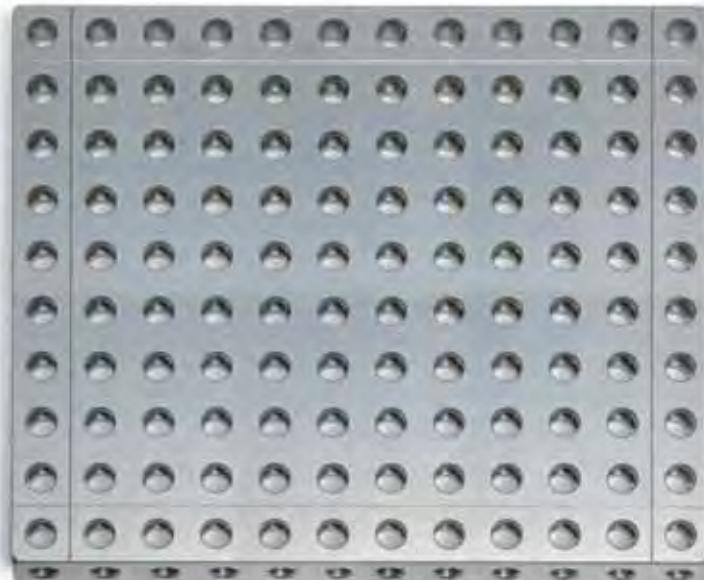

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

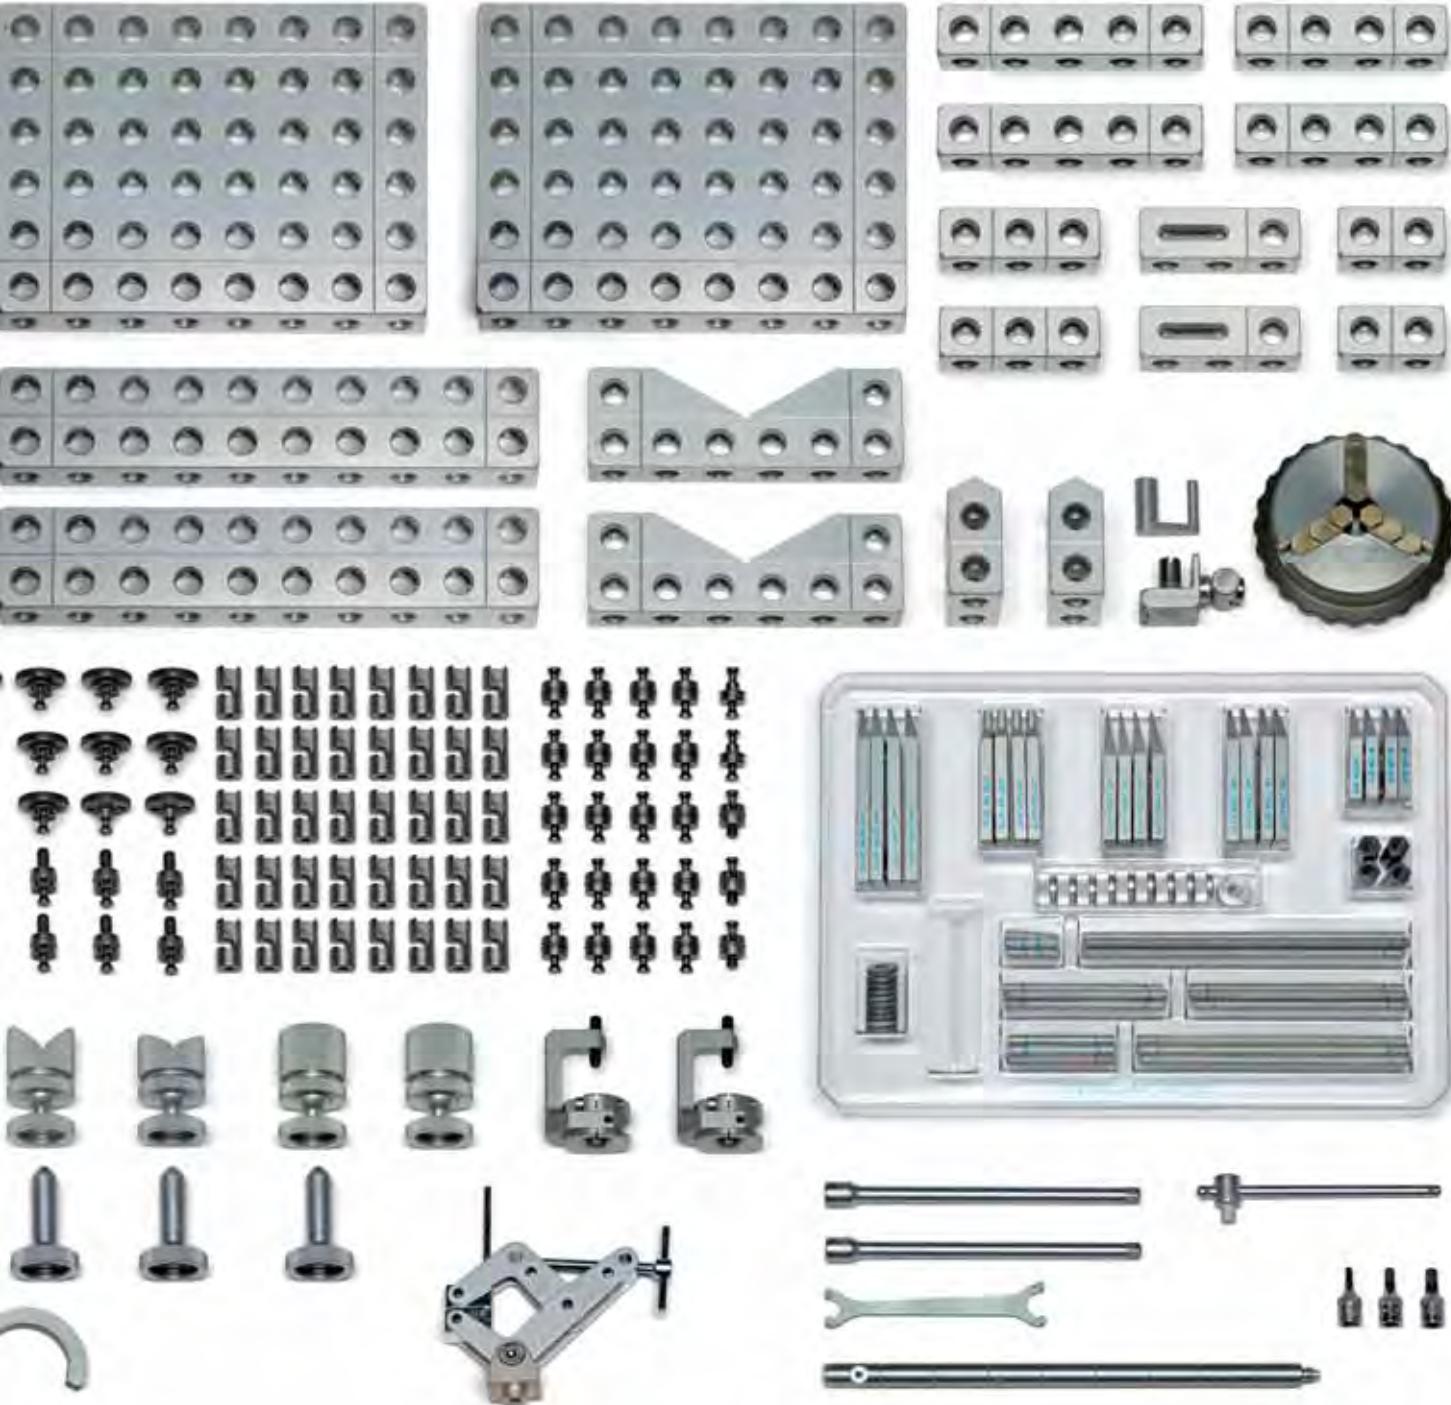

#90277 Basic Set 4

Alufix 25 (229-pcs), 15,5kg

Nr.	Qty.	Name
21360	1	Base plate 25x250x300
21352	2	Base plate 25x150x200

Workstation, metal, lockable

#282562, suitable for Basic Sets 6 and 7

H x W x D: 780 x 570 x 960

Weight unloaded approx. 85kg

Storage of Alufix components in 6 clearly laid out, spacious and fully extendable drawers, also suitable for Alufix 40 Bars 80x80.

Two top drawers are equipped with inlays for small components. Lower drawers equipped with non-slip mats.

Load capacity per drawer 75 kg

Mobile measuring units see page 234

Workstation, metal, lockable

#282727, suitable for Basic Sets 9 and extension sets

H x W x D: 780 x 570 x 1030

Weight unloaded approx. 88kg

Storage of Alufix components in 6 clearly laid out, spacious and fully extendable drawers, also suitable for Alufix 40 Bars 80x80.

Additional storage compartment mounted at rear for safe storage of long bars and profiles 50x50.

Two top drawers are equipped with inlays for small components. Lower drawers equipped with non-slip mats.

Load capacity per drawer 75 kg

Storage compartment

#51753 for storage of long bars 50x50

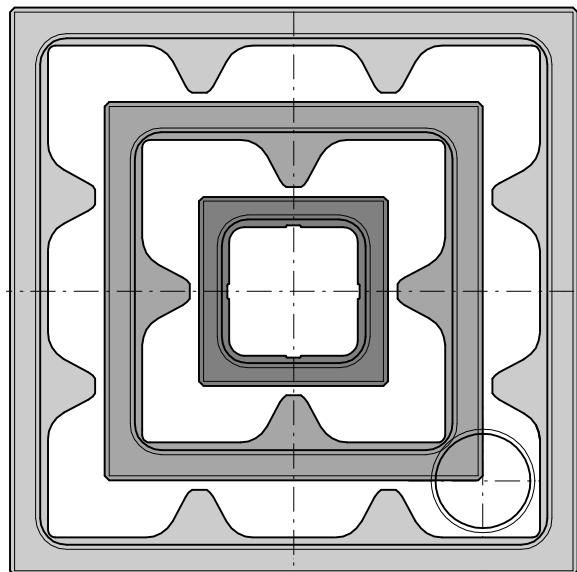

H x W x D: 660 x 480 x 68 mm

Storage of long bars in 6 pockets.

Assembly on rear of workstation with M8 screws included in supply.

Workstations and sets are packed and shipped as two separate units

Profile in original size ALUFIX ECO

ALUFIX ECO

ALUFIX ECO is a product for use where highest accuracy is not required but where all other economics aspects - ECO - play a bigger role. ALUFIX ECO is fully compatible with all other Witte systems on the market, it makes full use of the spectrum of technological functions and properties. ALUFIX ECO is available in standard lengths from stock

 Connection elements for ECO are shown on page 158

ALUFIX ECO elements can be anodized in different colours. The colour natural (-E) is standard, blue (-E2) is available as an alternative. Black (-E1) and other colours on request

Light bars one row

ALUFIX ECO Light bars are suitable for medium to large fixtures as basic frame material and also for connections direct to the workpiece.

They can be connected using the bores on all 4 sides with quick

or screw connectors, ECO couplings (page 196/197) are used for the face ends.

Light bars two row

ALUFIX ECO Light bars are suitable for medium to large fixtures as basic frame material and also for connections direct to the workpiece.

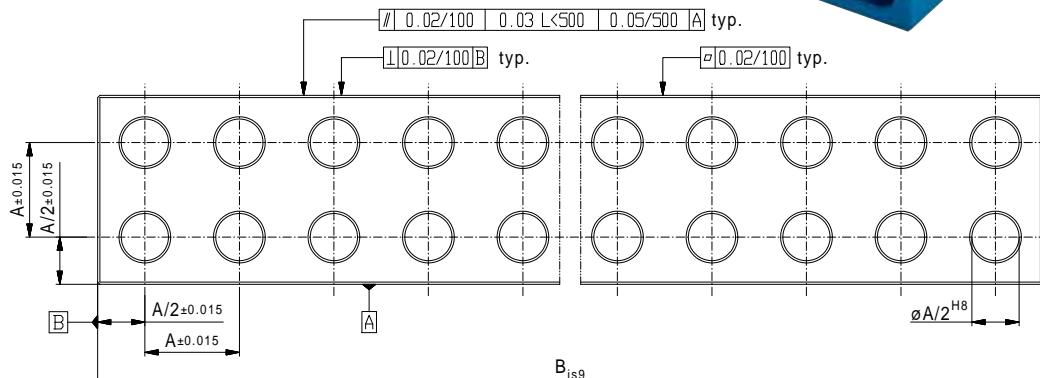

They can be connected using the bores on all 4 sides with quick

or screw connectors, ECO couplings (page 196/197) are used for the face ends.

Light bars CX/SX

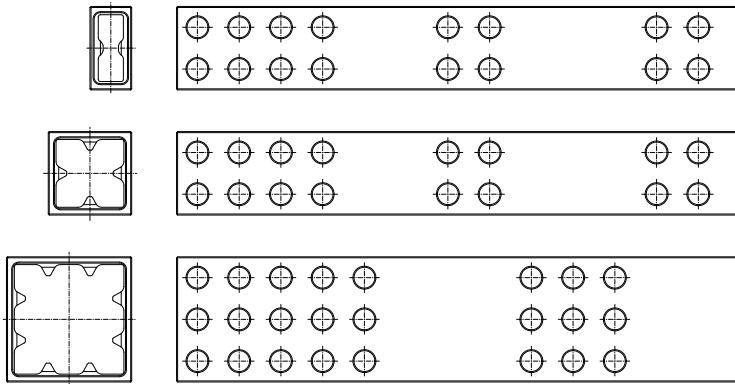

ALUFIX ECO

Alufix ECO Light bars CS/SX with reduced number of drilled holes are an economical alternative to normal ECO Light bars. Alufix ECO Light bars CX/SX are available on request in the same dimensions as normal ECO Light bars, pages 20-27.

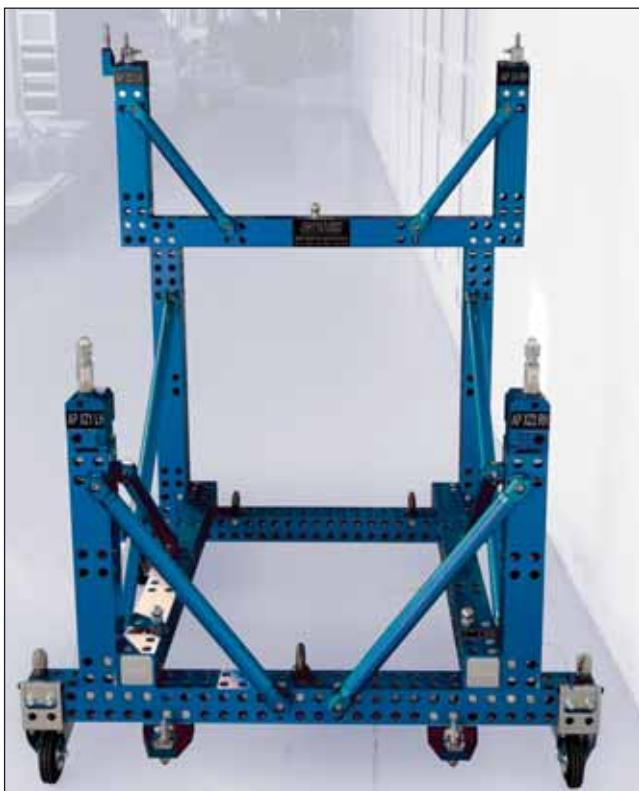

Light bars CX: For column type design with one row of holes at each end.

With further rows of one hole to mount struts depending on the length

Light bar SX: Version with dedicated areas of holes

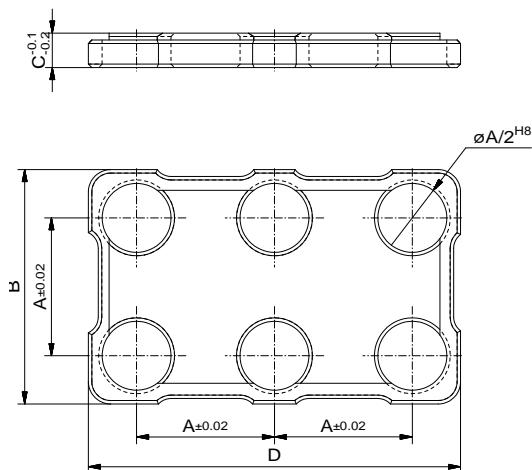

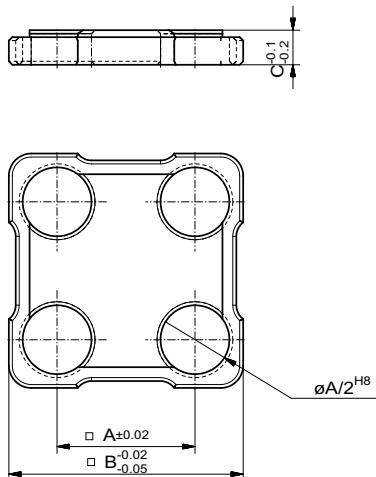

ALUFIX ECO elements can be anodized in different colours. The colour natural (-E) is standard, blue (-E2) is available as an alternative. Black (-E1) and other colours on request

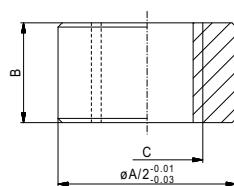

Light bars CX/SX are also available in Classic version, see page 29. Other dimensions on request

Peelable shim foil

for gaps between bars, in various thicknesses. Comprises of 0,05mm thick laminated alu-foils. The easy process of peeling with a knife can be carried out on the spot when spacers are required.

The advantages:

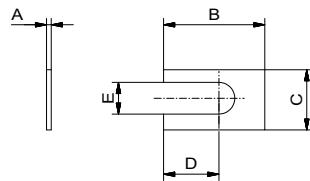

- Tolerances are evened out making remachining jobs such as milling, grinding etc. unnecessary
- Reduces setting up times
- Reduces amount of machining required

Shimfoil type 1 or 2

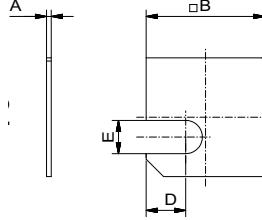

peelable, in 0,05mm layers, for setting of adjustment blocks

ALUFIX ECO elements can be anodized in different colours. The colour natural (-E) is standard, blue (-E2) is available as an alternative. Black (-E1) and other colours on request

All sandwich plates are tested and optimized for capacity and rigidity according to FEM analysis

Witte FixBase®

Base plates and positioning systems

■ Accurate and very rigid Sandwich plates are used as bases for measuring or holding fixtures, as a cantilever for CMM measuring surfaces or as transport plates. They offer highest rigidity but are comparatively lightweight

■ Sandwich plates can be used vertically or horizontally.

■ Different types available
- 2 (rib), 4 and 5 (standard)

■ According to customer request plates are available with natural or black anodized surface, hard coating is also possible.

■ Whether extremely lightweight and economical or very accurate and demanding one of our options will suit your company's needs. Almost any type of grid can be integrated into the plate surface/s.

■ Important accessories to large plates are PWS (Precision Witte System) or PPS (Precision Positioning System) quick clamp systems. These are systems integrated into the plate to allow quick, accurate and repeatable positioning of sub-plates or adapter plates onto the Sandwich plate.

■ Optional accessories i.e.

- Cable/radio remote control
- Camera
- Position sensors
- Visual and acoustic warning signals
- Laser-scanner to monitor area of movement

As well as special versions such as

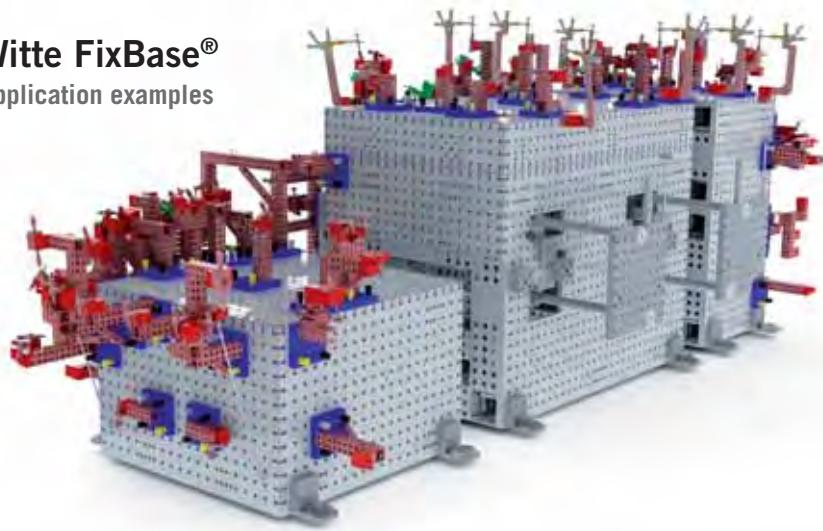

- Contoured plates which fit to work piece, also three dimensional plates
 - Contoured plates which fit to work piece, In segments or modular
 - Mounted with moveable surface plates
 - With integrated scissor trolleys
- are available on request

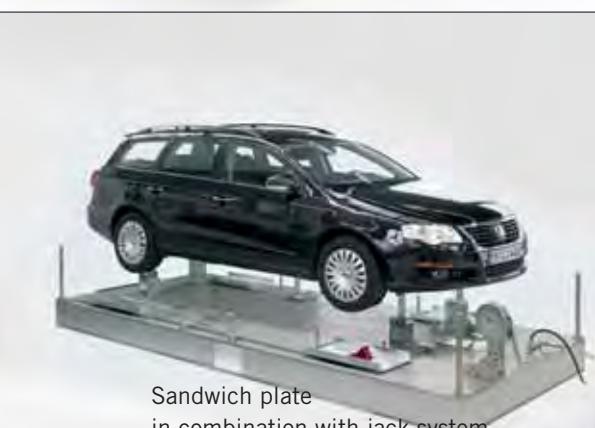

Vertical sandwich plate with hovercraft

Top and bottom plates are connected with right angled profiles laid cross-wise inside and all round using a special adhesive resulting in a lightweight rigid sandwich plate.

FixBase Alu Sandwich Plate

Type 2

Width	Length	Thick-ness	Thickness of sur-face plate w grid	Thickness of sur-face plate w/o grid	Grid	kg
800	1200	100	20	10	100	85
1000	2000	100	20	10	100	180
1200	1800	100	20	10	100	200
1600	2400	100	20	10	100	340

Above listed dimensions are examples, please state required dimensions and grid on your inquiry.

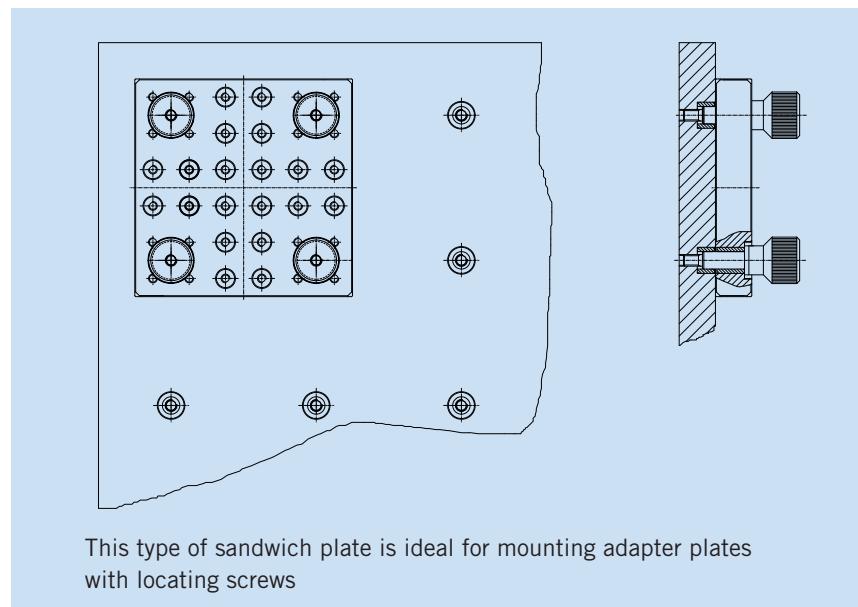

Evenness acc. to DIN 876 II Gen 3
(up to 5m x 2m, tolerances for larger dimensions on request)

Grid:

- with or without
- one or two sided
- with or without steel sleeves
- with or without threaded helicoil inserts
- PWS
- PPS

Grid tolerance JS7, total tolerance JS8
Available with higher accuracy on request

This type of sandwich plate is ideal for mounting adapter plates with locating screws

Max. Size of grid bores:
System Alufix 25, ø12,5mm / M6

FixBase Alu Sandwich Plate

Types 4 and 5, horizontal applications

Width	Length	Thick-ness	Thickness of sur-face plate w grid	Thickness of sur-face plate w/o grid	Grid	kg
1600	4000	150	25	25	100	980
2000	2000	150	25	25	100	620
2000	4000	150	25	25	100	1.220

 Above listed dimensions are examples, please state required dimensions and grid on your inquiry.

Between surface plates aluminium spacer tubes are glued using a special adhesive. This method is especially suitable for manufacturing plates with complex grids, which are used horizontally or vertically.

Type 4 is without surface protection.
Type 5 is anodized or hard anodized on request.

 Evenness acc. to DIN 876 II Gen 3 (up to 5m x 2m, tolerances for larger dimensions on request)

Grid:

- with or without
- one sided
- with or without steel sleeves
- with or without threaded helicoil inserts
- PWS
- PPS

Grid tolerance JS7, total tolerance JS8
Available with higher accuracy on request

This type of sandwich plate is suitable for example for mounting PPS adapter plates

Witte FixBase® elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

FixBase Alu Sandwich Plate

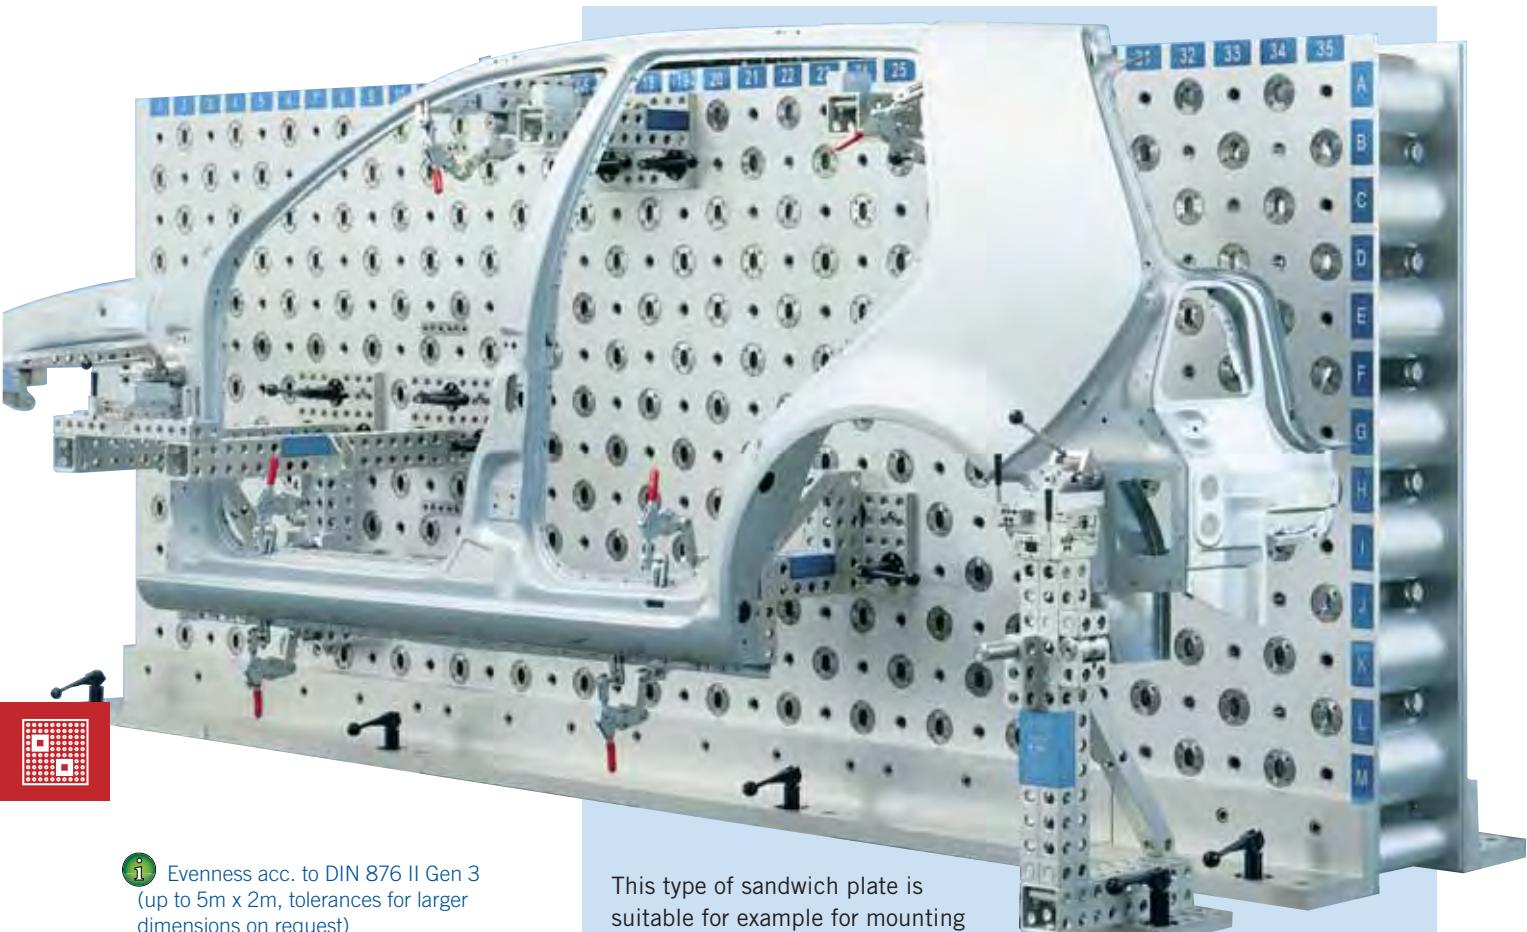

Types 4 and 5, vertical applications

Between surface plates aluminium spacer tubes are glued using a special adhesive. This method is especially suitable for manufacturing plates with complex grids, which are used horizontally or vertically.

Type 4 is without surface protection. Type 5 is anodized or hard anodized on request.

Width	Length	Thick-ness	Thickness of sur-face plate w grid	Thickness of sur-face plate w/o grid	Grid	kg
1800	3600	300	25	25	100	1.150
2000	2000	300	25	25	100	760
2000	4000	300	25	25	100	1.450

 Above listed dimensions are examples, please state required dimensions and grid on your inquiry.

 Evenness acc. to DIN 876 II Gen 3 (up to 5m x 2m, tolerances for larger dimensions on request)

Grid:

- with or without
- one or two sided
- with or without steel sleeves
- with or without threaded helicoil inserts
- PWS
- PPS

Grid tolerance JS7, total tolerance JS8
Available with higher accuracy on request

This type of sandwich plate is suitable for example for mounting PPS adapter plates

FixBase Rib Sandwich Plate

Type 2 for horizontal and vertical applications

- 30% increased rigidity with same thickness or same rigidity with less thickness
- enable more flexible design i.e. large cutouts, surface plate in sections or without bottom plate
- larger sizes and/or heavy loads
(up to 6000 x 3000mm or 2to./m²)

Dimensions on request.

Evenness acc. to DIN 876 II Gen 3
(up to 5m x 2m, tolerances for larger dimensions on request)

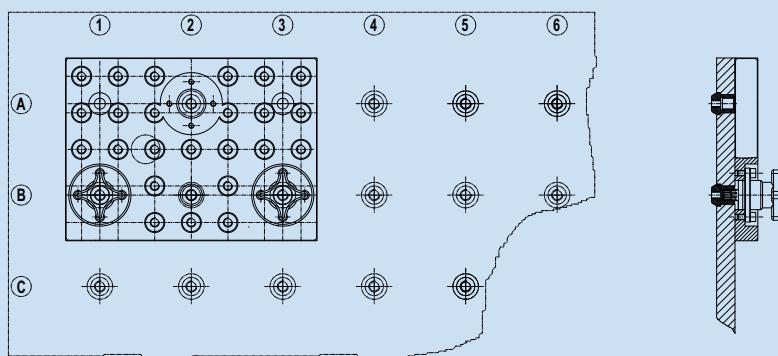

Grid:

- with or without
- one or two sided
- with or without steel sleeves
- with or without threaded helicoil inserts
- PWS
- PPS

Grid tolerance JS7, total tolerance JS8
Available with higher accuracy on request

This type of sandwich plate is suitable for example for mounting PWS adapter plates

Witte FixBase® elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Alu Sandwich Plate with hovercraft hose connected

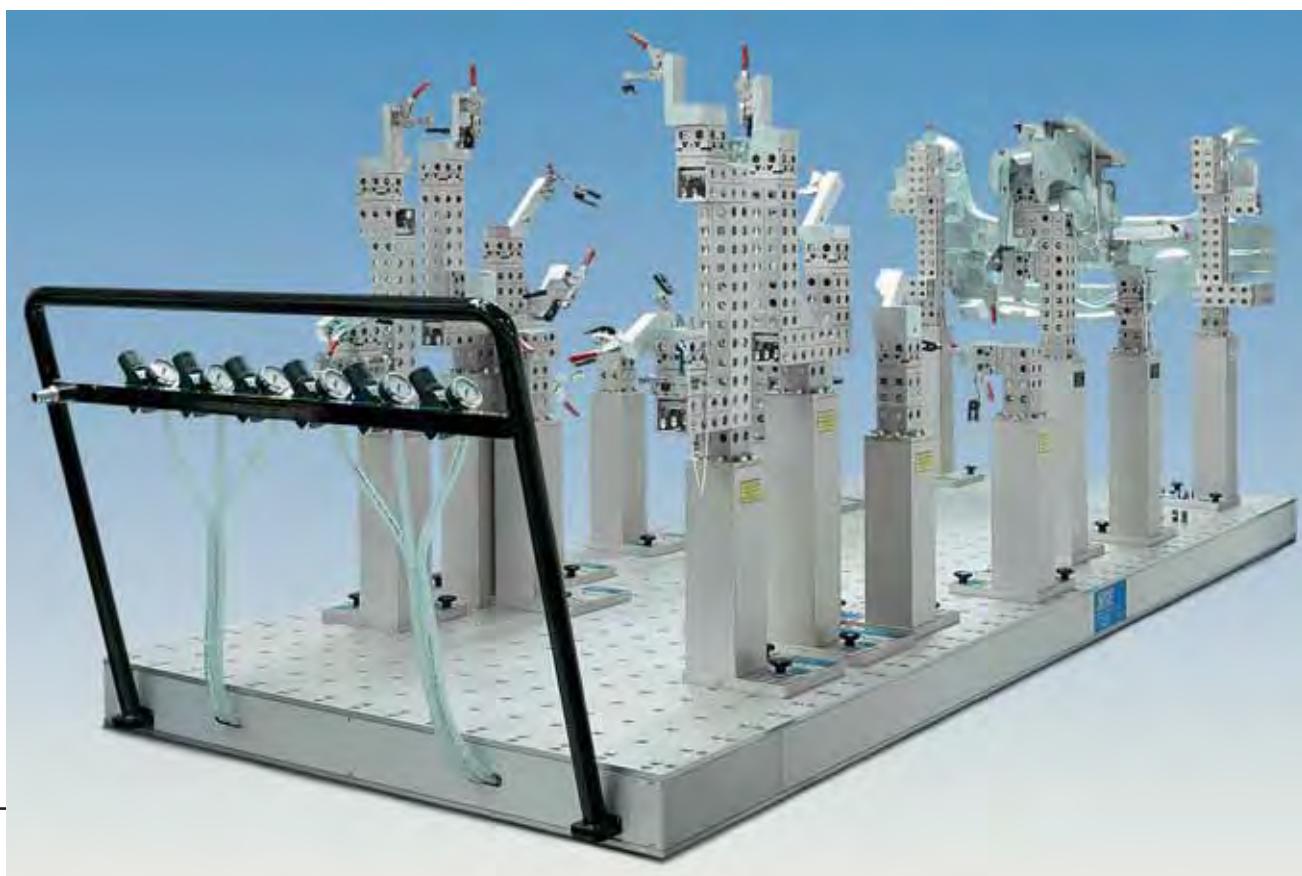

Sandwich plates can be Witte-equipped with a hovercraft cushion system. This enables easy and quick transport of the plate from loading area to checking area (CMM surface area). Even plates with heavy loads can easily be moved over cracks, seams or ridges in the floor.

Air pressure is individually regulated to adjust to irregular weight distribution guaranteeing a smooth and even ride.

For effective and problem free performance of hovercraft systems, a smooth non porous surface i.e. plastic coated, ground cement or vinyl flooring is ideal. Please contact us for specifications to ensure proper function in your facility.

Hovercraft cushion
cassette shown on
underside of plate

Alu Sandwich Plate with hovercraft

Independent, operation with integrated air tanks

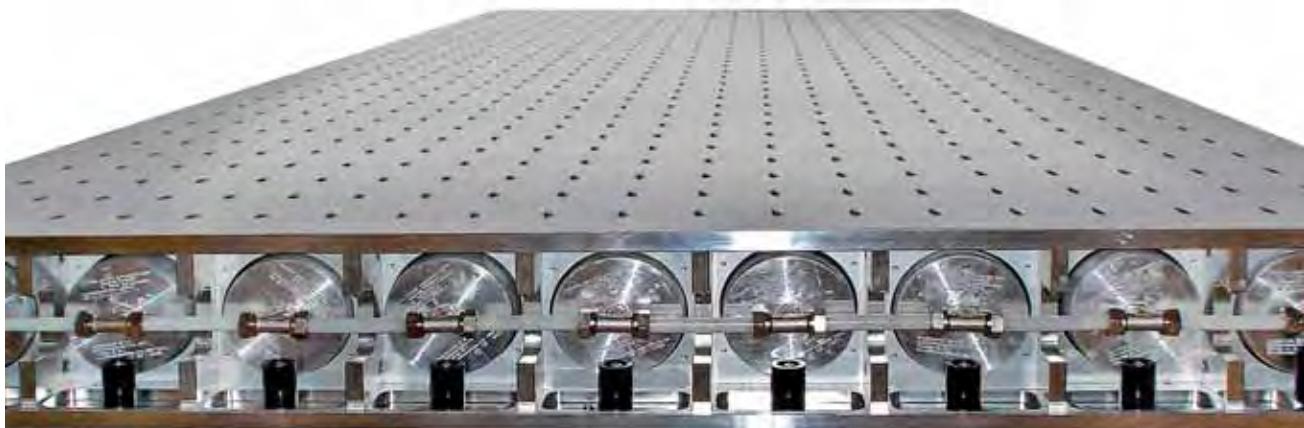

A special way of moving sandwich plates is by using intergrated air storage system. Internal pressure cylinders allow self sufficient plate movements meaning that no air supply hose is necessary. Besides increased mobility it also adds to flexibility.

The air reservoir system is designed for a drive mode for a minimum of 2 minutes. Filling up of the reservoir (max 12 bar) is completed after a short period of time. Depending on floor conditions drive mode of 2 minutes can often be exceeded.

This option for Witte Sandwich plates has to be integrated into initial design and purchase of a plate. The air storage system cannot be re-tooled or added to a plate at a later date.

 Minimum plate thickness 250mm
Reloading via normal house circuit
Low working pressure (max 20 bar)
No high pressure compressor system required

 Safe, low-maintenance and economical complete concept

 Witte FixBase® elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Alu Sandwich Plates

with friction wheel drive

Sandwich plate types 4 and 5 can additionally be equipped with electrically or pneumatically driven friction wheels
Advantages are

Secure repeatable positioning
Easy handling with no strong effort required
Drive and brake function

Further optional safety accessories

- Camera
 - Position sensors
 - Visual and acoustic warning signals
 - Laser-scanner to monitor area of movement
- Hovercraft system is a pre-requisite for this type of drive.

A direct drive as well as a hovercraft system are options for newly designed plates. Both can be integrated into plates already in use.

Electro-Mover

Shunting and drive accessory for plates without any power unit

- For moving hovercraft and roller plates
- Hooked up using ball shaped scraper
- Pull and push operation possible
- Electro drive with battery charger for up to two hours continuous use

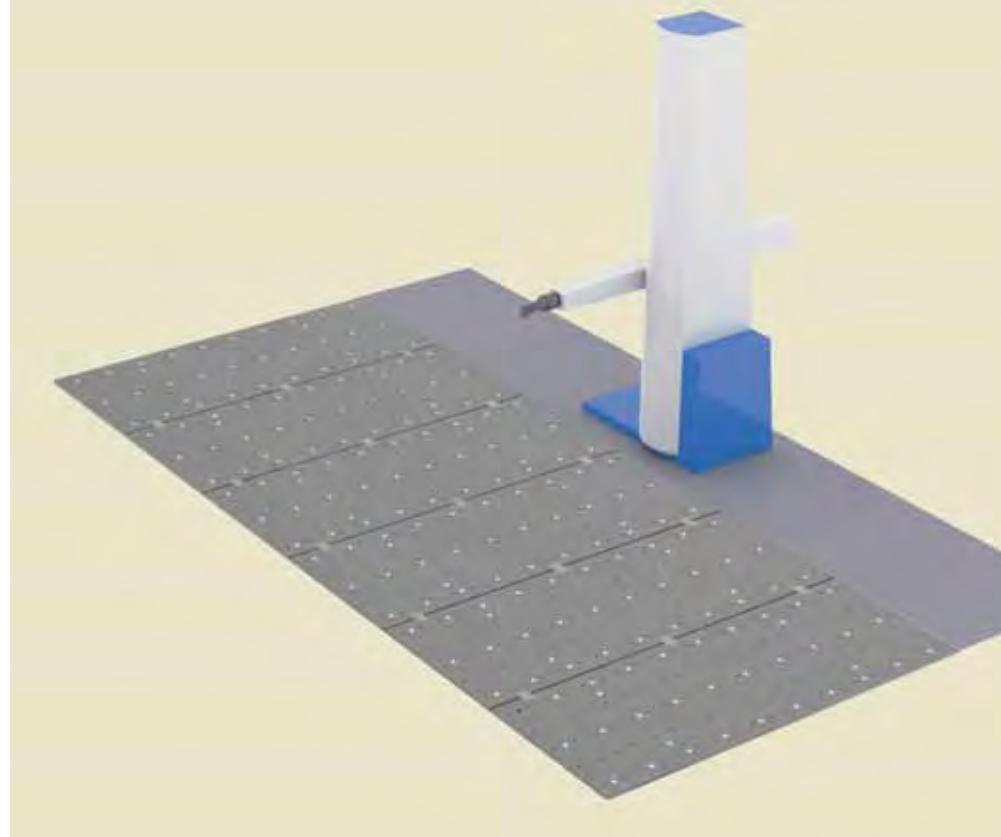

XXL – Grid plate area

Example of floor level area using grid base plates with full surface grid

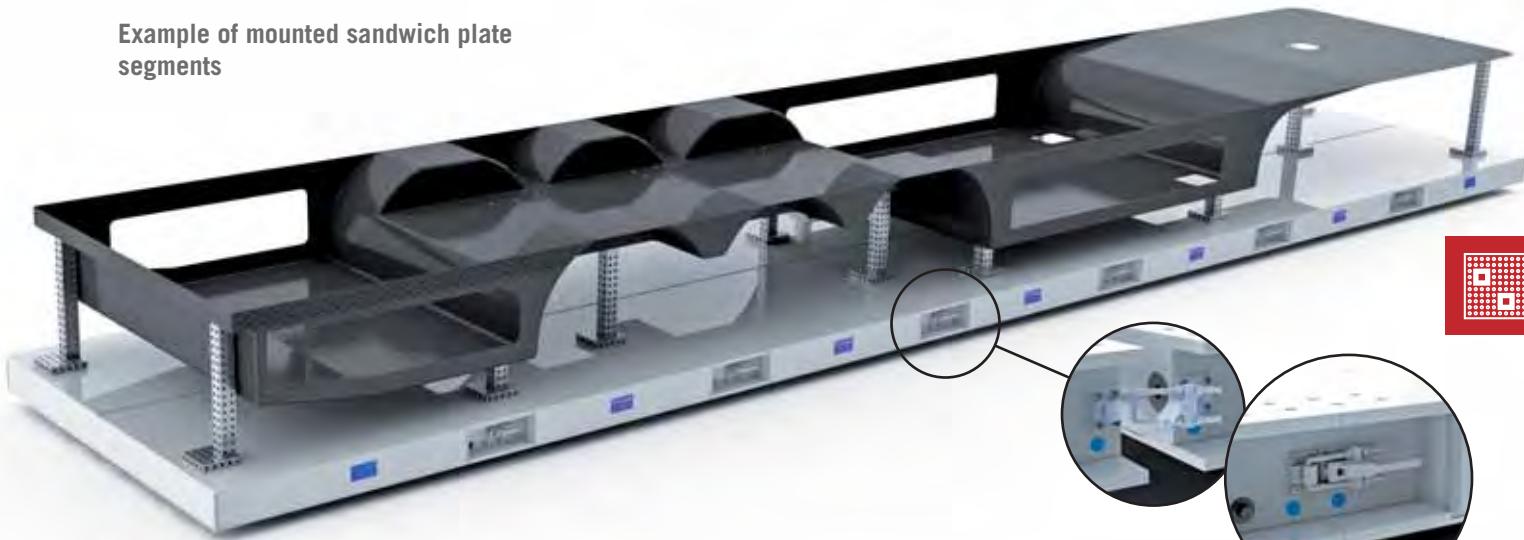

Options:

- one or more segments
- max. segment size
2000x4000 mm
- unlimited total surface area
- integrated into floor or mounted on customers CMM surface
- Single segments aligned to each other or complete surface aligned to measuring volume

XXL – Sandwich plate area

Example of mounted sandwich plate segments

Extra long, segmented (7 units) sandwich plate with a total surface area of 2,5x14m, coupled using centering pins and shackle clamps. Serves as platform for laminating CFP semi-trailer (mono-coque). Single plates coupled using centering pins and pull clamps. Can be equipped with hovercraft, provided floor surface is suitable

Witte FixBase® elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

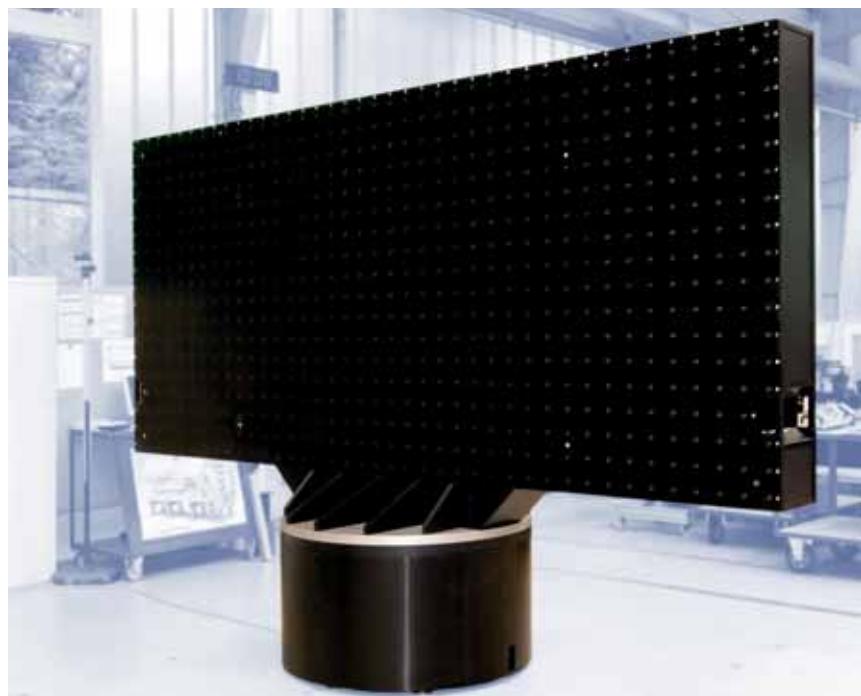

Alu Sandwich Plates

rotating

Robot measuring cell for optical measuring

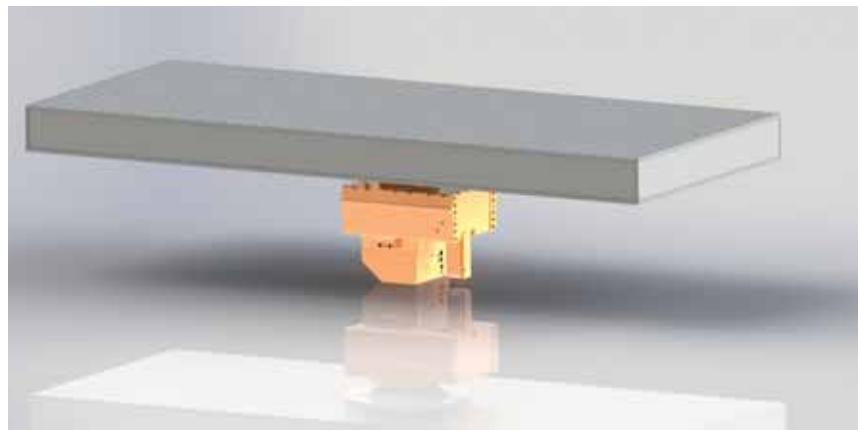

Configuration:

- 2 vertical sandwich plates mounted on rotating hovercraft supports, rotatable by 180°
- 1 stationary, horizontal sandwich plate with extended height
- On hovercraft, rotary and tact tables
- To reach both work pieces or do assembly from outside without interrupting measuring process
- Integrated safety monitoring, release switch

Vertical alu sandwich plate on hovercraft rotary table

Horizontal sandwich plate on motorized rotary table (shown without base unit). Force is directed to the rotary plate via inner plate structure

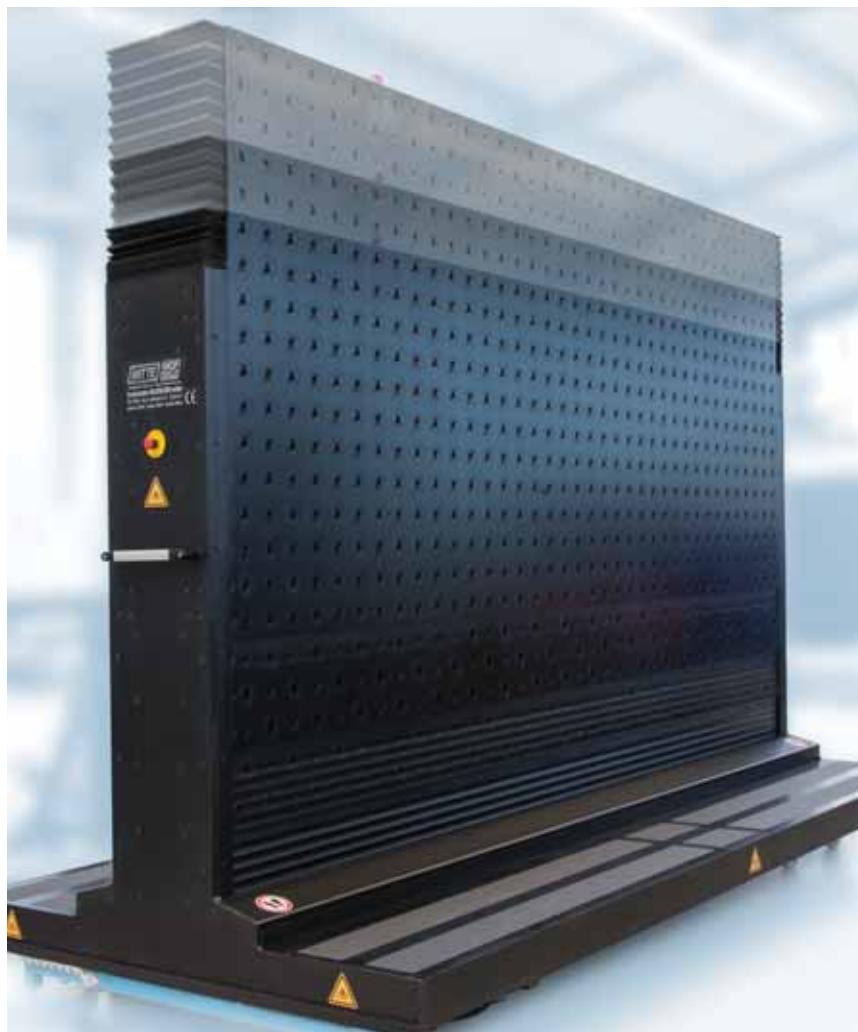

Alu Sandwich Plates

height-adjustable

Motor driven height adjustable sandwich plate for parallel use of tactile and photogrammetry measuring tasks.

Example configuration on the right:

- 750 mm lift
from 2050 to 2800 mm.
- Clamping surface on both sides
3700 x 1700 mm
- Hovercraft with direct drive
- Double sided PPS grid
- Walk-on base for easy use of plate
- Grid surface anodized black
- Equipped with safety features,
hook-eyes, emergency stop on
both face ends and allround
foot protection

Slide units

optional

Versions:

- mounted or integrated
- for vertical and horizontal sandwich plates
- mounted version possible for plates already in use
- freely selectable grid
- fixed positions using pins

Witte FixBase® Elemente können in unterschiedlichen Farben eloxiert geliefert werden. Die Farbe „Natur“ ist Standard, „Schwarz“(-1) ist alternativ lieferbar. Weitere Farben auf Anfrage

AluSandwich Roller Plate with floating heavy duty guided rollers

View from underneath

Applications:

- For uneven, porous or joined (tiled) floors
- If no air pressure is available or current operations will be adversely affected

Characteristics:

- Automatic crawl speed when reaching final position

Equipment options:

- Direct drive or E-Mover drive
- Camera with integrated screen

Control panel with camera monitor

Positioning and parking systems

for moveable alu sandwich plates

For repeatable, accurate positioning of sandwich plates in a measuring machine area we offer a positioning system which is embedded into the floor.

It comprises of Z supports, a centering unit for X and a further locating unit for XY direction.

The units are installed in the floor, anchored and covered with metal disks. The Z supports are aligned to exactly the same height, the X and XY are spaced and aligned to the length axis of the CMM. The units are so rigid, they securely and accurately position sandwich plates over a long period of time.

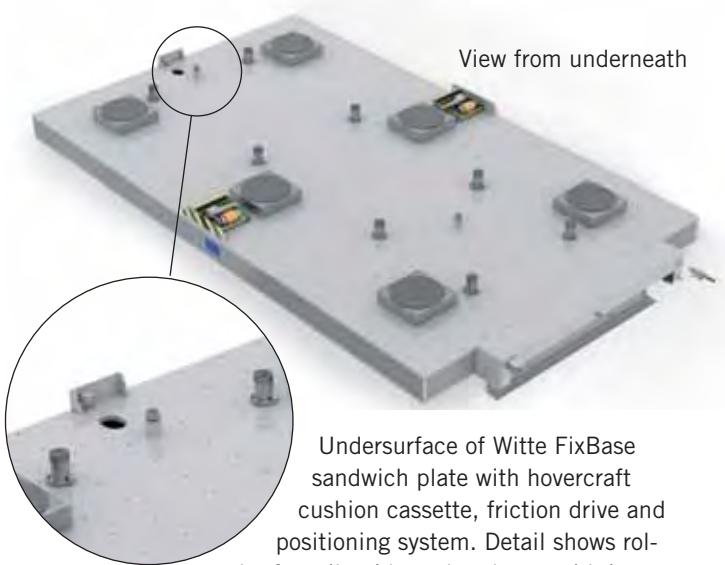

For simple and secure pre-positioning a rail guide with a centering inlet and an end stop can be installed.

For sandwich plates equipped with electric, pneumatic or hydraulic systems an energy saving automatic multi-coupling can be integrated in the end stop in plate operating position.

Monitoring of whether or where plate is located is possible using inductive gap sensors.

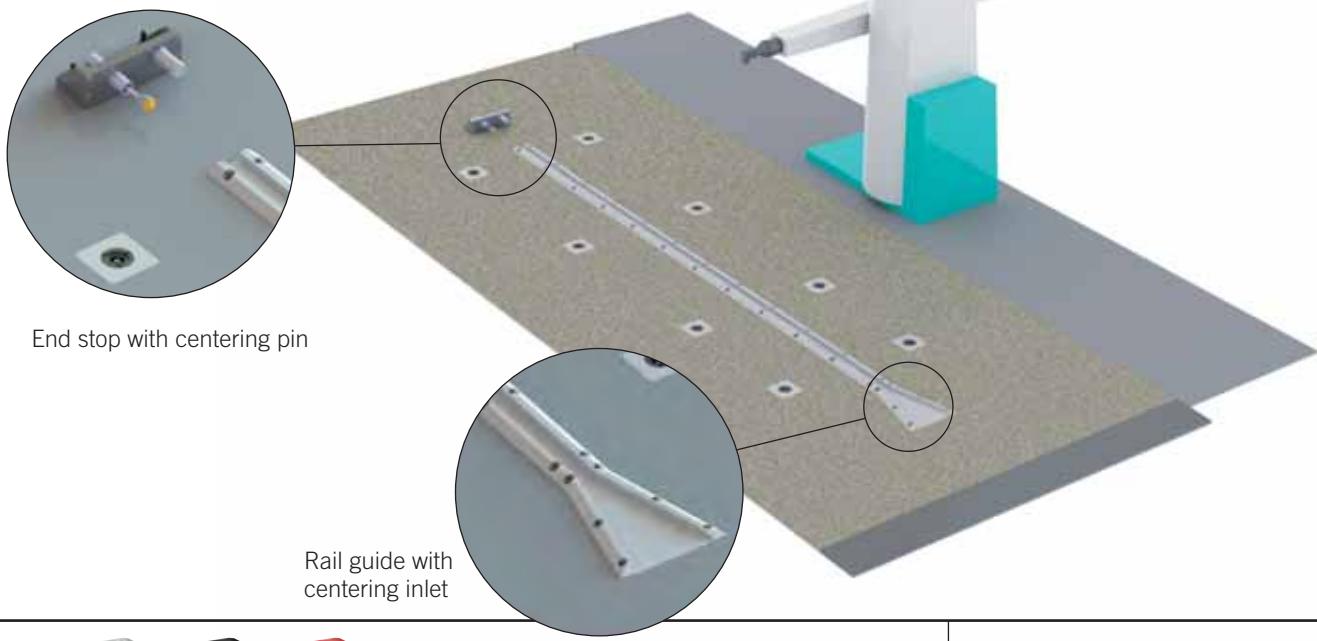

Parking systems with simple Z supports without covers are available for setting down plate outside of measuring area.

The supports are installed in the floor using compound adhesive and aligned to the same height. They are so strong that sandwich plates can be lowered and parked there for a long time if necessary without any risk of deforming the plate.

Undersurface of Witte FixBase sandwich plate with hovercraft cushion cassette, friction drive and positioning system. Detail shows roller for rail guide and end stop with inductive gap sensor.

Positioning system with guide rail and stop on a measuring machine

End stop with centering pin

Rail guide with centering inlet

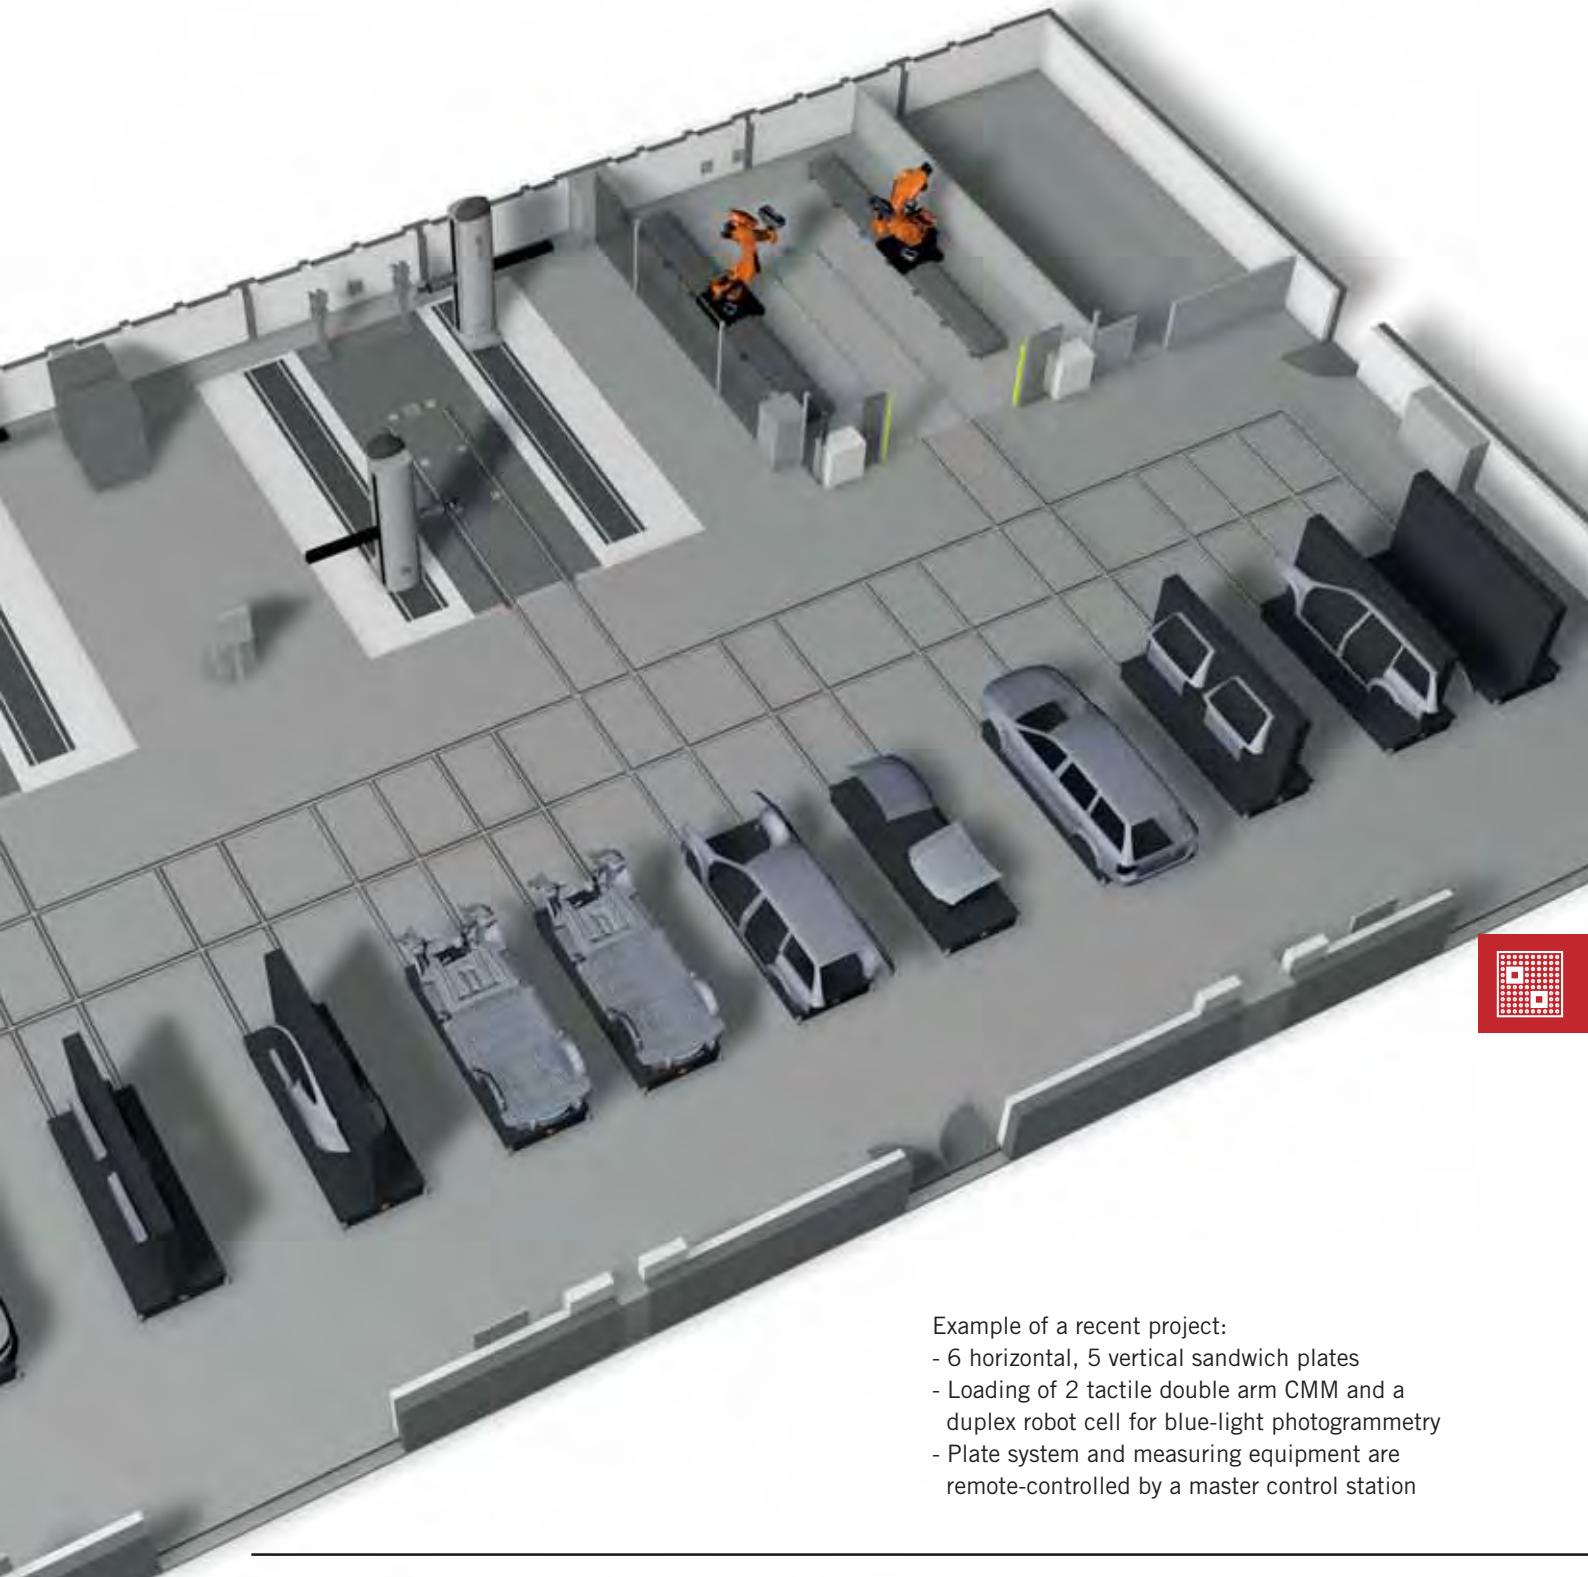

Witte FixBase® Elemente können in unterschiedlichen Farben eloxiert geliefert werden. Die Farbe „Natur“ ist Standard, „Schwarz“(-1) ist alternativ lieferbar. Weitere Farben auf Anfrage

- For fully automatic controlled loading stations
- Quiet forcibly guided run rails embedded in the floor
- No edges or grooves to stumble over
- 90° cross operation due to correspondingly arranged pivoting wheels
- Electro drive with battery operation
- Position monitoring/controlling with RFID transponders and IW-LAN radio network
- Positioning in CMM by lowering on to centering rings

Witte FixBase® Special solutions

Example of a recent project:

- 6 horizontal, 5 vertical sandwich plates
- Loading of 2 tactile double arm CMM and a duplex robot cell for blue-light photogrammetry
- Plate system and measuring equipment are remote-controlled by a master control station

Alu sandwich plates Special version

Complete vehicle unit for inspection and measuring of test cars or cars due for delivery. The vehicle is either driven or pulled onto the plate using a winch. After scissor trolleys raise the vehicle it is set down on RPS or car jack up

points. The sandwich plate is equipped with hovercraft and as an option can be driven with friction wheels. Scissor trolleys and winch are power operated.

Alu sandwich plates Heavy load version

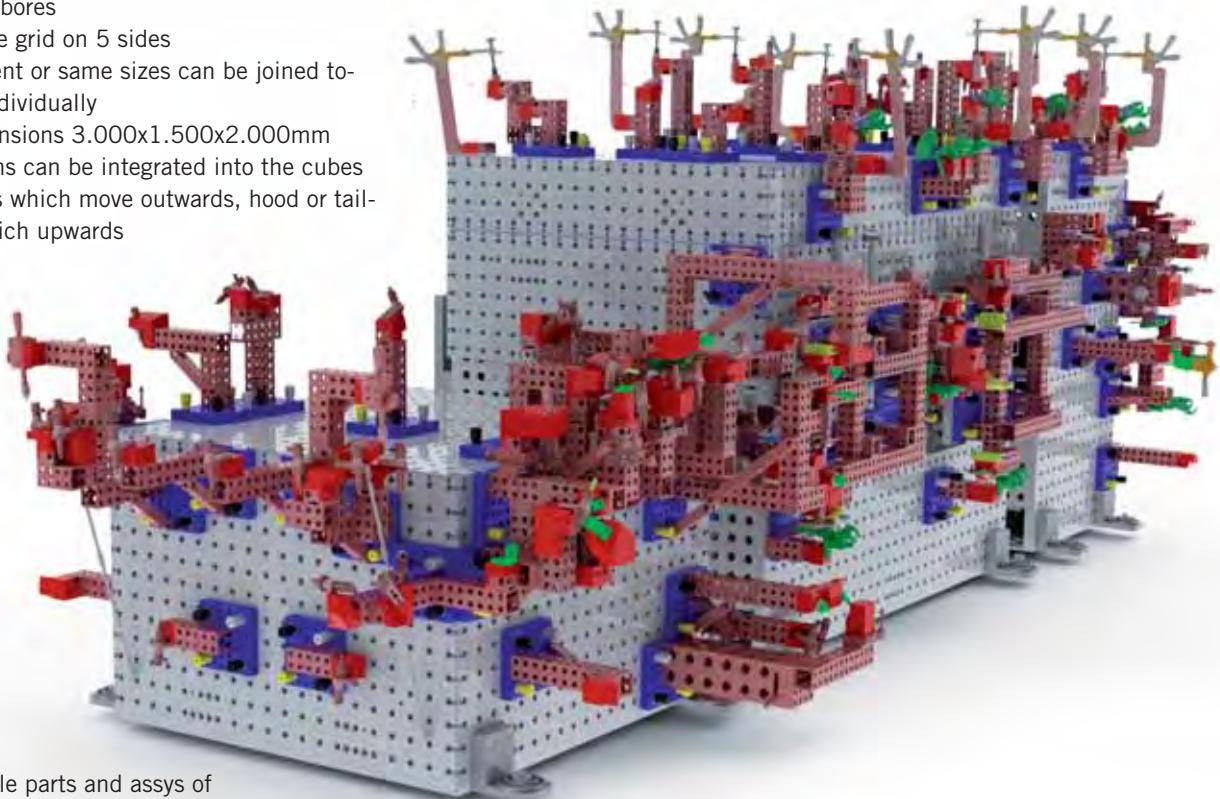

Rib type Alu sandwich plates are especially suitable for very heavy loads. The picture on the left shows a hovercraft Alu sandwich plate with dimensions 2000x4000x300mm. With its own weight of approx 1,5 to the total load capacity is 15 (fifteen!) to.

Fully loaded the plate can be moved with only two persons, with the help of the electro mover even by one person on their own.

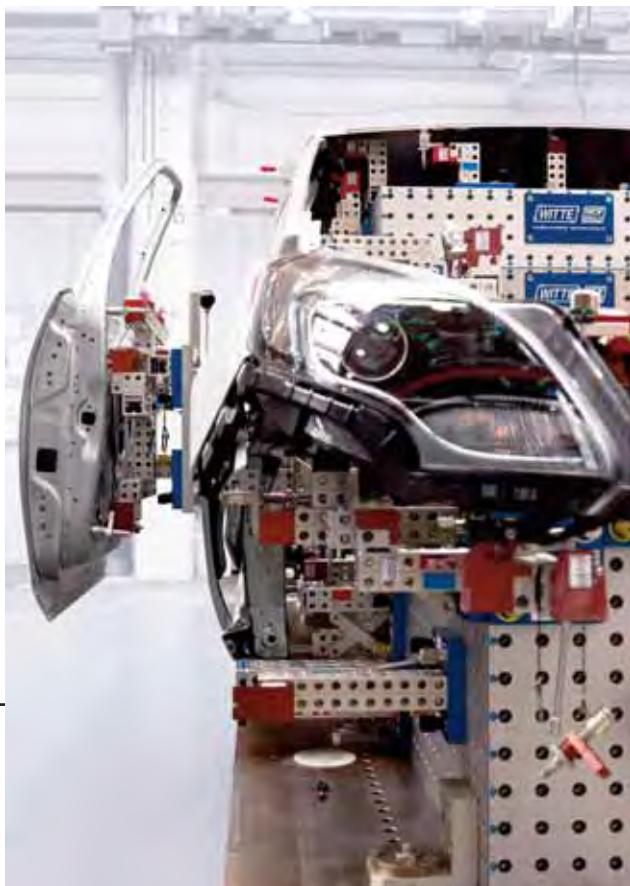

FixBase® Cubes

- Cubes mounted with grid plates:
- Grid with fitted bores
- Flat, full surface grid on 5 sides
- Cubes in different or same sizes can be joined together or used individually
- Maximum dimensions 3.000x1.500x2.000mm
- Further functions can be integrated into the cubes i.e. door supports which move outwards, hood or tailgate supports which upwards

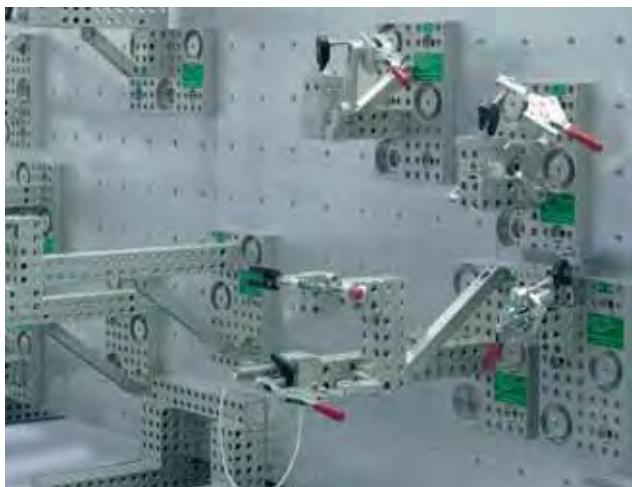

Supports for single parts and assys of various versions and models i.e. two-seater, notchback, limousine, estate, van, SUV are possible using corresponding configurations

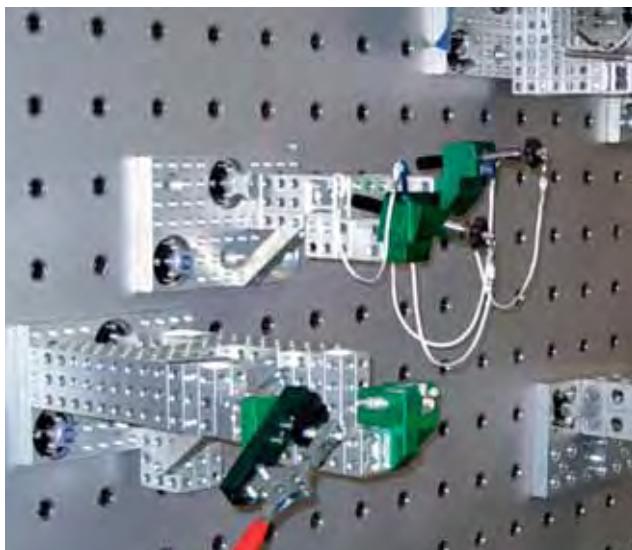

Application example for FixBase cubes

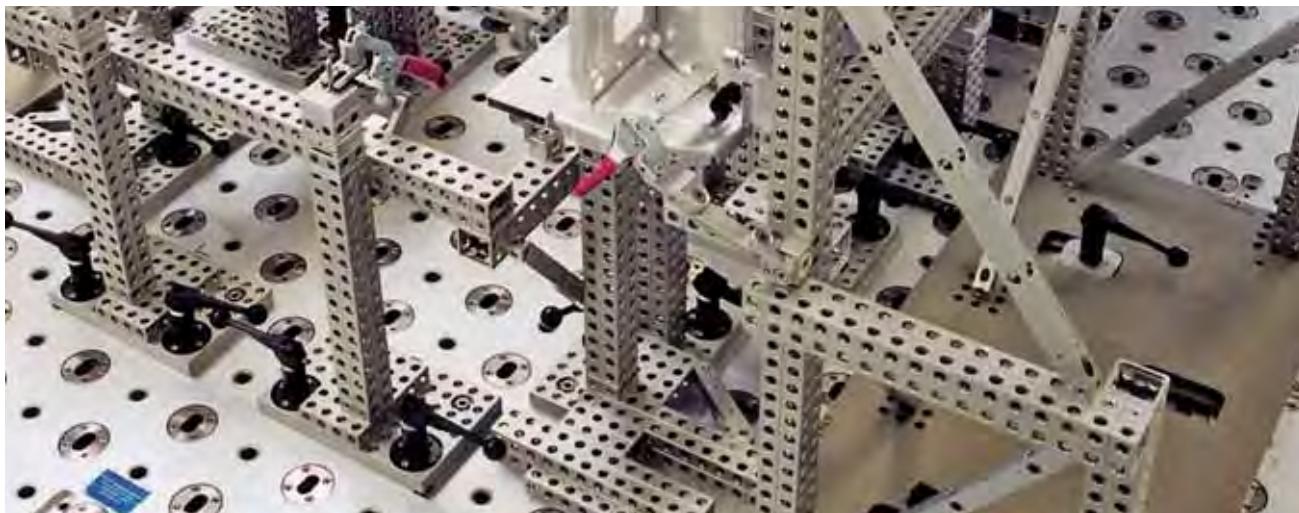

- Single cube for frontend (top)
- Combination of several cubes to mount all parts of a body-in-white

Column supports on footplates with fitted screw connection

Columns connected using PWS system

Columns connected using PPS system bayonet clamps

Column variations

for use on sandwich plates

Combining a grid plate (conventional or sandwich type) with exchangeable columns offers following advantages:

Use of one base for user-defined assembly of various work-pieces, different assembly degrees of parts (single parts, welded groups, assemblies) different derivatives, match metal function.

Considerably less storage space is required in comparison with complete fixtures. Comprehensive accessories such as multi level trolleys, foldable, stationary or mobile storage stations and tables are available for storing column supports. Multiple use of column supports is possible on different base plates or in different departments.

Pre measuring of supports on small measuring equipment is possible.

Different types of connection:

- Fitted screws,
- PPS (centering bolt and bayonet lever),
- PWS (clutch bolt with centering pin).

Optional simple footplates for Megalu columns or modular footplates for Classic or ECO bars are available.

The supports can be used for further functions or contact points by using folding or quick change couplings.

Longer bars on columns are supported by sharp angled struts or connected with one another when mounted.

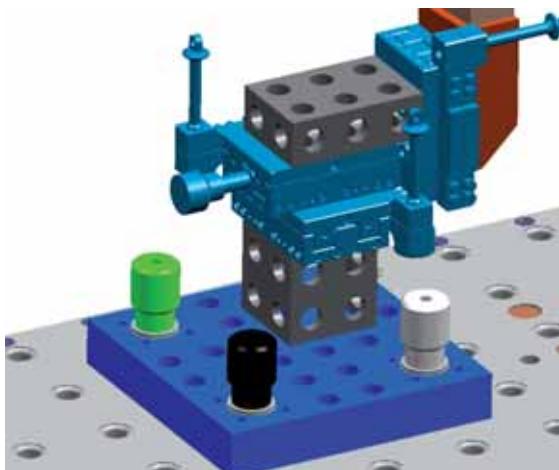

Column connection

with fitting screws for basic grid holes

Simple and proven version.

Two types of locators are available:

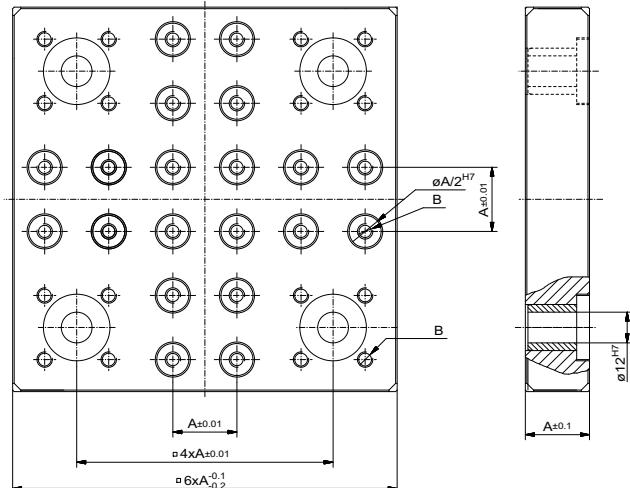

- Snug fit, floating (XY positioning)
- Without fit (only clamping)

EUROFIX

Hovercraft plates

Material:

- High tensile aluminium min. F47
- Surface protection:
- Top surface anodized
- Bottom surface PTFE coated
- Grid bores:
- Fitted bores 12,5H7/M6
- grids 25 to 100 mm available

Load capacity:

- Depending on surface of measuring machine but min. 200kg
- Air pressure required:
 >3 bar
- minimal air use (volume) required

Hovercraft Plates

For moving and positioning heavy workpieces on coordinate measuring machines.

The hovercraft plates have a grid pattern on the top surface.

Underneath the plate an air layer is created in such a manner that thread sleeves, T-slots or small gaps between the measuring machine and setting up area can be bridged easily.

The air is supplied via a rapid-action coupling and a handle valve.

Hovercraft plates

with handle and integrated hand valve

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Load Capacity: 250 kg, from 50kg upwards we recommend a support on the face surface of the measuring machine. Other versions and dimensions on request

Loading station for 3 CMMs with transfer bridges for pallet exchange

Load capacity 500kg,
evenness of table surface 0,03/1000mm².
Available with automatic pallet exchange

Pallet systems

Measuring machines are being used more and more under series production conditions.

That means setting up and standing times should be kept as short as possible.

Economically, it makes more sense to use the CMM for measuring. All time consuming loading and unloading processes can be carried out on suitable loading stations.

For this purpose Witte has developed Eurofix hovercraft pallet systems. They comprise of modular loading stations and hovercraft pallets for mounting and positioning of work pieces.

The loading station is set up directly next to the measuring machine. The understructure in accurate alu profiles enables adaptation to any surface height. Profile dimensions are selected according to size of station and weight of parts involved.

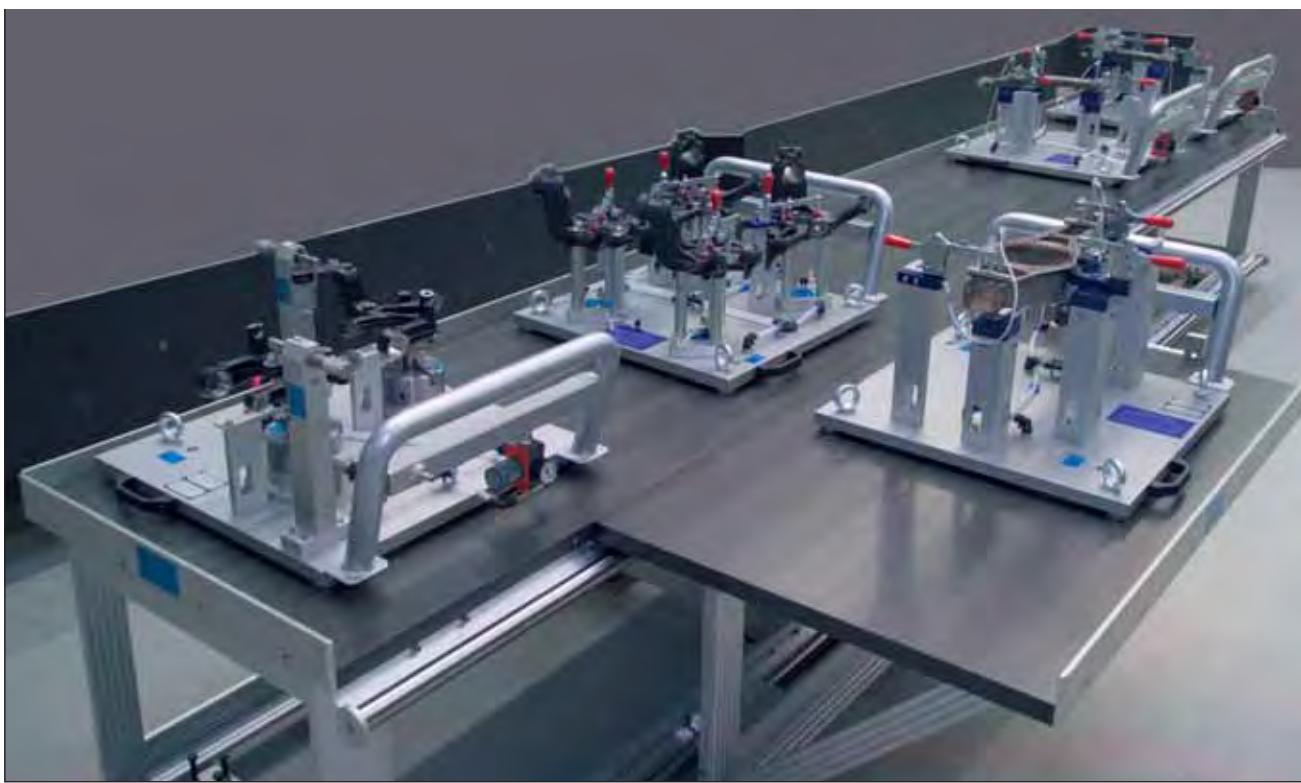

The surface is assembled using hard coated modular alu plates.

Stops all round ensure safe operation of hovercraft pallets.

Loading station with 4 places for hovercraft plates, the side of moveable transfer bridge is placed directly at the cmm table allowing transfer of hovercraft plates

Loading station with 5 hovercraft plates each mounted with a different measuring fixture

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Mobile measuring unit

96747, with grid base plate:
800x1200, height 930mm,
grid 100 12/5/M6, Weight: 130 kg

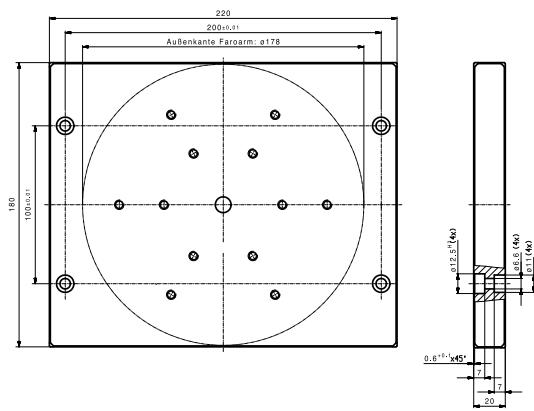

Mobile measuring unit

Nr. 284452, with height adjustable grid base plate:
800 x 1200 mm, height 930mm + lift 180mm,
grid 100, 12,5/M6
Weight : ca. 140kg

Mobile measuring unit - double

285101, with grid base plate :
1600x1200, height 930mm,
grid 100 12/5/M6, Weight: 170 kg

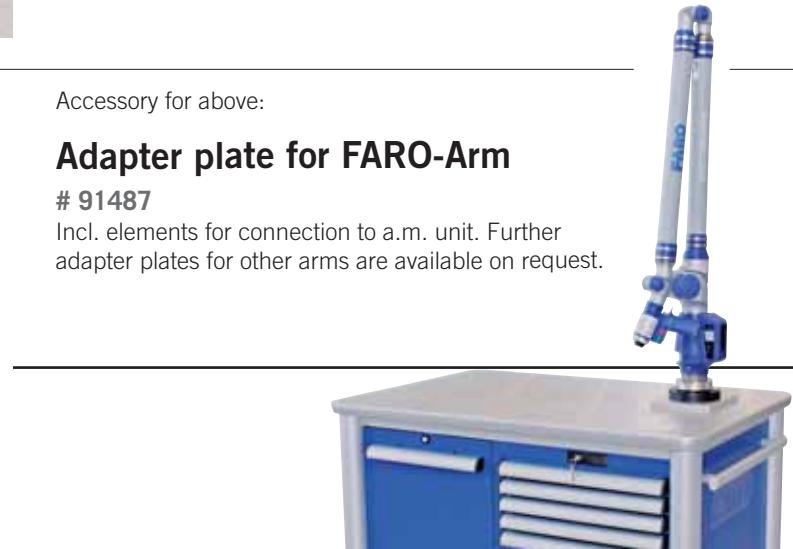

Accessory for above:

Adapter plate for FARO-Arm

91487

Incl. elements for connection to a.m. unit. Further adapter plates for other arms are available on request.

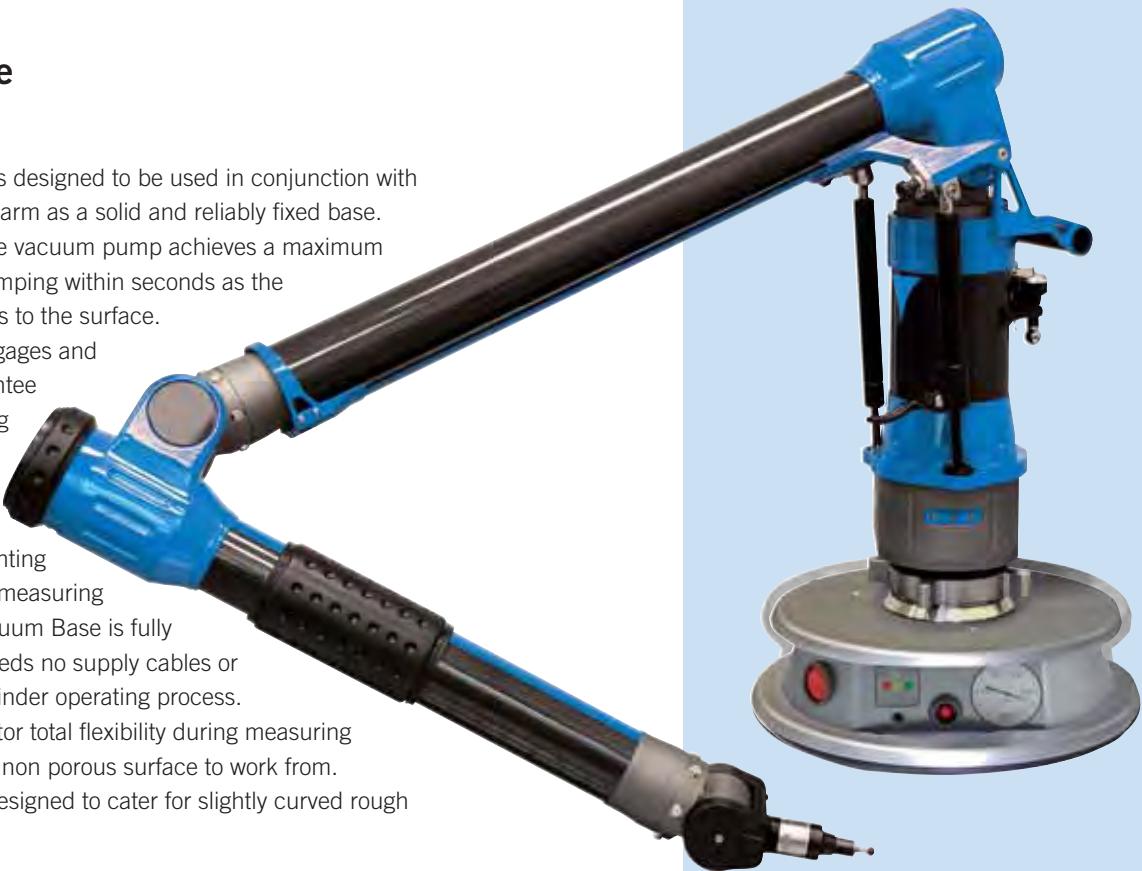

Vacuum Base

282446

This Vacuum Base is designed to be used in conjunction with a mobile measuring arm as a solid and reliably fixed base. An internal miniature vacuum pump achieves a maximum result for secure clamping within seconds as the clamping plate sucks to the surface.

Warning lights, dial gages and a manometer guarantee safe operation during the measuring process. A variety of grids on the top surface enable mounting of all known mobile measuring arms. The Witte Vacuum Base is fully selfsufficient and needs no supply cables or wires which might hinder operating process.

This gives the operator total flexibility during measuring as long as there is a non porous surface to work from. The rubber seal is designed to cater for slightly curved rough surfaces.

Dimensions: 260 x 80 mm

Weight: 3,7 Kgs

Clamping force:
maximal 4200 Newton at sea level

Battery Charger*: 100 to 240 volt

Battery pack* power: 12 volt
Light diodes indicate energy supply:
RED - Battery level low – Charge
YELLOW - Battery level half full
GREEN – Battery level fully charged

Should the battery level drop below the safe operating level then a signal will warn the operator.

End vacuum is adjusted to 200 mbar which equals 80%

(*): Parts are included in delivery

ALUFIX CLASSIC elements can be anodized in different colours. The colour natural is standard, black (-1) is available as an alternative. Other colours on request.

Milling and modelling table

For creating, positioning, working on clay models.
Modelling tables are equipped with a mirror enabling visualization of full model using scaled half models.

Milling tables enabling modelling and later machining of mounted models. Models can be positioned repeatably for machining in several steps .

Dimensions:

Length from 1.000 – 2.500 mm
Width from 800 – 1200 mm

Modelling table

For preparation and modification of clay models, i.e. inner doors. Models are worked on manually at optimal height and angle and can even be positioned in car line in an inner meisterbock. All linear movements as well as outward movement of castors are hydraulically supported. The base plate is equipped with sleeves so that repeatable exchange of different clay models is possible.

Technical data:

Length 1.000, width 800 mm
Height (max. when plate vertical) 1.680 mm
Weight including door carrier for clay models 230 kg
Max load capacity (in horizontal end position) 70 kg

Front interieur model unit

Ergonomic modelling unit comprising four single components

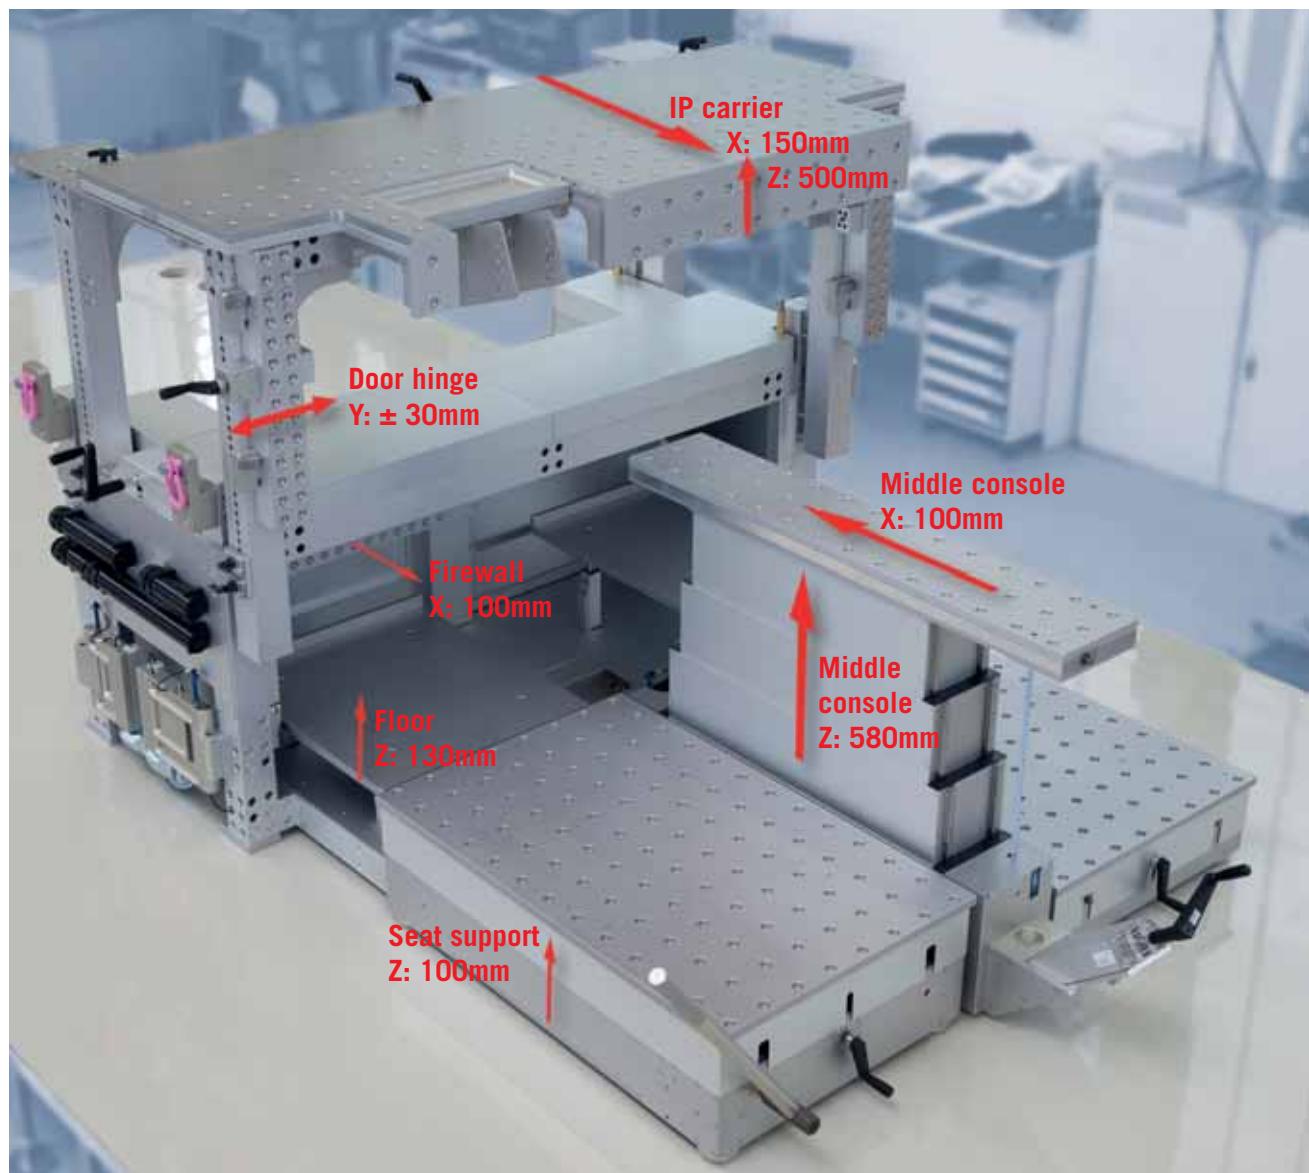

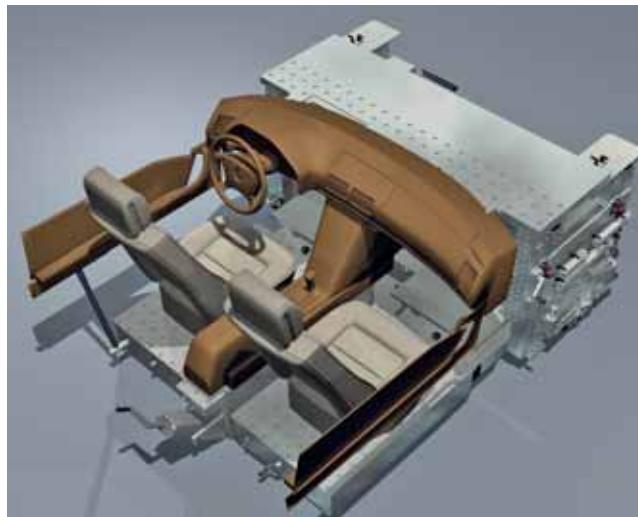

- Instrument panel with steering wheel connection and option to mount inner door models
- 2 dockable seat supports
- Dockable middle tunnel

The I-panel unit has several adjustment possibilities

- Length (X) 150mm
- Height (Z) 500mm
- Pedal supports additional 100mm in X
- Floor 130mm in Z
- Optional door supports +/-30mm in Y

Seat supports are height adjustable by 100mm in Z

The middle tunnel is adjustable in Z by 580mm and in X by 100mm

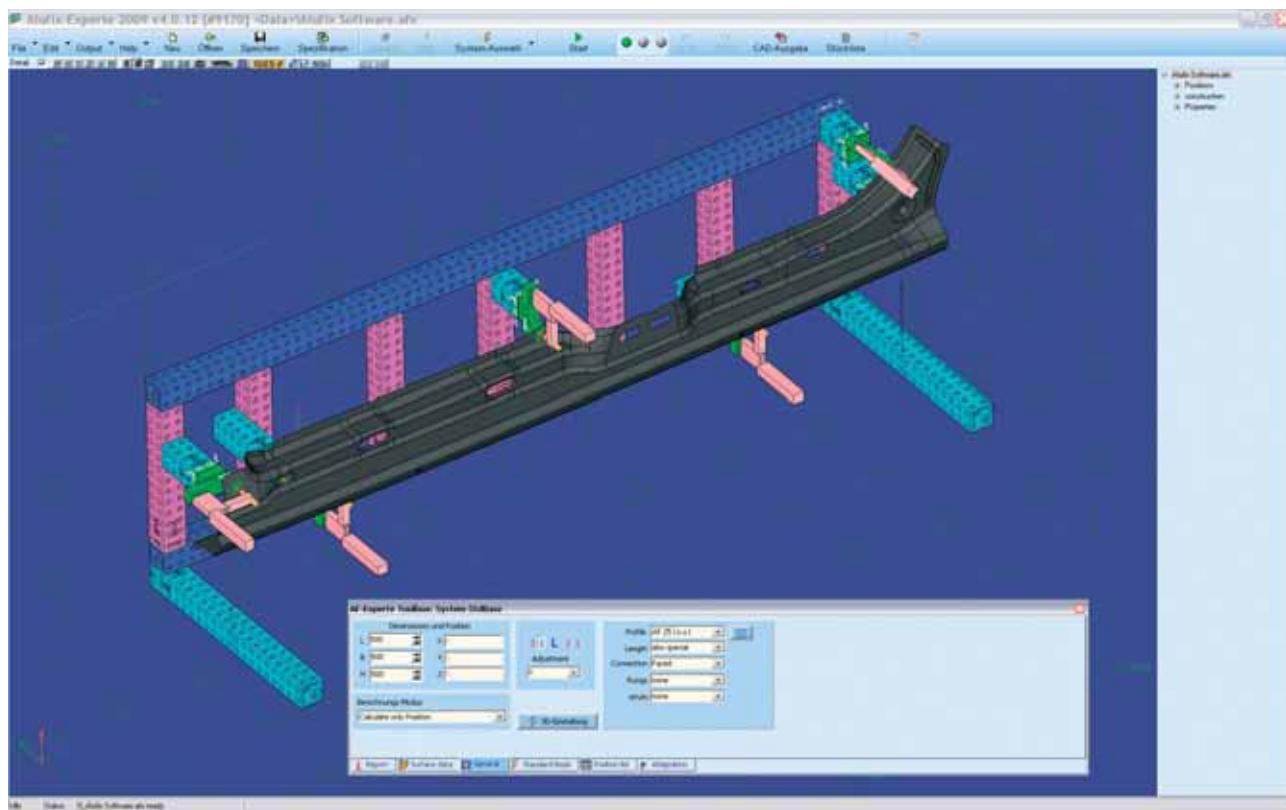

Alufix Expert 2014

3D Design Software #85344

Alufix Expert software makes automatic designs for fixtures with corresponding partlists. You choose the system and define clamping points. The software calculates on the basis of this information complete solutions and variations of a fixture. Simply select the desired Alufix system, the basic type of build (frame or plate), the grid size and the position and function of clamping points. On the basis of this input the software calculates complete solutions and variations. For checking purposes and measuring off of surface vectors additional part data in all established formats can be im-

ported. Pictures show some variations, which have been calculated by the software. The clearly structured, self-explaining software is easy to learn. Two separate but complementing help functions (Tool tips and Operation Manual) support users at all times. The design data is exported in either IGES, STL or VRML format (i.e. for offline programming of coordinate measuring machines), or can be transferred with a macro and the corresponding parts library in Catia V4/V5, Unigraphics or Autocad.

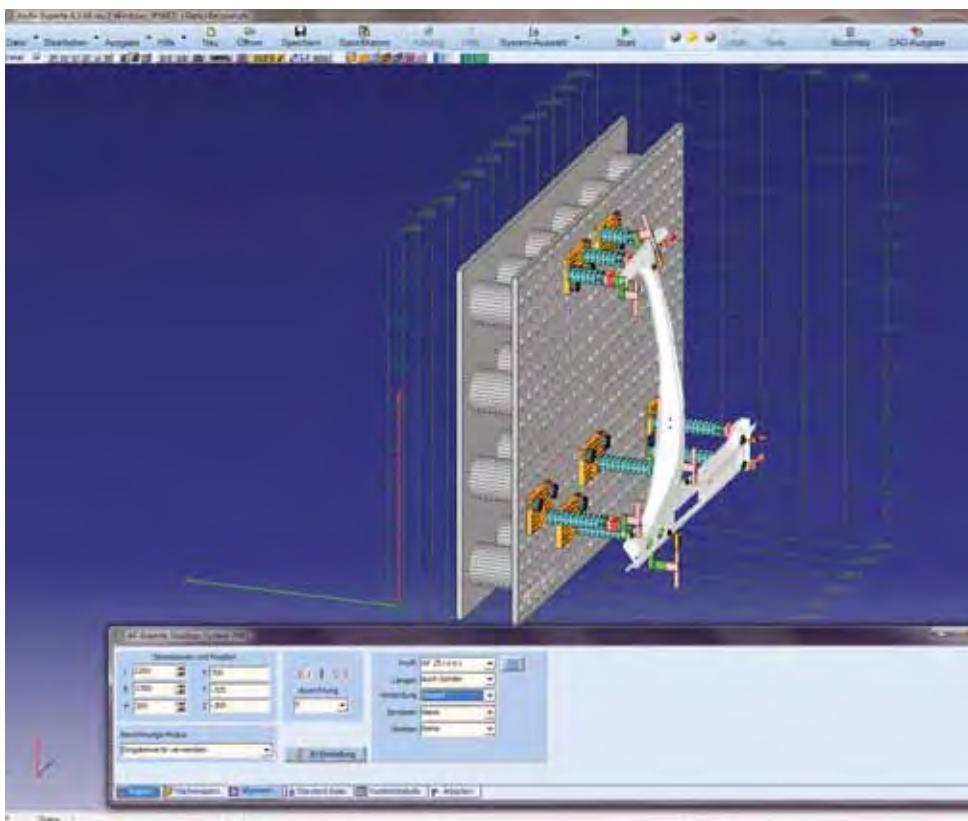

Partslist for C:\Dokumente und Einstellungen\lroebel\Eigene Dateien\...						
Pos	Qty	No	Description	MF	Dimensions	Weight
1	1	20426	Bar Light	25	50	360
2	2	22950	Bar Light	25	50	2400
3	2	24245	Bar Light	25	50	360
4	2	24911	Bar Light	25	50	7560
5	2	25375	Bar Light	25	50	480
6	2	25658	Bar Light	25	50	800
7	7	26748	Bar Light	25	50	9170
8	7	Sonder	Special	25	Special	2306
9	1	Sonder	Special	0	Special	141
10	1	Sonder	Special	0	Special	151
11	1	Sonder	Special	0	Special	153
12	1	Sonder	Special	0	Special	5

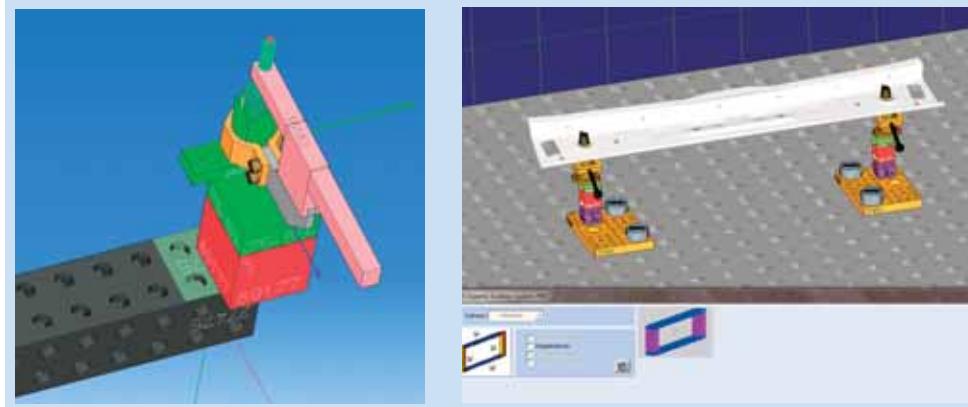

Buttons at the bottom of the table include Print, Save, Quick connectors, No connectors, and Screw connectors.

The part is positioned in car line using Alufix 25. The software can export parts lists (see left), pictures (JPEG), data (IGES, STL, VRML) or CAD data (Catia, Unigraphics). For direct import of surface data a license is required for the corresponding format.

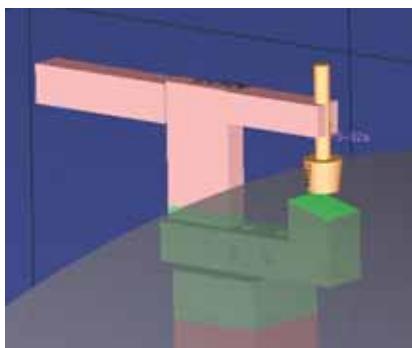

Individual training is available in house or it can take place on customer's premises under agreement against surcharge

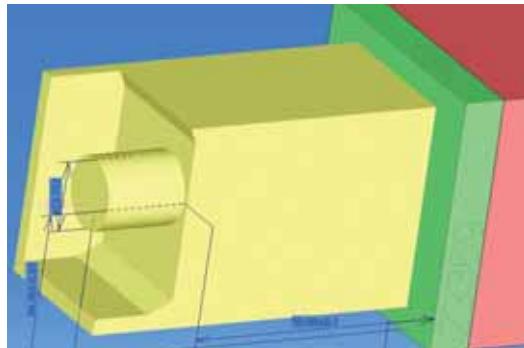

The input menu can be positioned freely on the surface and switch to show or hide in the format as required. The software accesses all common Witte Alufix systems. Even grid plates as shown left, are optionally used for clamping.

Different colouring shows the user in which modus the software currently is (definition/presentation). The parts marked orange have just been selected for editing, dark components are either already calculated or have been changed in a different programme module (inactive)

Complementary module: Surface cut for contour part

Complementary module: Adapter dimensioning

Pentium® PC, 2MB RAM, 1GB free disk space,
Operating system Microsoft® Vista®, Windows7®, Windows8®

FIXMES

Alufix parts library for CAD systems

Fixmes is an Alufix parts library on a geometric basis for designing and documenting fixtures. Using Alufix standard elements fixtures can be built in a fraction of the time required previously. By designing the fixture on-screen expensive idle-times of the measuring machine are avoided.

The principle:

at the CAD workplace the user designs a desired fixture for workpiece machining or measuring using Alufix components. To do so he can use all parts available in the Fixmes library..

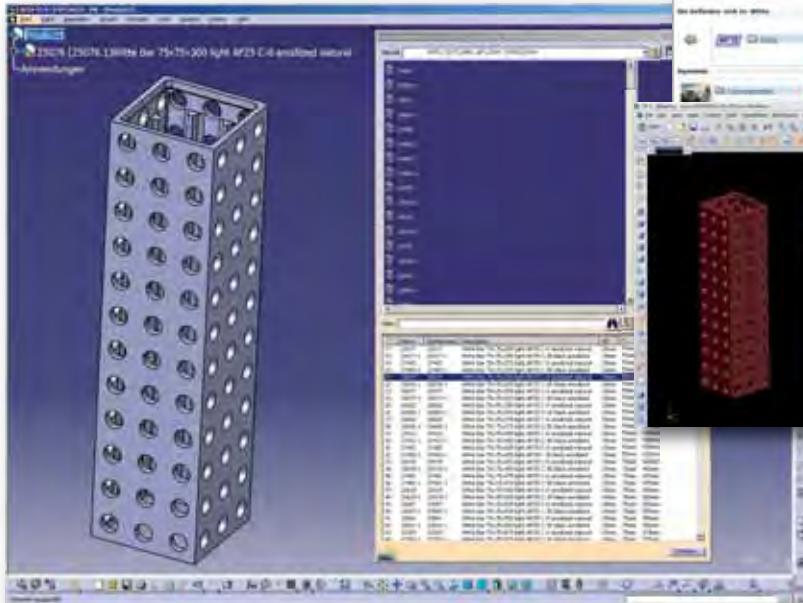

The selection is made according to one of the following features:

- Item No.
- Name
- Dimension

The parts of the fixture can be displayed as a wire model or solid. For a clearer image and an increase in speed individual planes or elements (holes) can be excluded. A printout of the finished fixture includes a parts list.

The advantages:

- Shorter design times
- Better prolonged use of measuring machine
- Timely preparation of fixture
- Documentation for later repeat assembly of fixture
- Short term changes can be carried out quickly
- No training necessary,
- CATIA or AutoCAD functions are utilised
- Also for off-line programming

83677 Fixmes Library für Catia V5

Elements of Alufix modular fixturing system are stored as *.catpart and *.catproduct files.

In addition a CATIA catalogue with parameterized parts is available on request. Elements can be selected according to different criteria such as item number, description or dimensions.

92562 Fixmes Library für Unigraphics NX5

Alufix elements stored with attachment *.prt

83676 Fixmes Library for AutoCAD

Alufix elements stored with attachment *.dwg

82157 Fixmes Library IGES Format

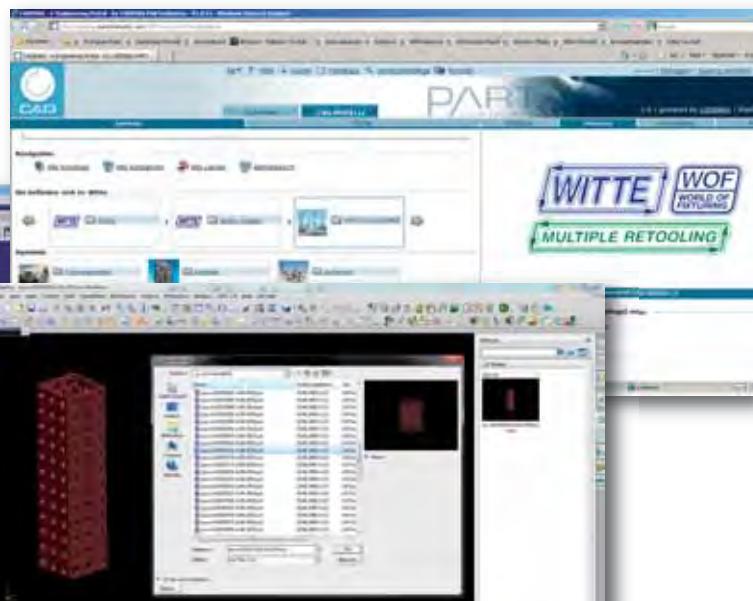

Alufix elements stored with attachment *.igs

82662 Fixmes Library STEP Format

Alufix elements stored with attachment *.stp.

In addition we also offer a download service from internet under: www.partserver.de

After registration Alufix components can be downloaded free of charge in all native or universal formats under this address.

Assembly simulation

Macro programme from CATIA V5, #98098

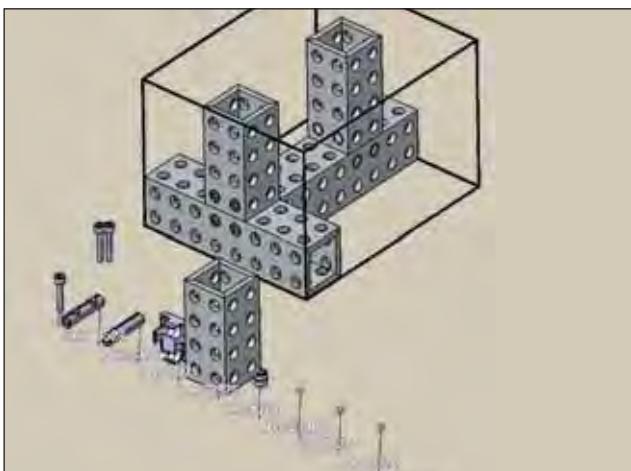

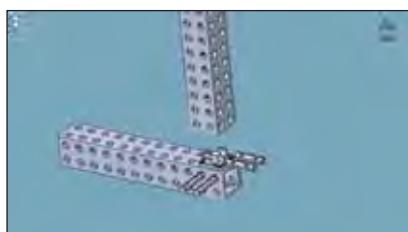

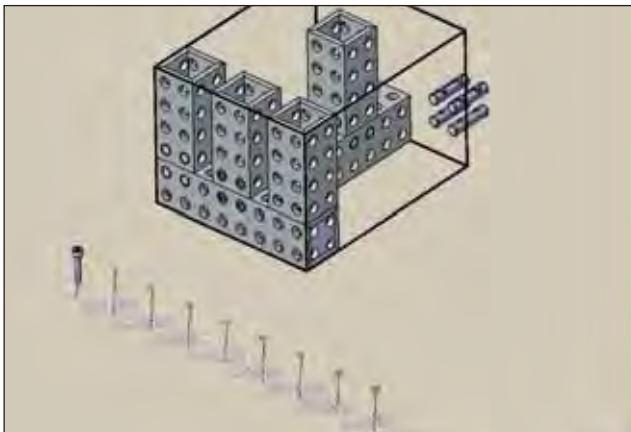

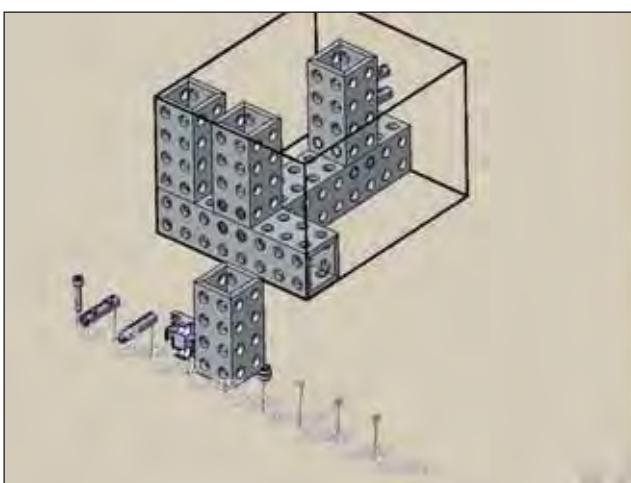

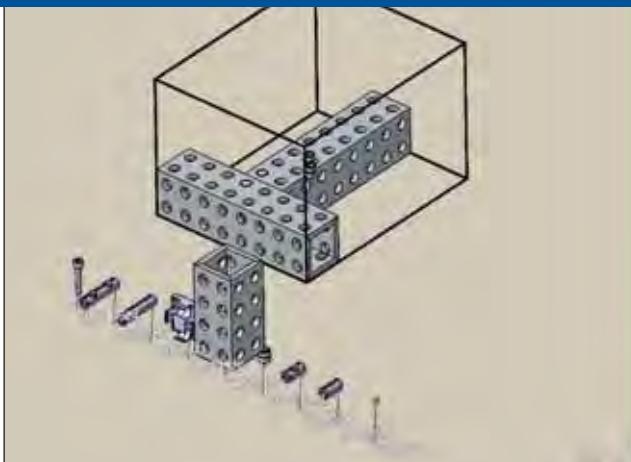

CATIA V5 module assembly simulator works complementary to Expert software 2011 and Fixmes parts libraries.

To simplify assembly this module shows the user step by step how and in which sequence single Alufix components are put together in an optimal way after registration

First of all the macro investigates all characters and positions of components, which are available for a connection.

On the basis of this information connection elements are automatically proposed. The user can change quantity and position of those elements or exchange for other elements. Secondly the software calculates the optimal assembly sequence for the basic items including connection elements. As documentation or operation manual the complete process can be saved as a graphic simulation and shown again and again.

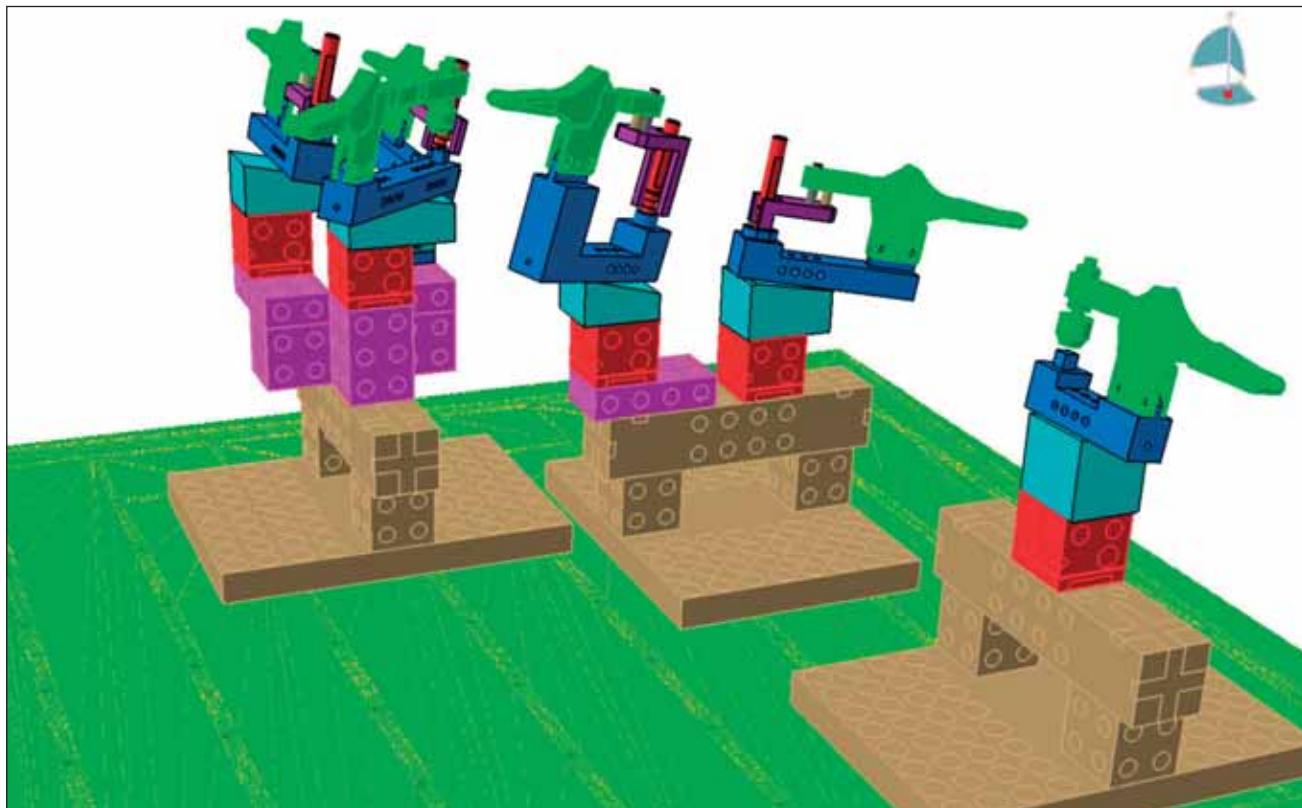

Fixture building is considerably speeded up and simplified especially with regard to various connection elements.

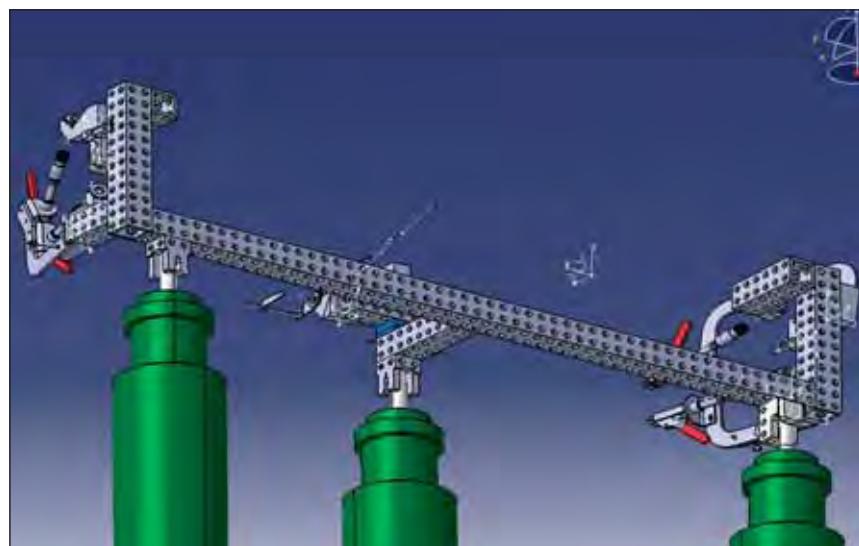

ALUFIX

Cross System Solutions

Alufix can be combined with other systems such as BMW, DEA Five etc.
There are a variety of special parts and adapters available.

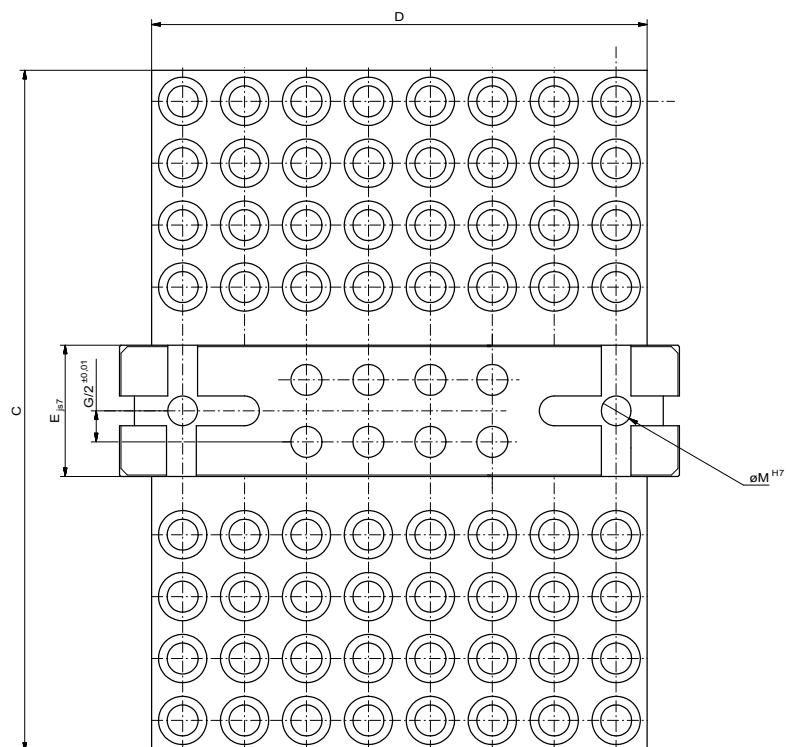

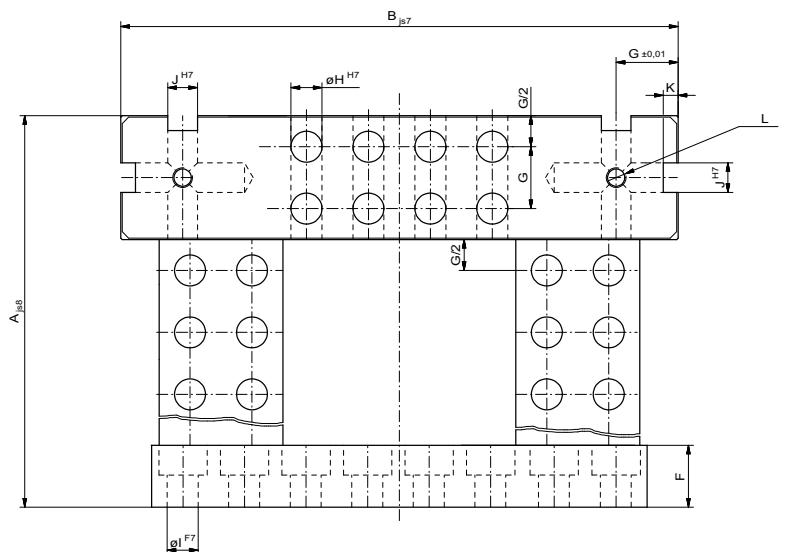

Detailed information on request

Support

BMW / ALUFIX 25

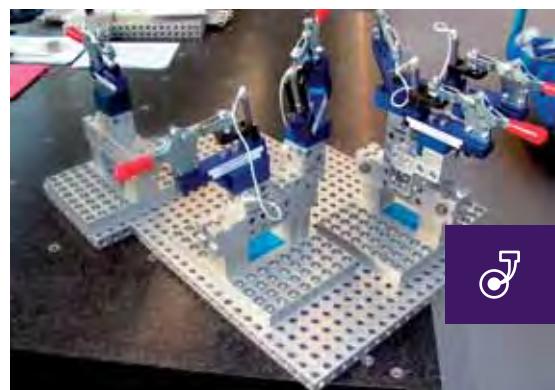

Nr	A	B	C	D	E	F	G	H	I	J	K	L	M	g

ALUFIX XS

Fixturing system for small parts

For improved productivity

Measuring fixtures are prepared away from measuring equipment

Flexible and economical modular system

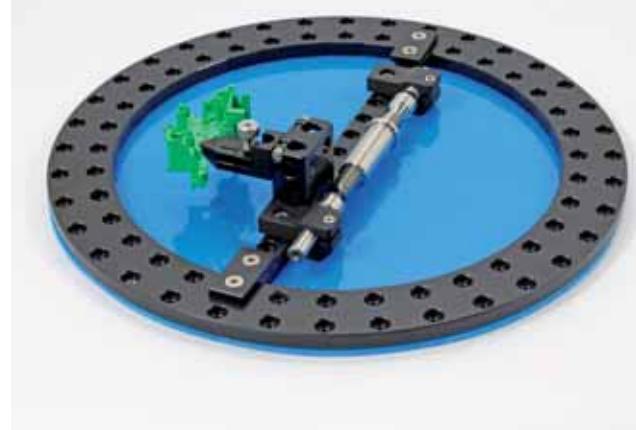

Quick and repeatable fixture set up with consistent precision, absolutely compatible to all other ALUFIX systems.

High precision and quality

CNC-milled elements made of high tensile aluminium or acrylic ensure great accuracy and light weight.

Transparent Fixtures

Most ALUFIX XS elements are also available in a transparent acrylic material which has proven very suitable for optical measuring systems/profile projectors/vision systems.

Unlimited setting and adaptation possibilities.
A multitude of top sections and adapters allow reliable, gentle fixturing of different workpieces.

FIXINSPECT

Fixinspect measuring accessories simplify and considerably speed up tactile and non-contact measuring processes. All Fixinspect accessories are mounted on workpiece features, where dimensional data is required. It is easier and faster to measure

the accessories than the features themselves. Defined contact surfaces and high-precision manufacturing of the accessories mean measuring results can be calculated back to the workpiece feature location.

FIXINSPECT

Measuring accessory
for tactile measuring

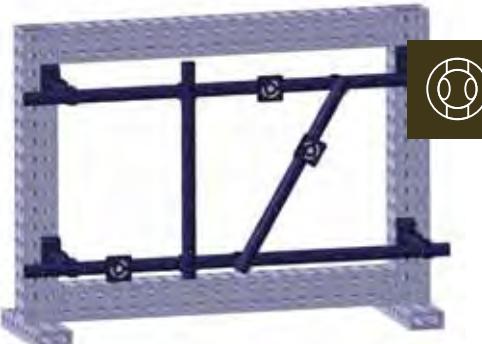

FIXINSPECT LT

Measuring accessory
for Lasertracker

FIXINSPECT PG

Measuring accessory
for photogrammetry systems

FIXINSPECT KR

Measuring accessory
for laser tracker

MEGALU

Megalu is an extruded profile with medium tensile strength (220N/mm^2), through holes and is divided by chamfer grooves.

The profile holes are 9,5mm in diameter (for Helicoil inserts M8, direct thread M10 or as access hole for screws M8).

Profiles are available in three versions:

L 64x64, L80x80, □ 80x80.

Megalu connections fulfill high demands on torsion and bending.

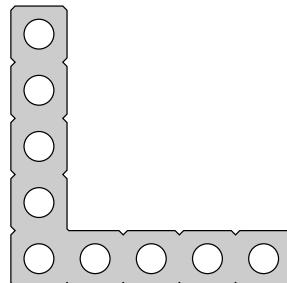

Megalu was designed to be used throughout the whole life of a fixture to ensure stable, repeatable work piece positioning.

Megalu is intended as a dedicated solution so fixture changes are not as easy or convenient as with other systems such as ALLUFIX Classic.

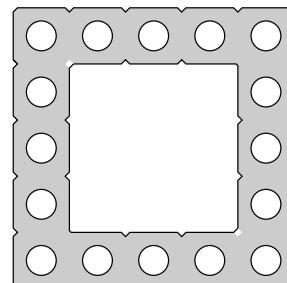

Megalu is a simple yet accurate and economical fixturing system.

ALUQUICK

ALUQUICK Profiles

can be mounted on 6 sides

- no further machining required
- one slot width for all profile cross sections, therefore only one type of connector required
- slot geometry for tight connections
- grid and face slot for repeatability, available without grid if required
- outer dimensions are a multiple of grid
- compatible with ALUFIX Classic and ECO
- grid holes with fit feature or fine thread

This system
is no longer part of
our main range:
Still available,
see catalogue
Aluquick

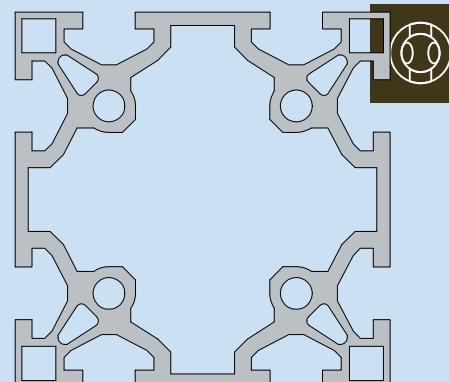

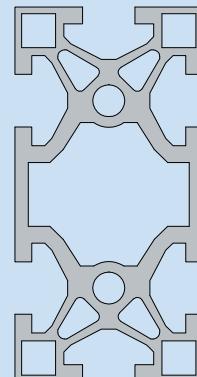

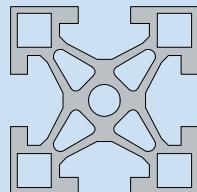

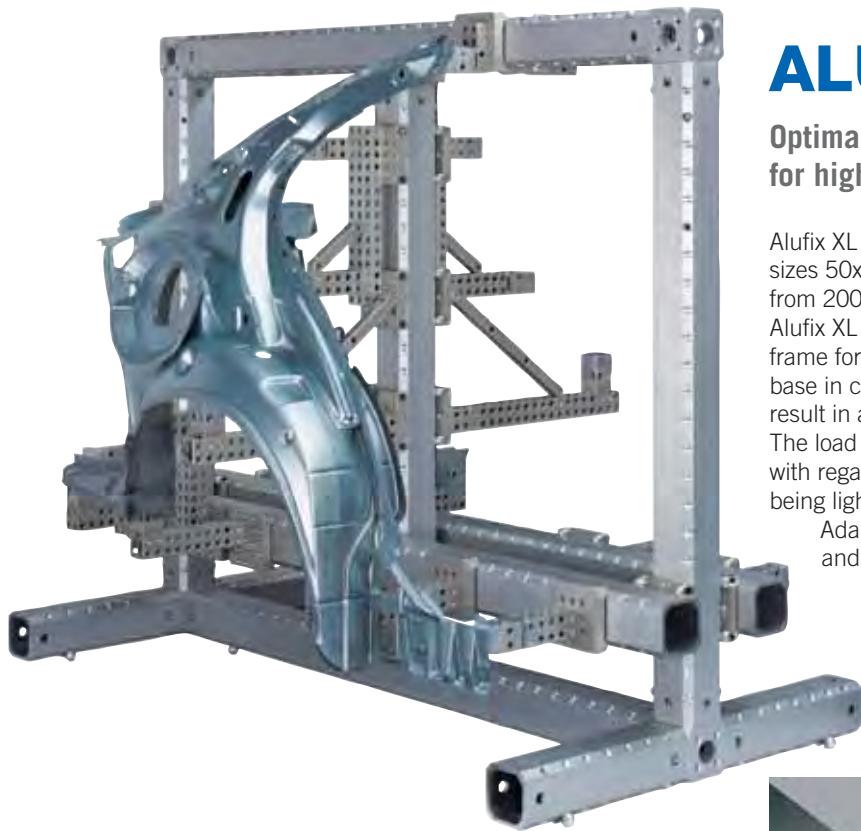

Frame type structure.
ALUQUICK fixtures can also be column-type
mounted on grid or sandwich plates

ALUQUICK profiles:

- 40x40, 40x80, 80x80
- 50x50, 50x100, 100x100
- max. length: 6000 mm

ALUFIX XL

Optimal profile cross section
for highest rigidity

This system
is no longer part of
our main range:

Only
available on
request!

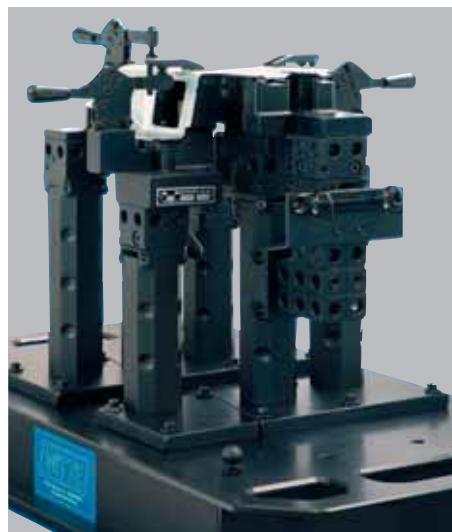

Alufix XL is available in grid system sizes 50x50 and 100x100, in standard lengths from 200mm to 10000mm in steps of 50 or 100 respectively. Alufix XL is especially suitable for large fixtures or as a base frame for Alufix Classic. This special thick-walled profile as a base in combination with 4-point ball-seat contact surfaces result in a particularly strong construction.

The load spread via profile cross section offers high resistance with regard to torque or bending with an added advantage of being lightweight.

Adapter plates enable connection to all Witte systems and guarantee system integrity.

System sizes

System	XL 50	XL 100
Grid	50	100
Grid start	25	50
Ball-seat ø	12,5	12,5
Bar lengths are a multiple of system size	100 150 200 250 etc.	200 300 400 500 etc.

POSIFIX

Complementary system

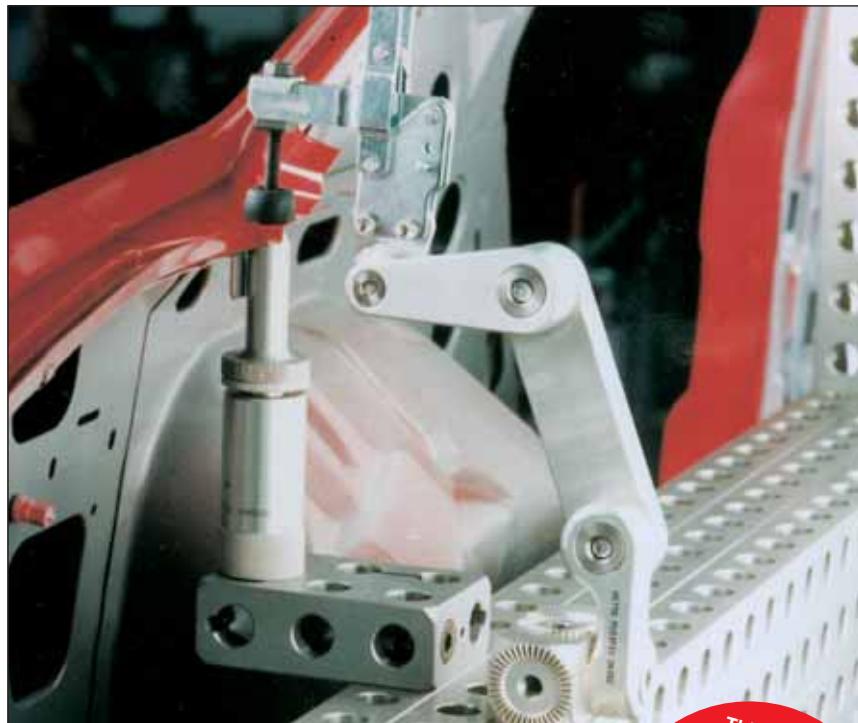

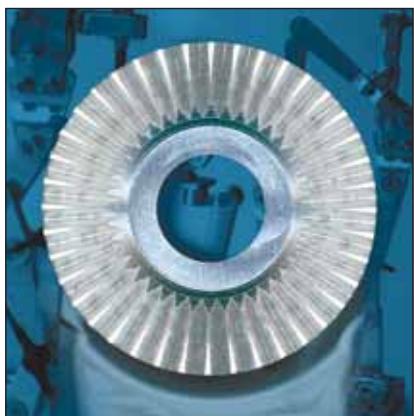

Posifix from Witte is a three-dimensional jointed arm system made of high-tensile aluminium.

With Posifix elements a multitude of contact surfaces, positioning aids, styli extensions for measuring machines etc. are accurately and repeatably carried out.

Typically characteristic for this product are the serrated grooves, which allow a form fit.

The differential washer features two serrated faces with 9° increments, which are slightly offset from each other. This allows for even finer adjustment of angle settings of 4,5° or 2,5°.

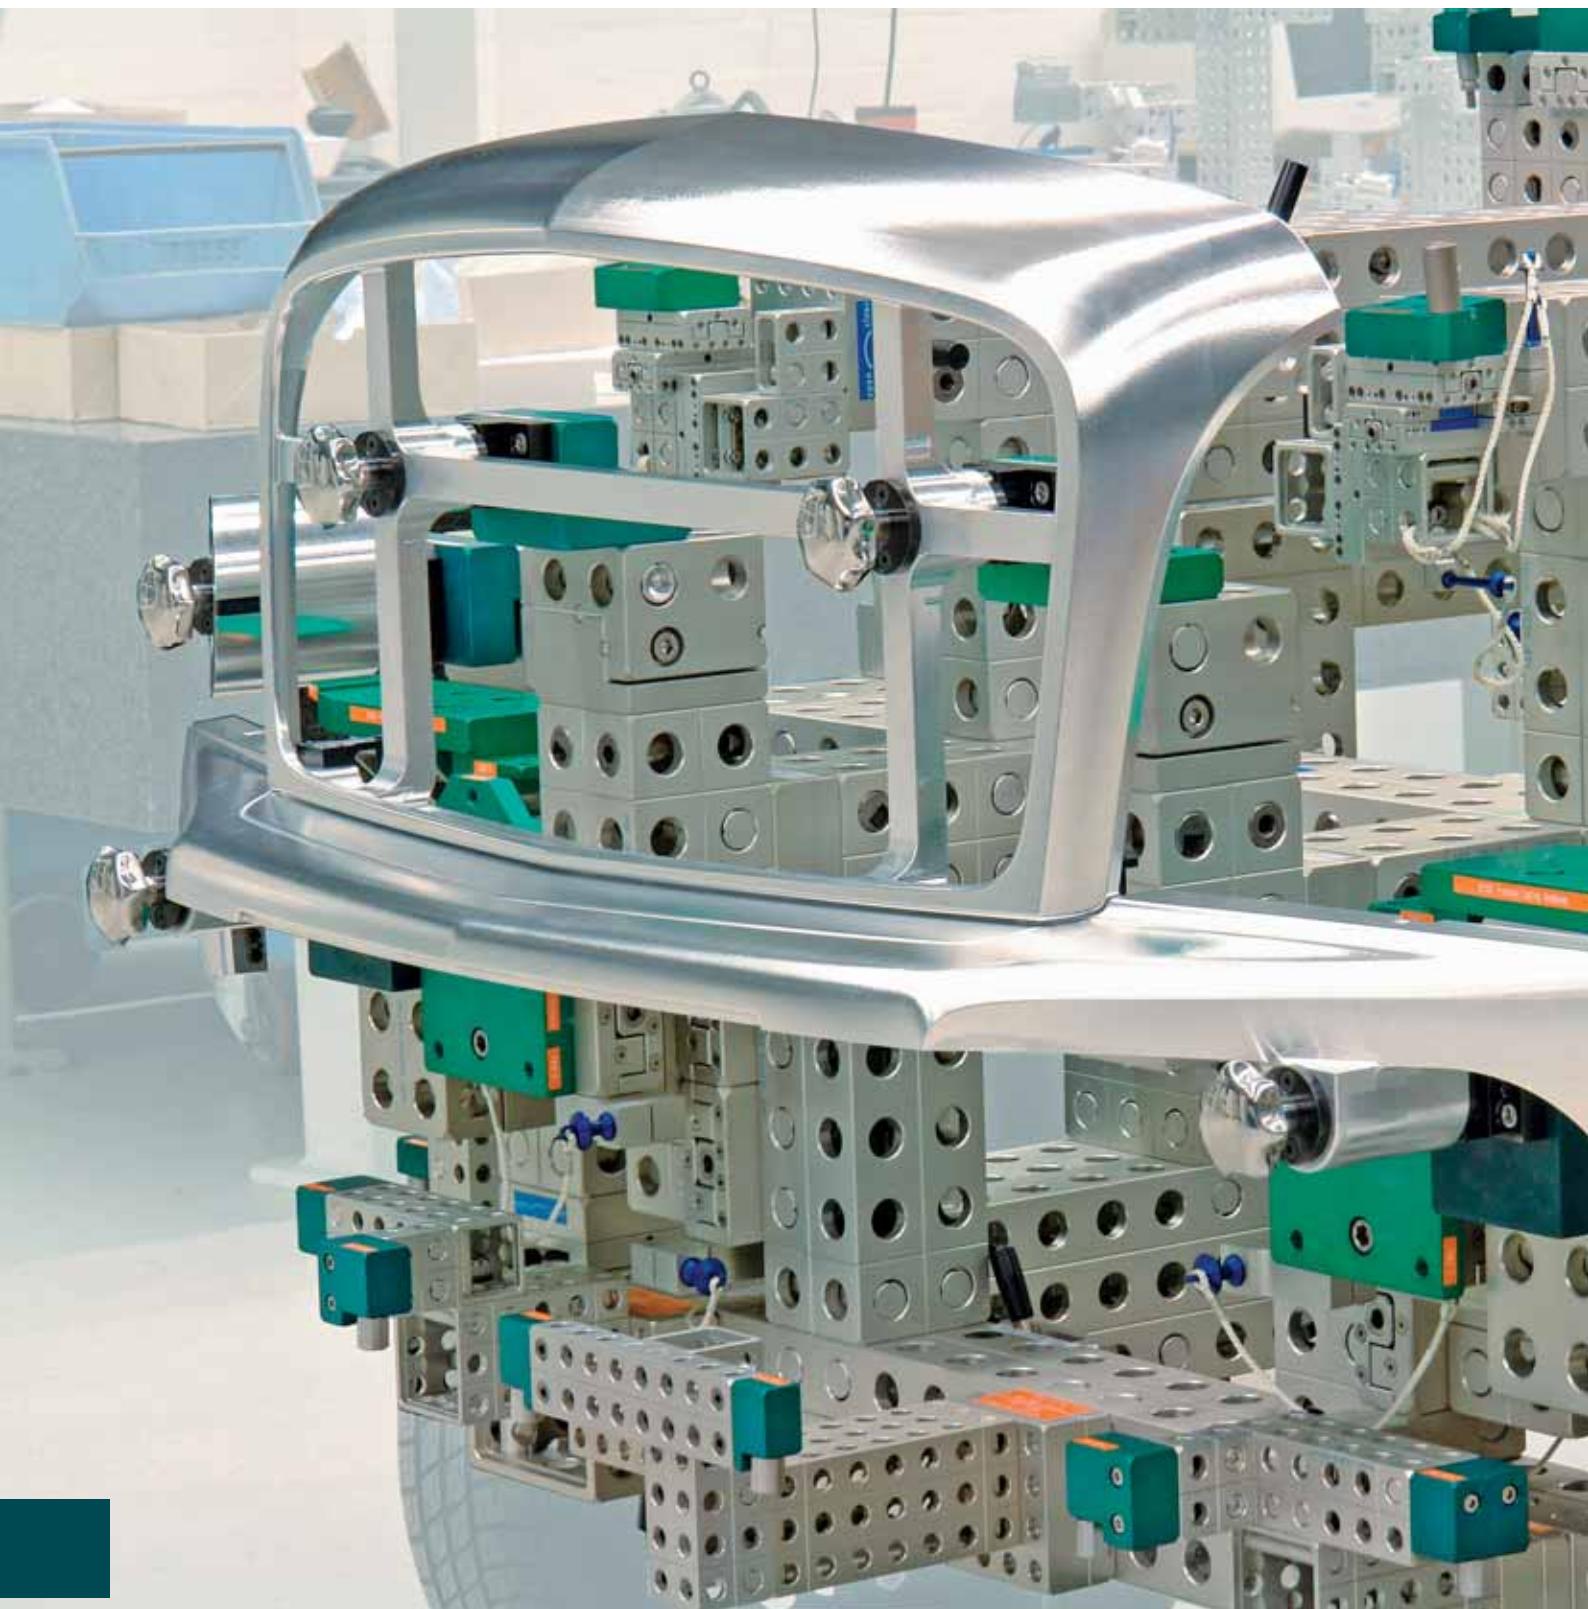

Fixture with Posifix to position toggle clamp, using reducer and angle adapters

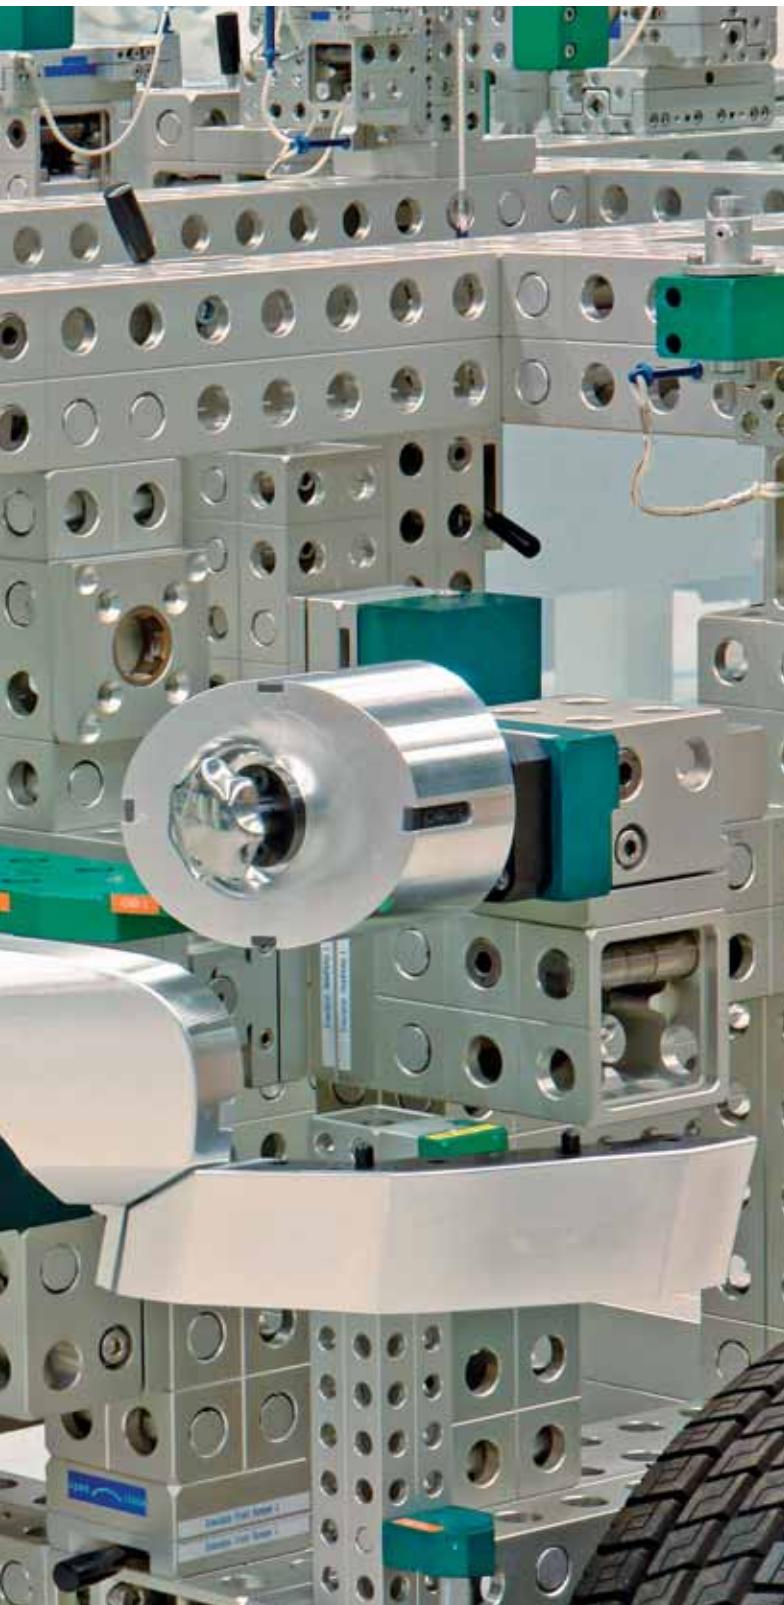

This system
is no longer part of
our main range:

Only
available on
request!

Alufix outer meisterbock in combination with simulators for early part alignment, the analysis of which lead to improved quality of auto components.

Meisterbocks, Outline gauges, Cubings

Not only fixtures for single parts or assemblies can be assembled from Alufix profiles and components but all kinds of frames and fixtures up to the size of an original vehicle.

Meisterbocks

Outer meisterbocks are used for mounting outer skin parts or groups of any production step. Structures can be made of different sections or system sizes, to support different derivatives or vehicle families.

Inner meisterbocks are made to analyse different interior parts. Part specific machined contours simulate parts or the original body-in-white parts can be mounted.

Fuegemeisterbocks (match metal fixtures) are used to position or match sub-groups, sidepanels, front end with each other. Joining of single parts to a complete vehicle is easy with a modular fixturing system. This method of analysis helps early recognition of problem areas, enabling cost and time savings in vehicle development process.

Outline gauges

Outline gauges help to check parts in relation to neighbouring parts which are represented by outline 3D contours/strike or stripe models. The contours can also be removed from the gauge and added to measuring fixtures using quick change couplings.

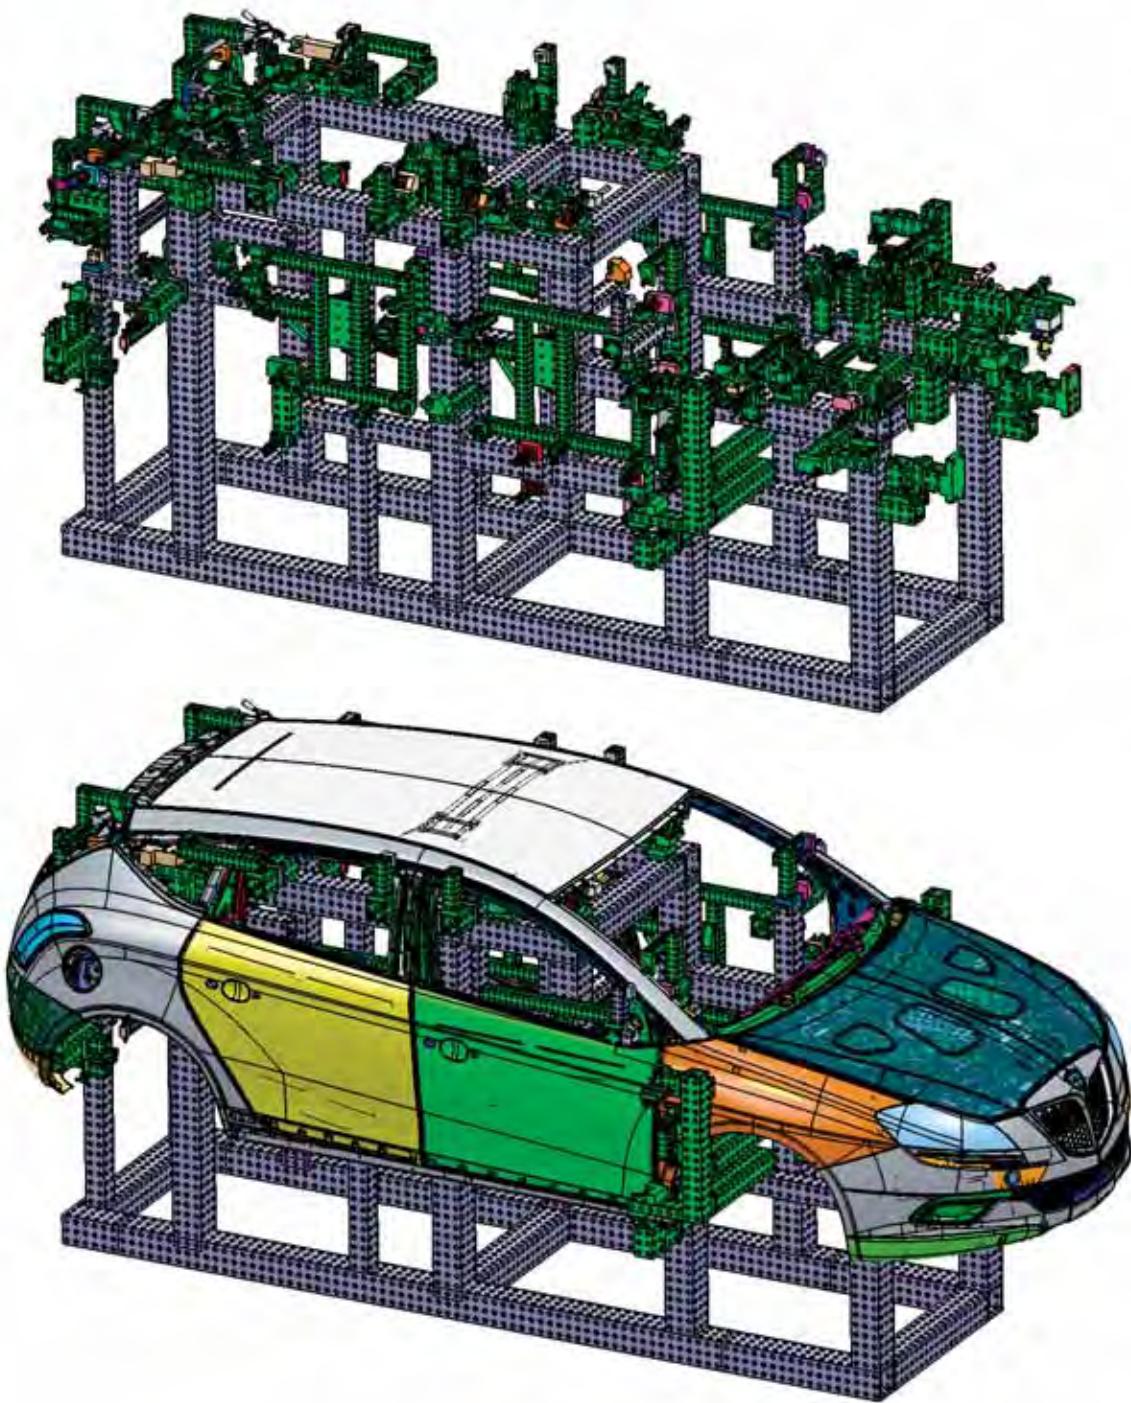

Cubings

Alufix basic frames are an ideal base for cubing elements because of their rigidity, accuracy and modularity. Cubing base frames for front or rear ends, doors or complete cubings. Because of its reusability and modularity Alufix is pre-destined as a platform for inner cubings, area sections or complete vehicle cubings.

Outer meisterbock,

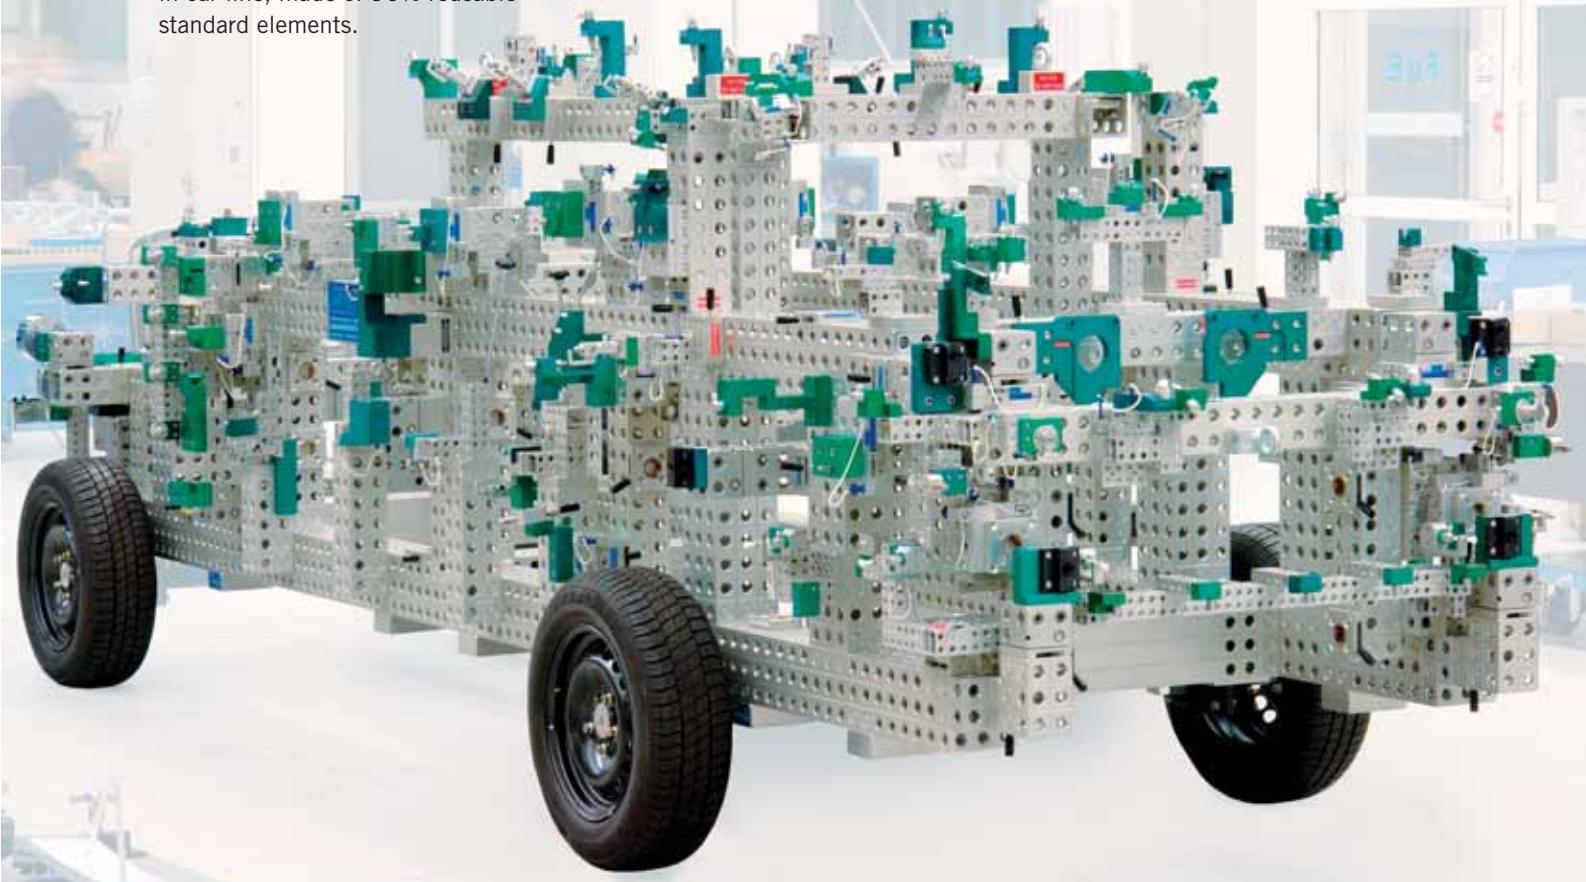

shown without and with parts.

Adapters (usually extremities) can be exchanged for next model.

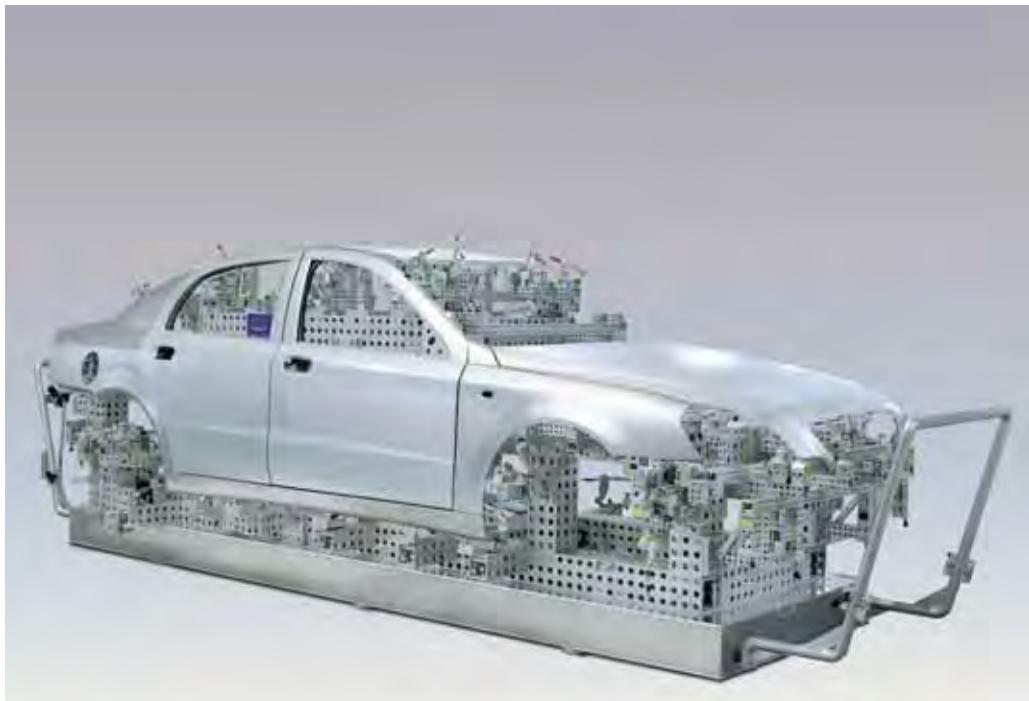

Alufix outer meisterbock

in car line, made of 90% reusable standard elements.

Outer meisterbock

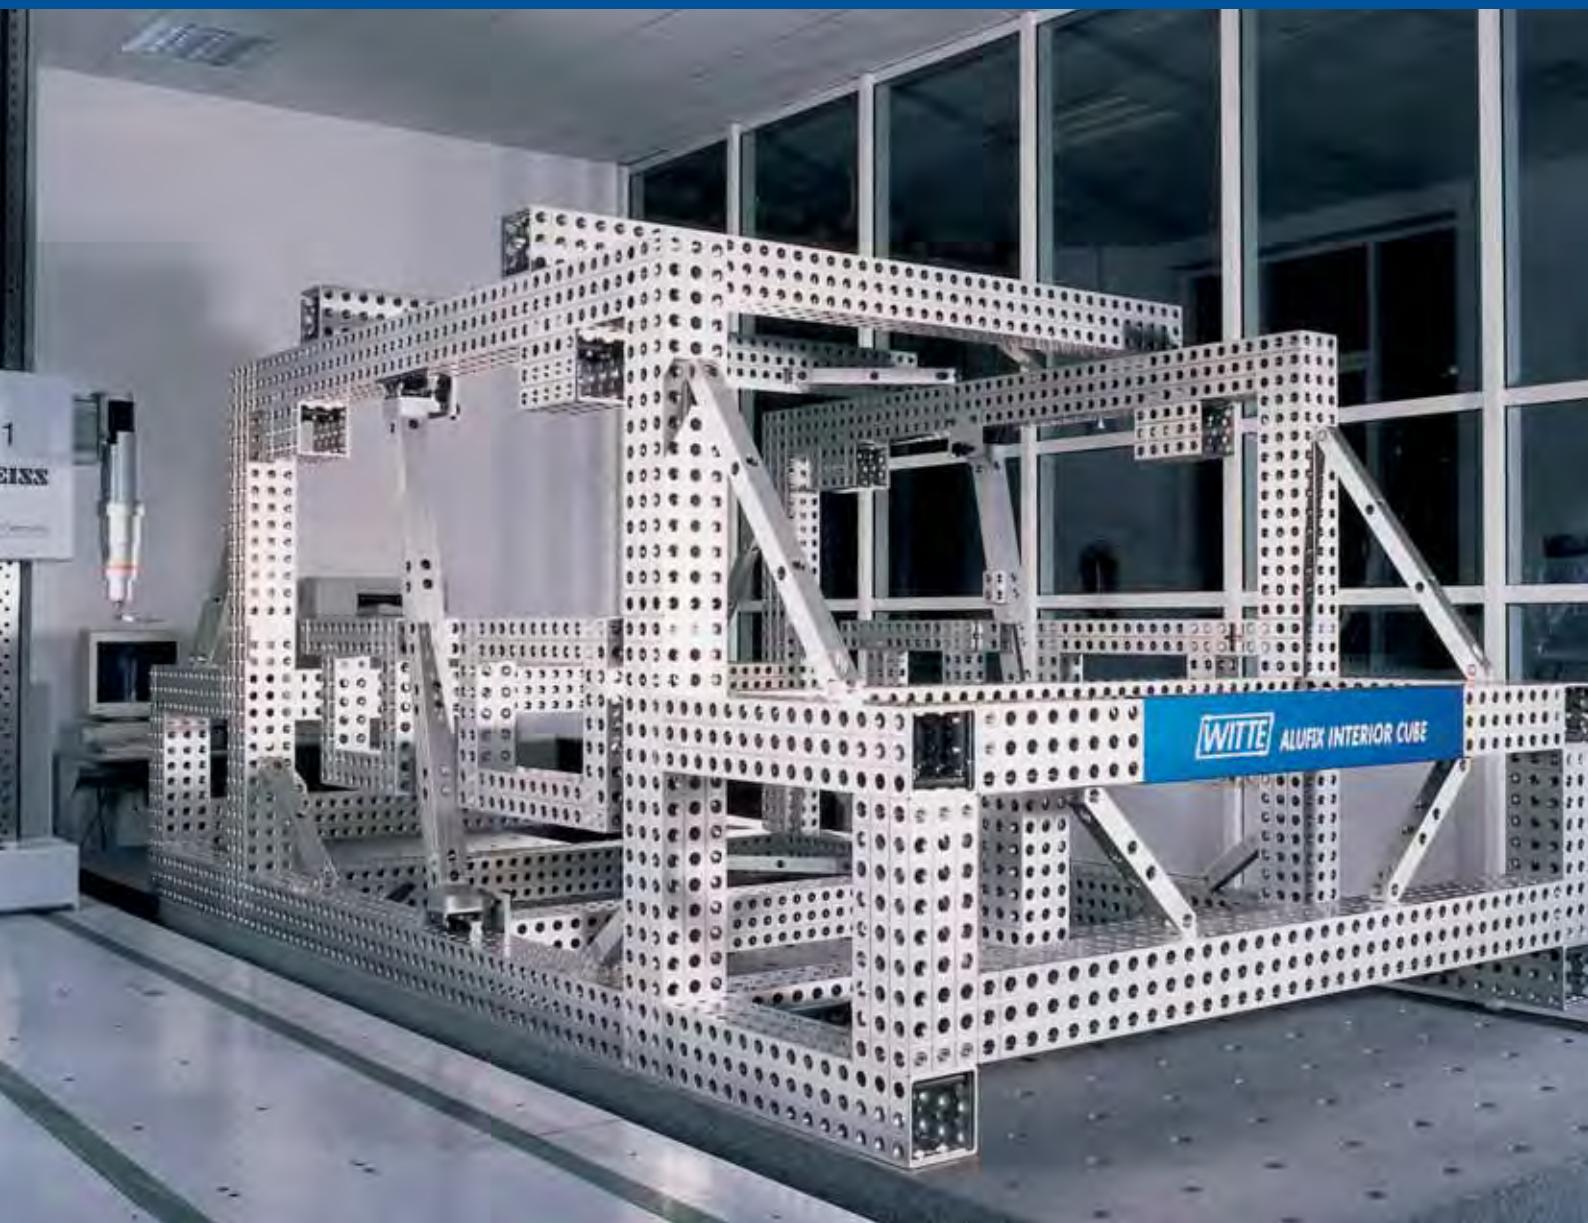

with parts mounted using hovercraft sandwich plate as base and transport platform.

Outline gauge

for 4 door vehicle mounted on horizontal and vertical sandwich plate combination. B pillar can be rotated out for single door check.

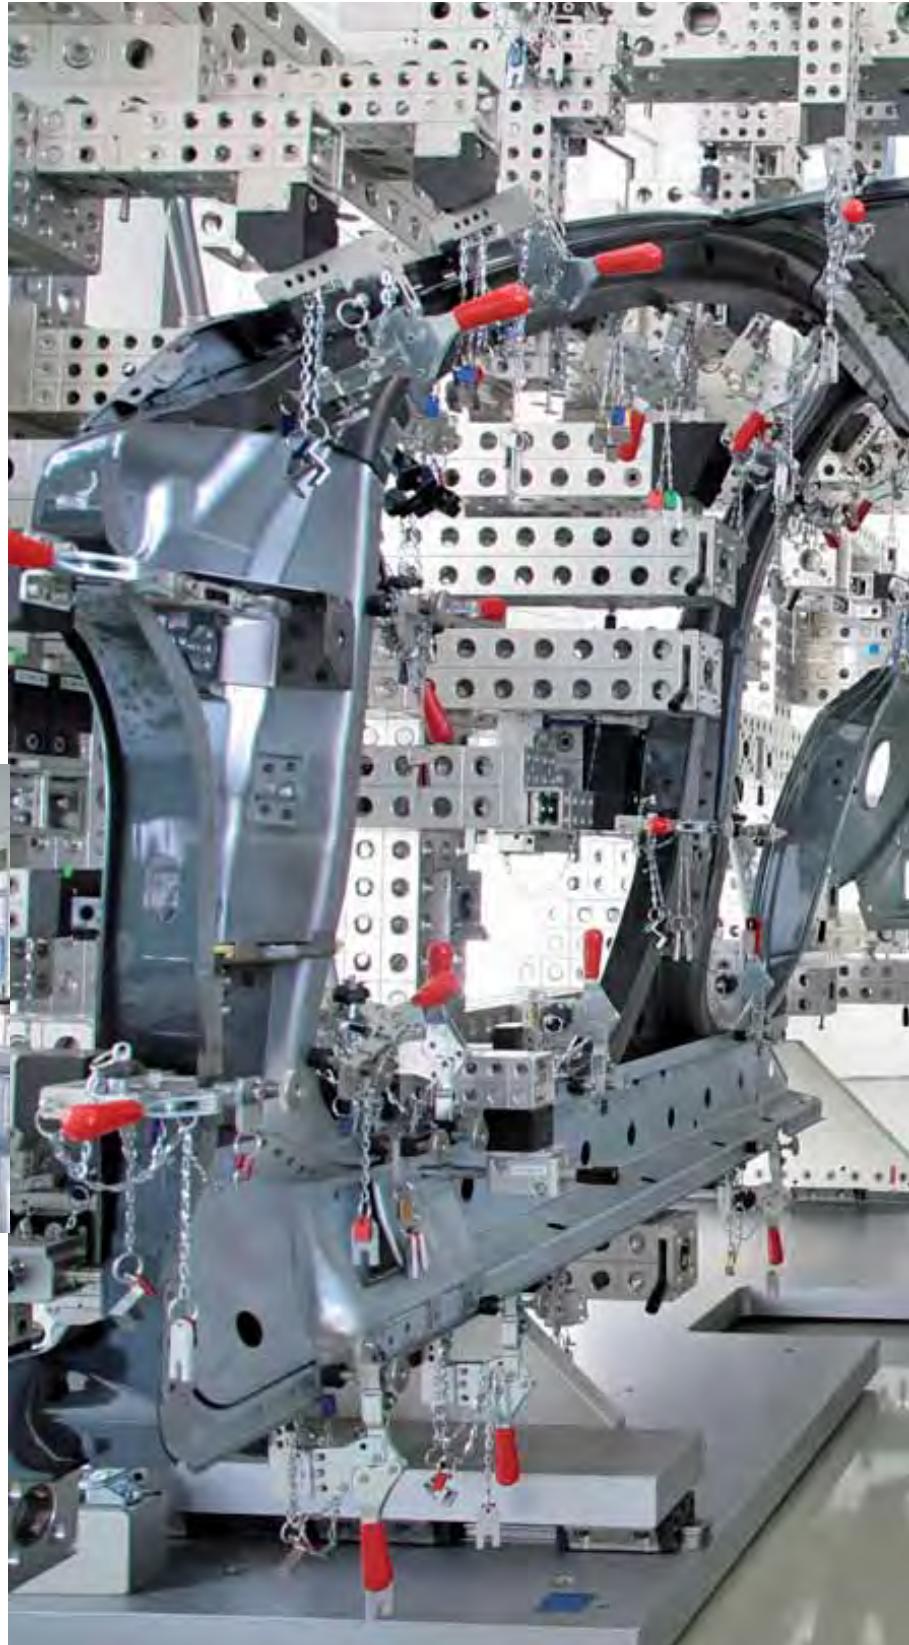

Inner meisterbock

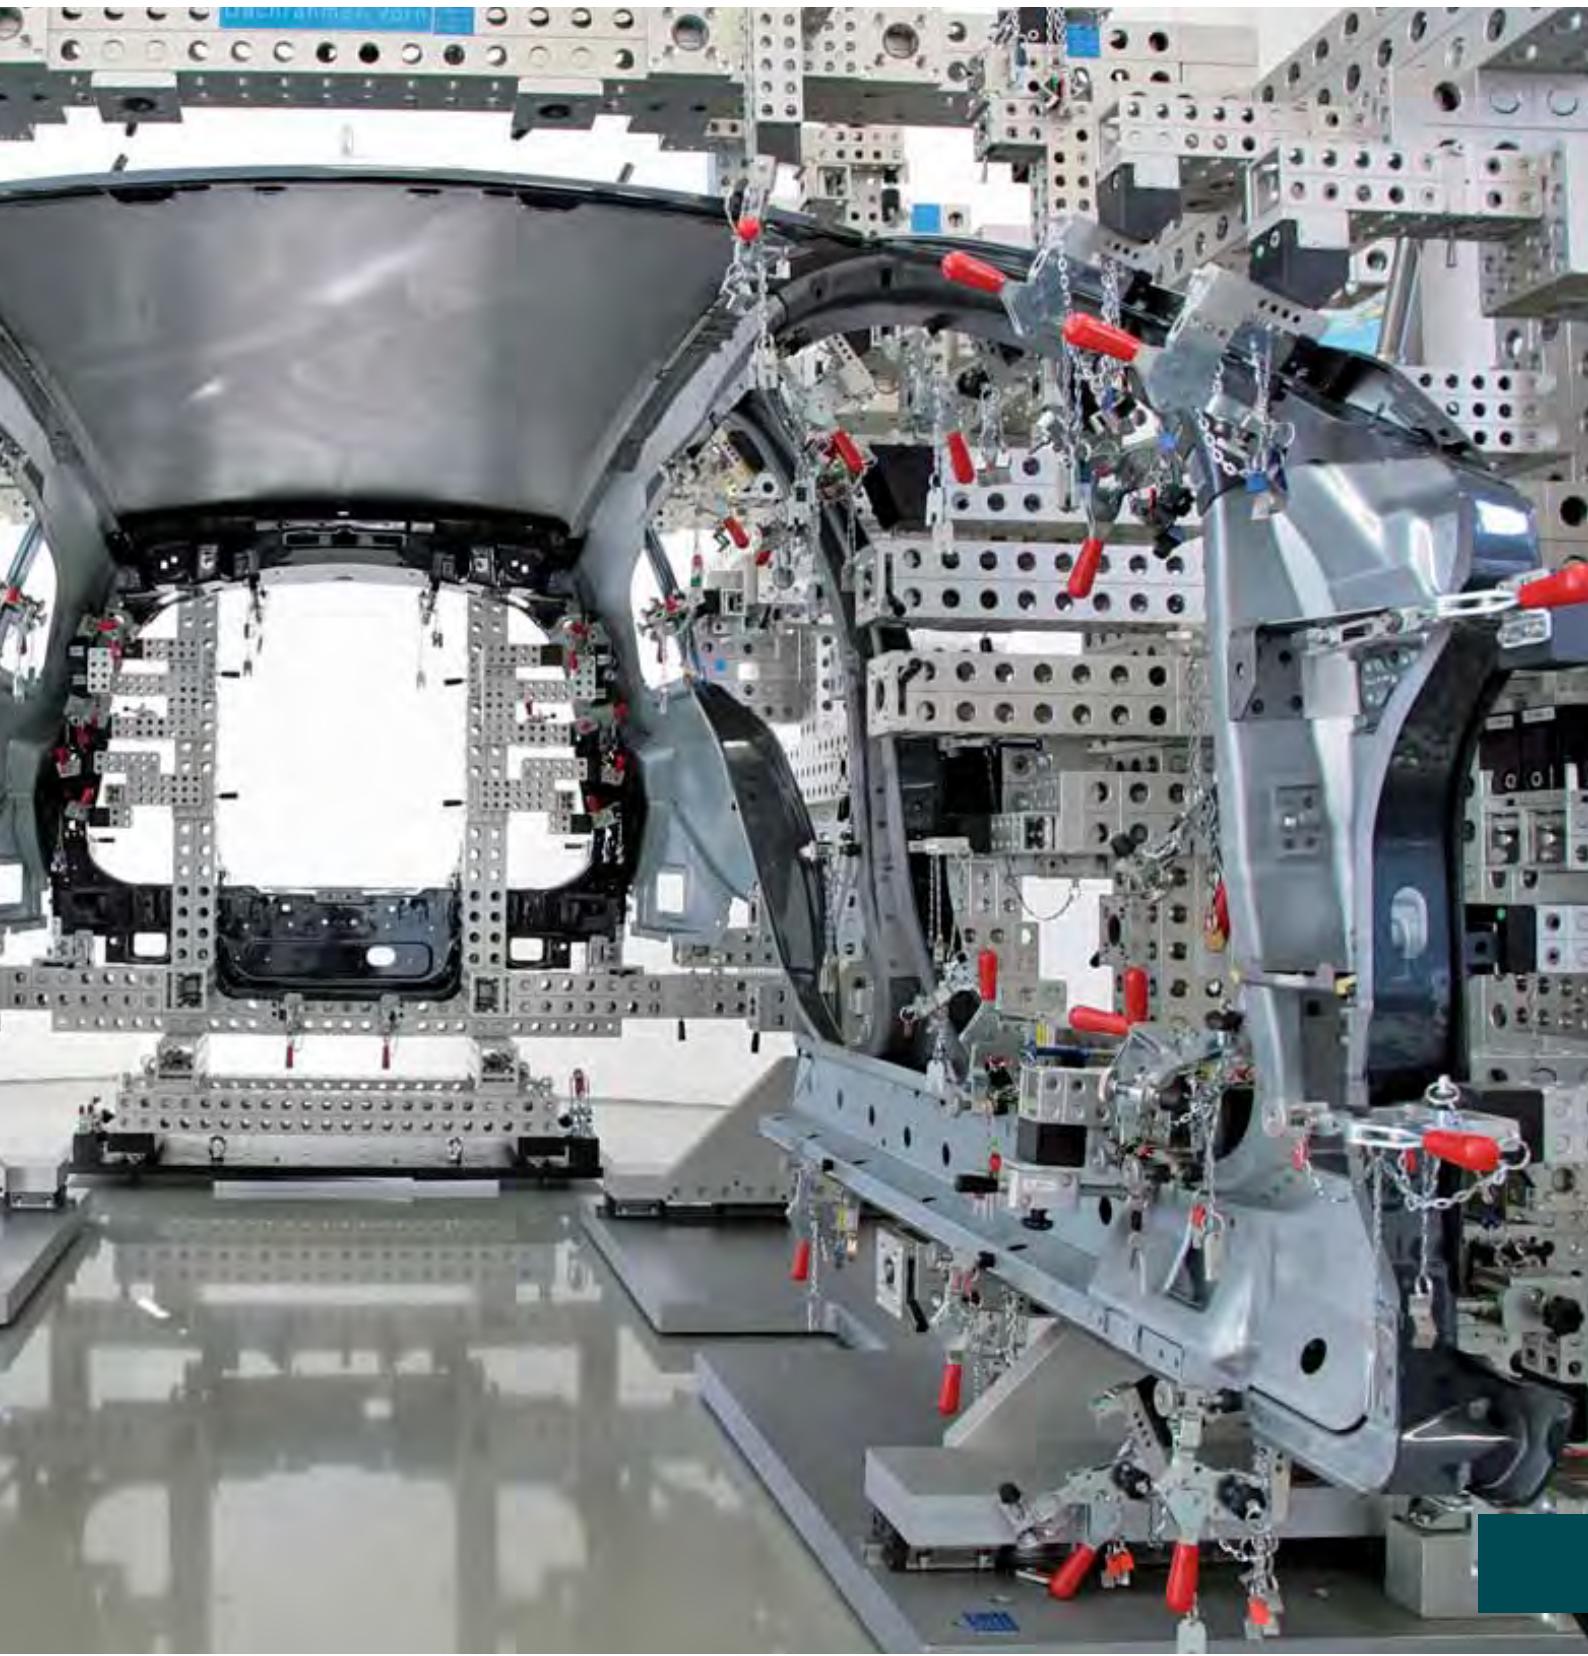

with movable support strut
for B-pillar enabling use for 2
and 4 door models.

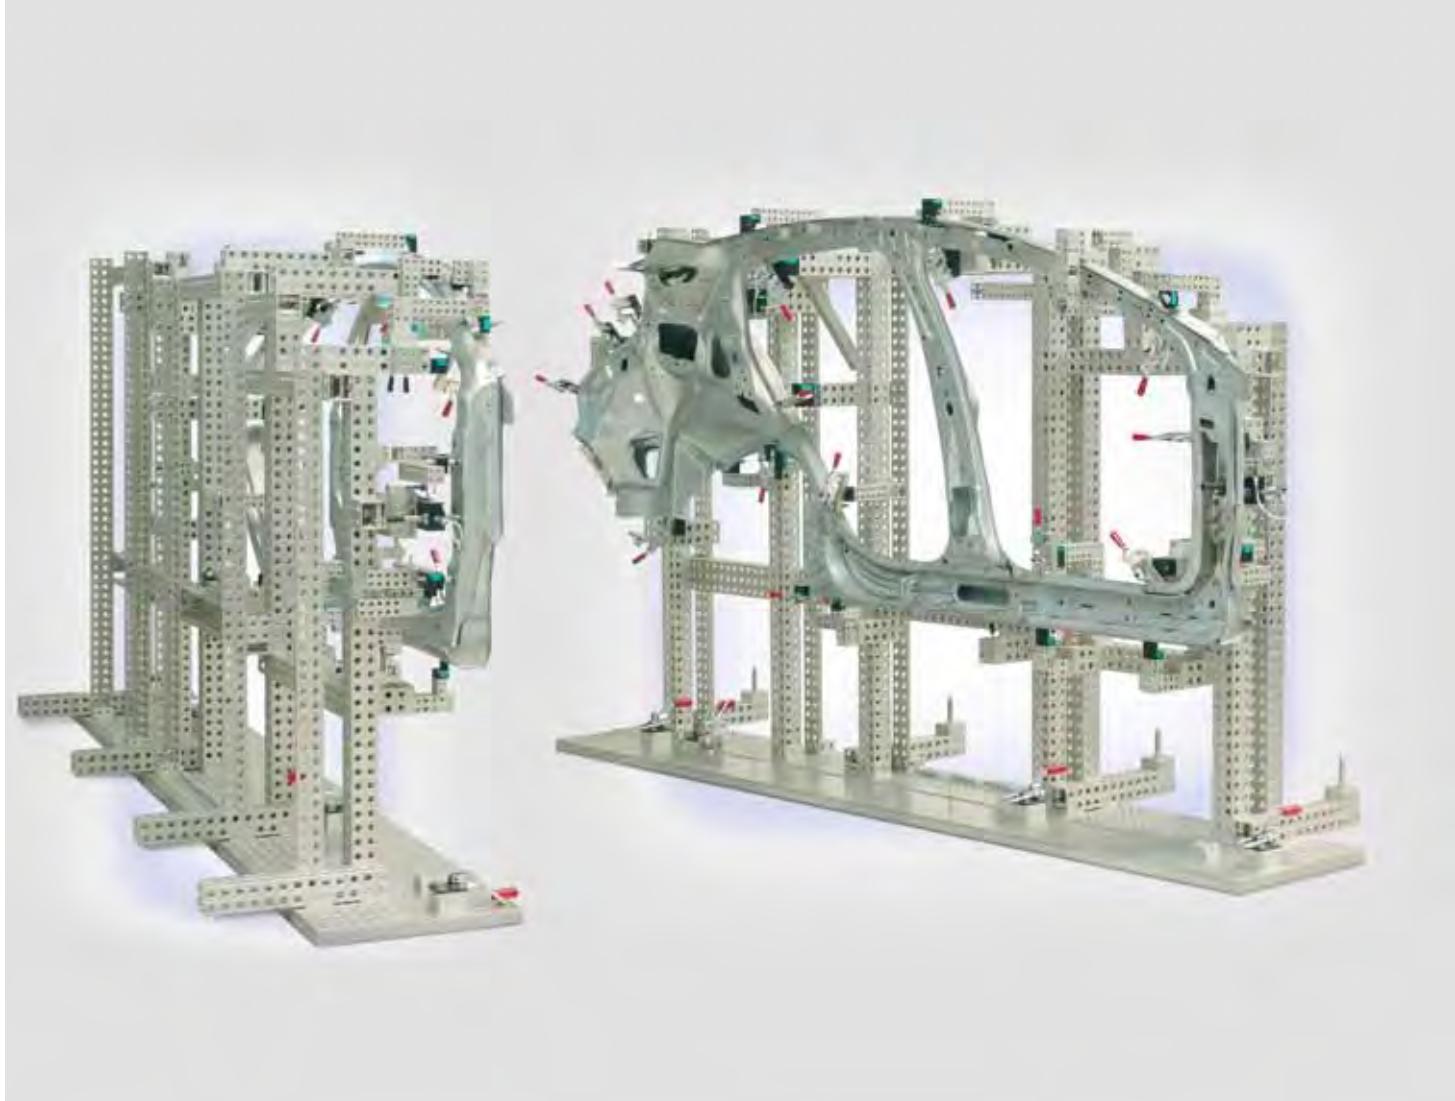

Fuegemeisterbock (match metal fixture)

For passenger vehicle comprising independent match metal floor, left and right side, rear wall fixtures as well as cross member supports for roof reinforcement. Floor group is joined on floor FMB, sidepanels are joined on separate side FMBs. These three units are then joined and enable mounting of roof reinforcements and roof.

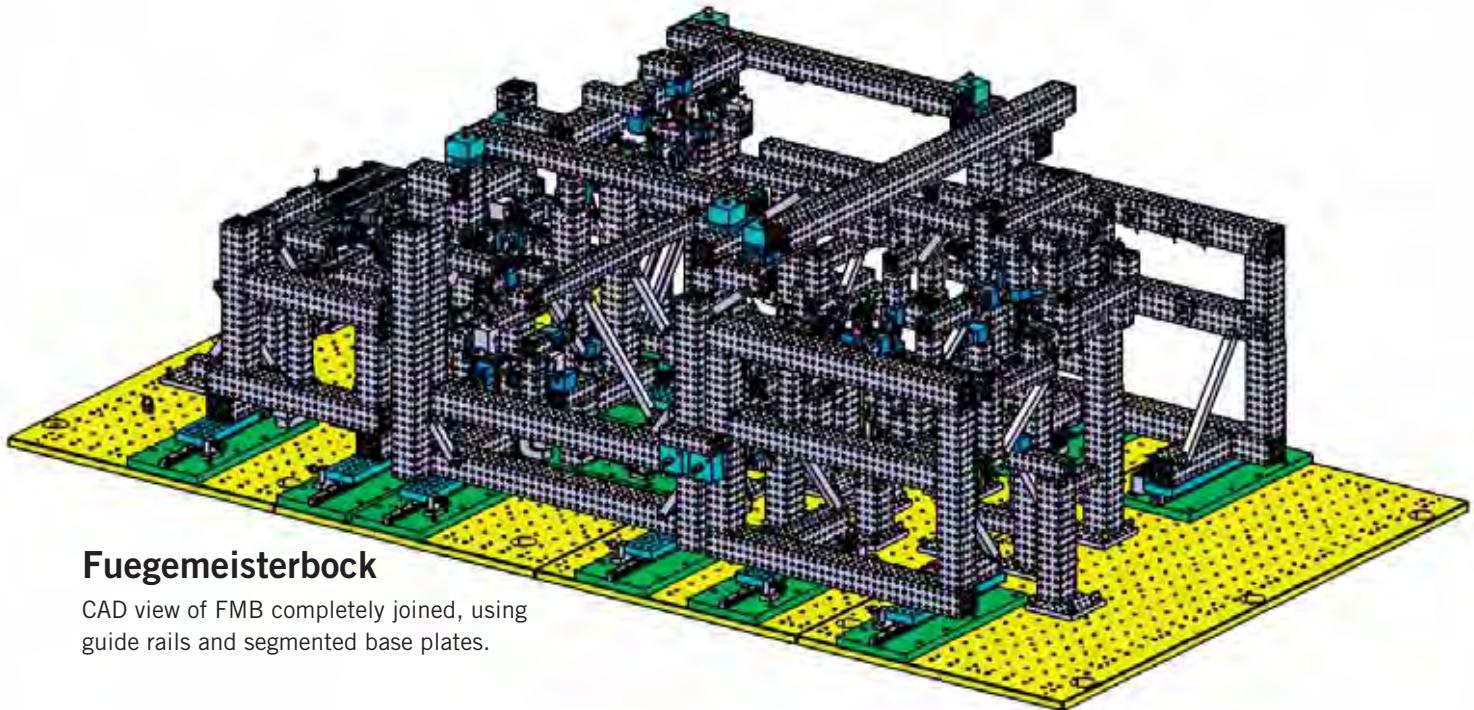

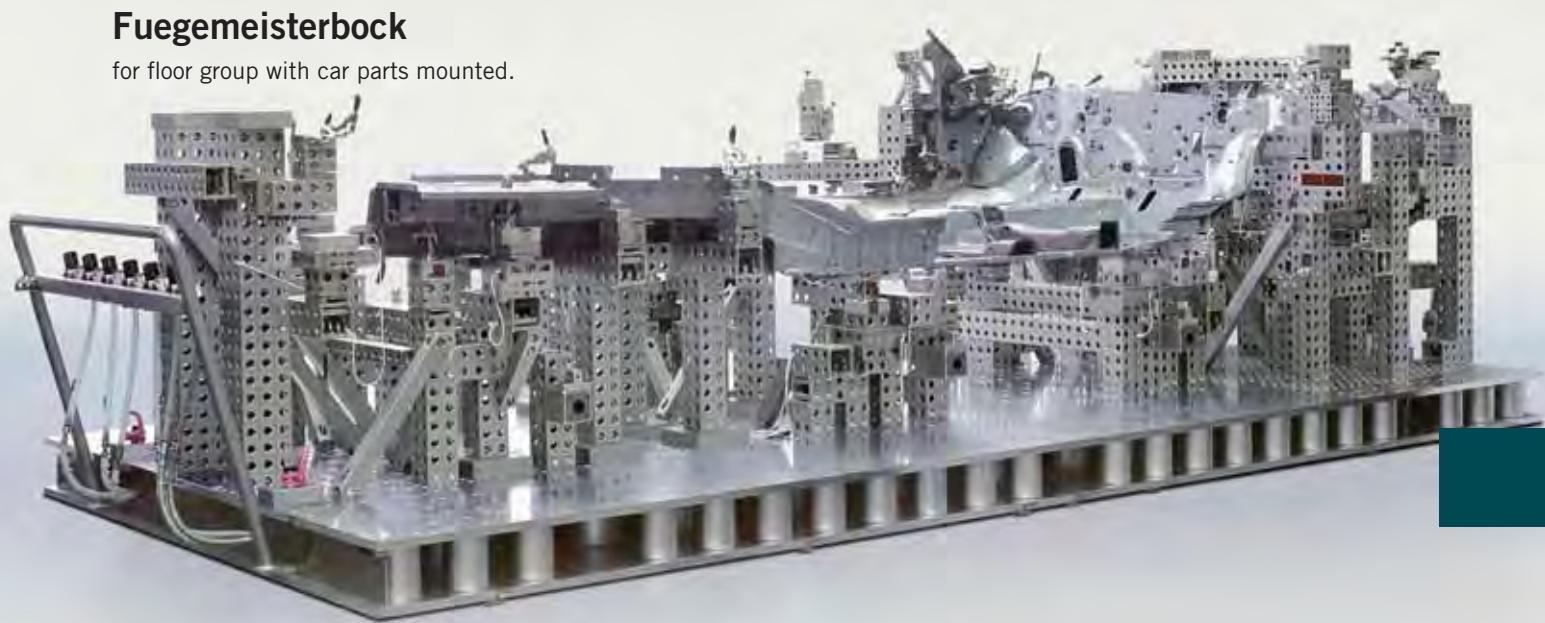

Fuegemeisterbock side panel frames

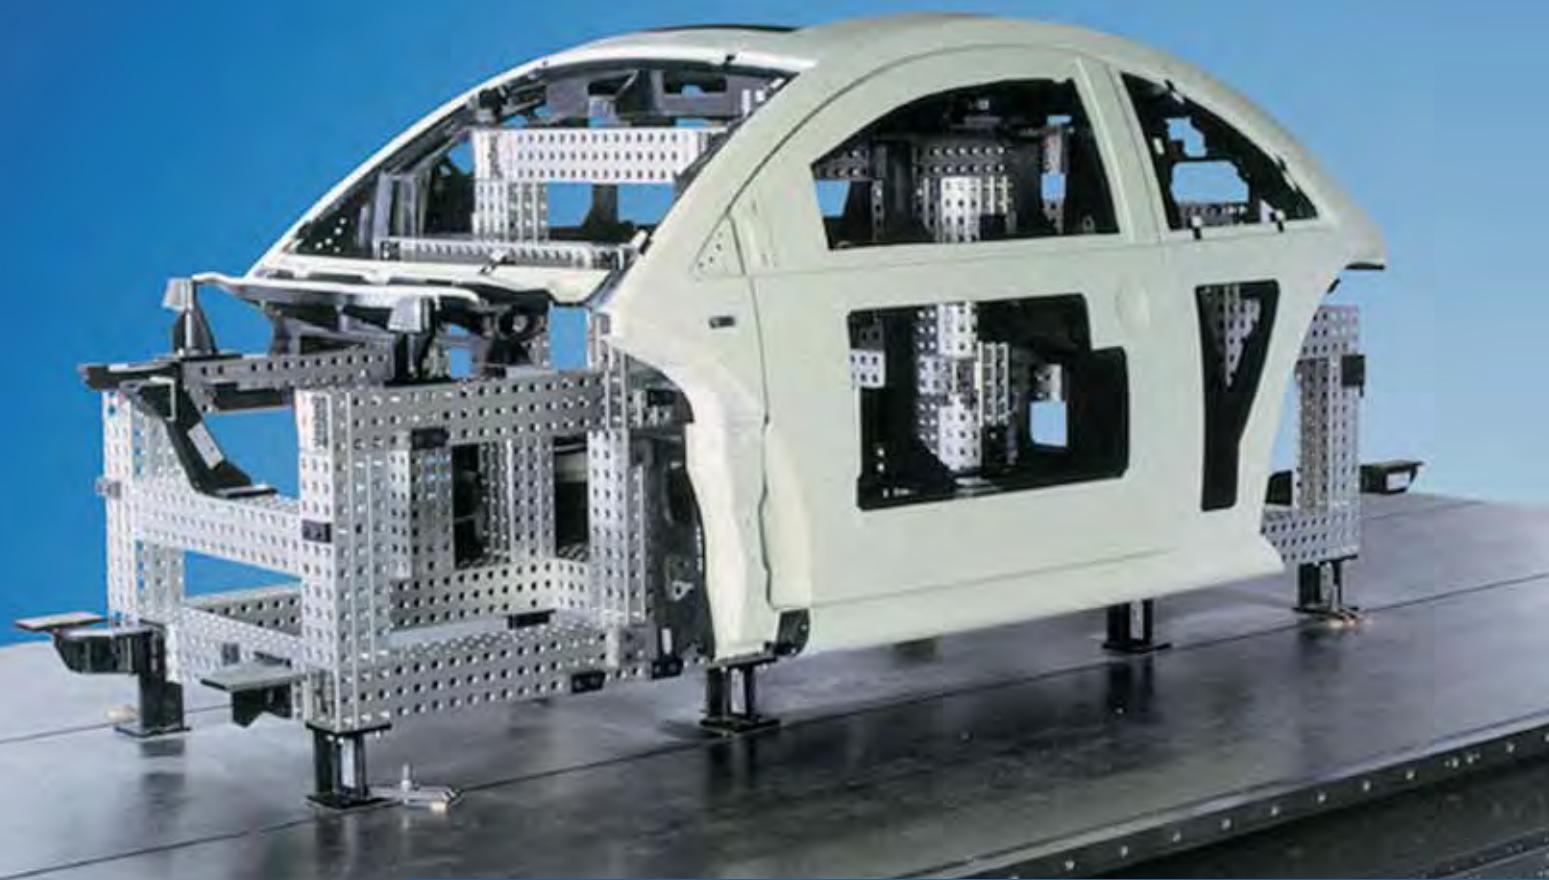

These are used for joining welded groups of side panels i.e. inner, reinforcement and outer and can be accurately docked on to FMB floor.

Fuegemeisterbock

CAD view of FMB completely joined, using guide rails and segmented base plates.

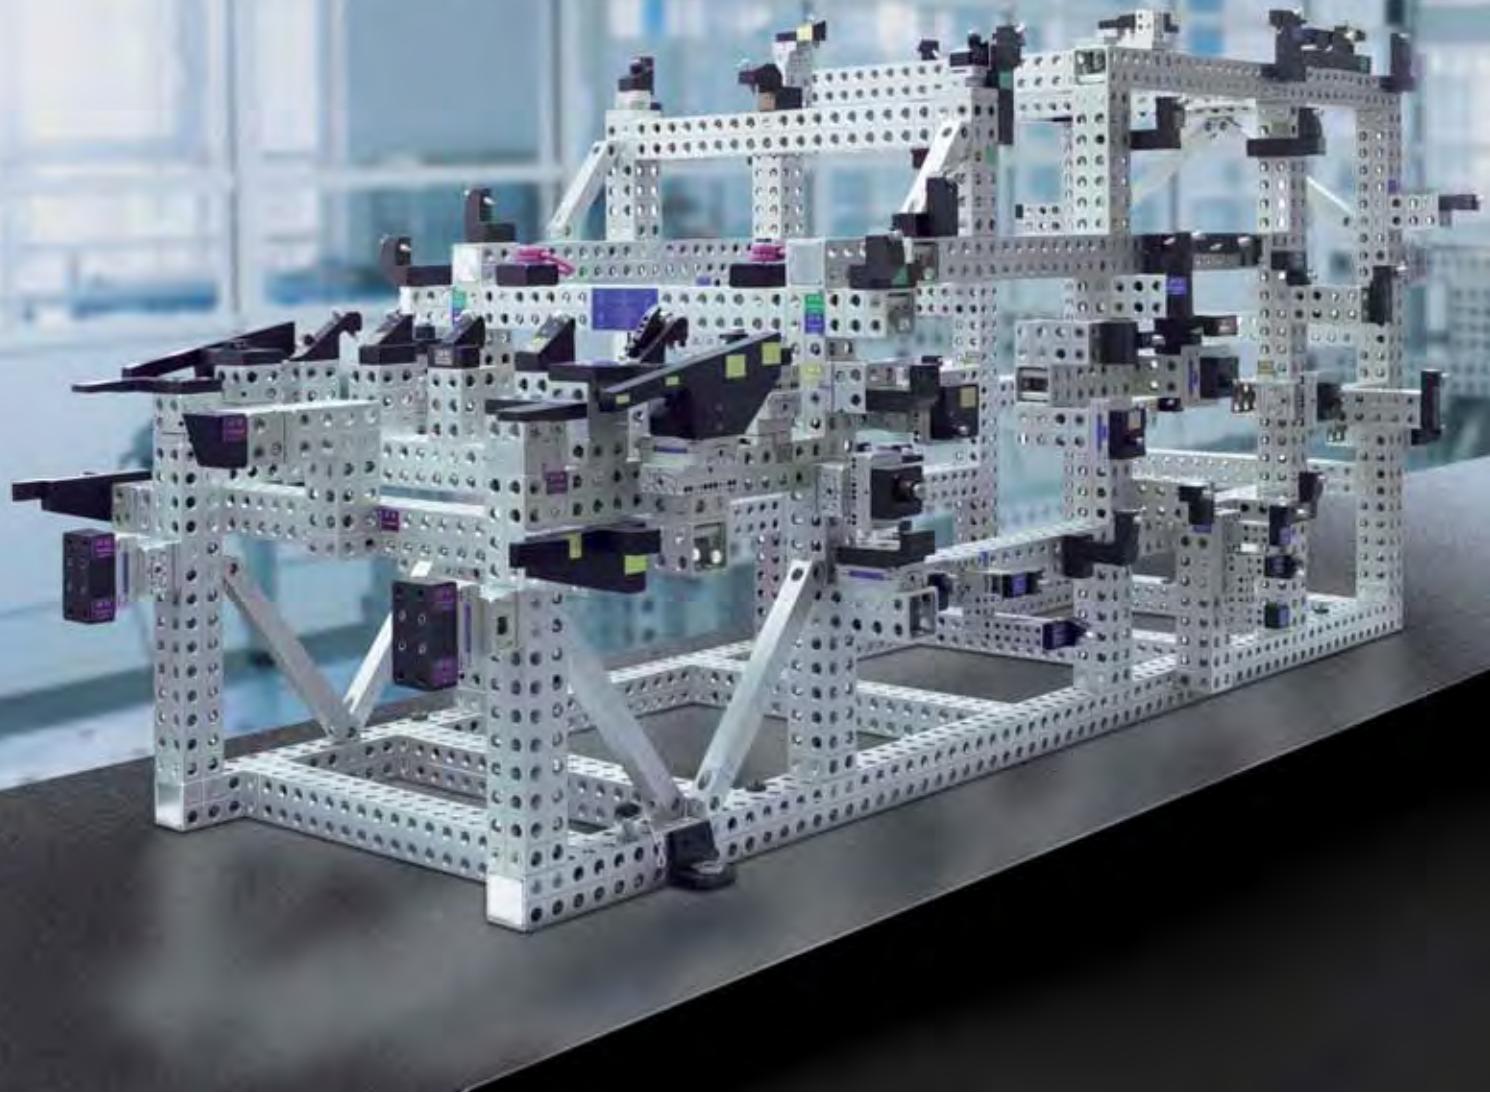

Cubings

Top:
Outer cubing frame
showing some
parts mounted

Right:
Inner cubing frame
showing some
parts mounted

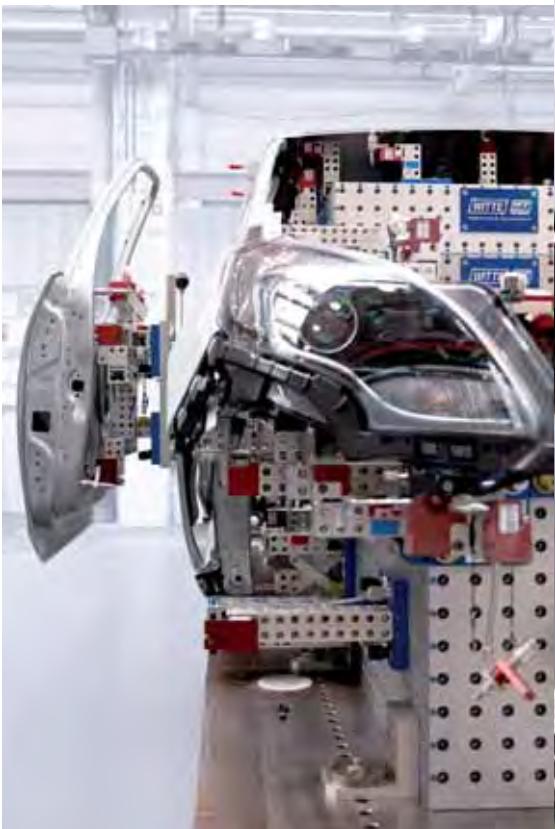

Outer meisterbock

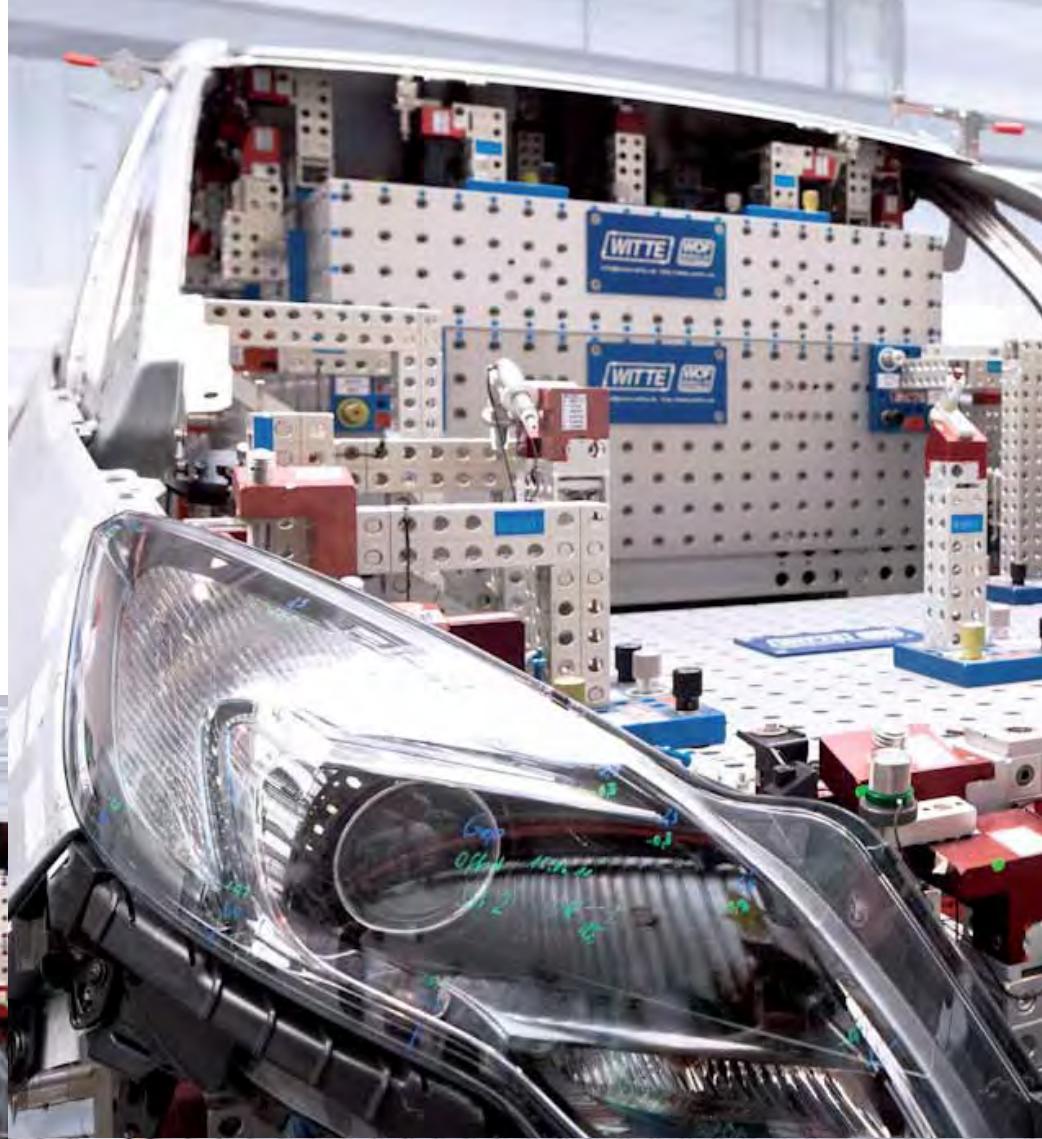

showing black specially designed and manufactured contact surfaces

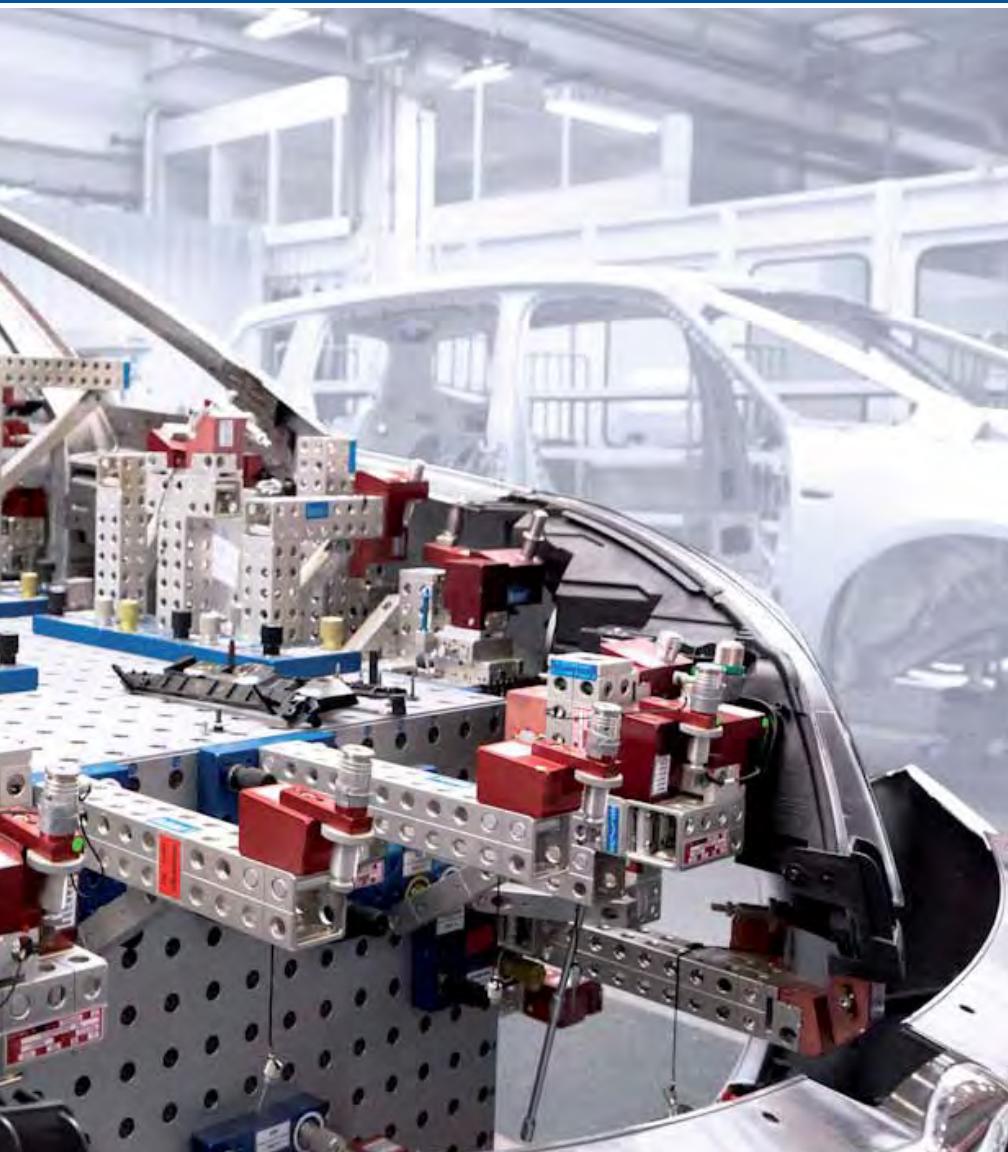

FXB-Cubing

Witte Fixbase cubes
configured for mounting
of automotive parts

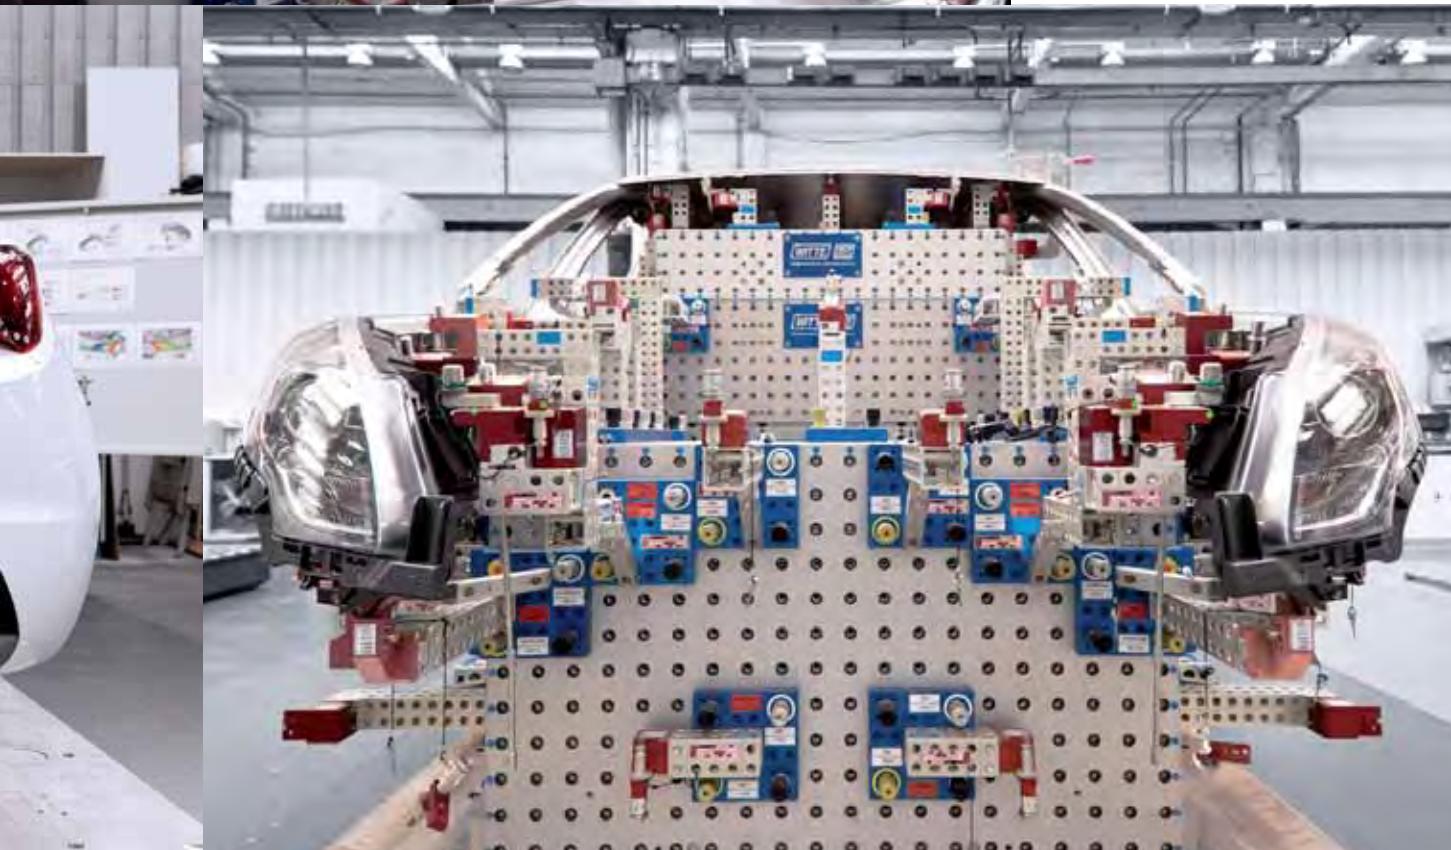

The doors of vehicle to
be checked are mounted
on separate, retractable
adapters

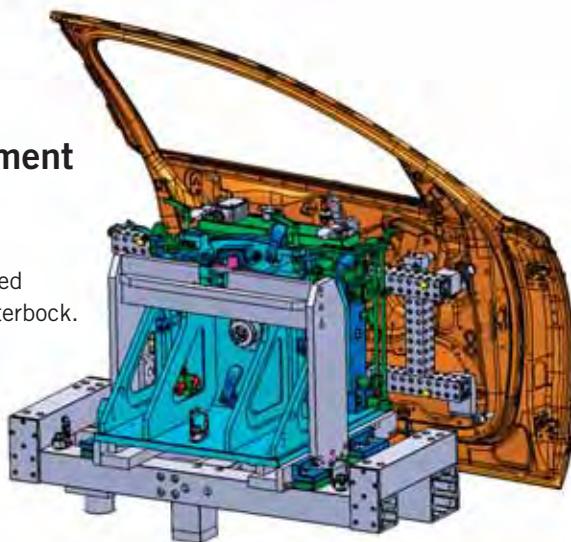

Cube prepared with various contact points and clamp combinations

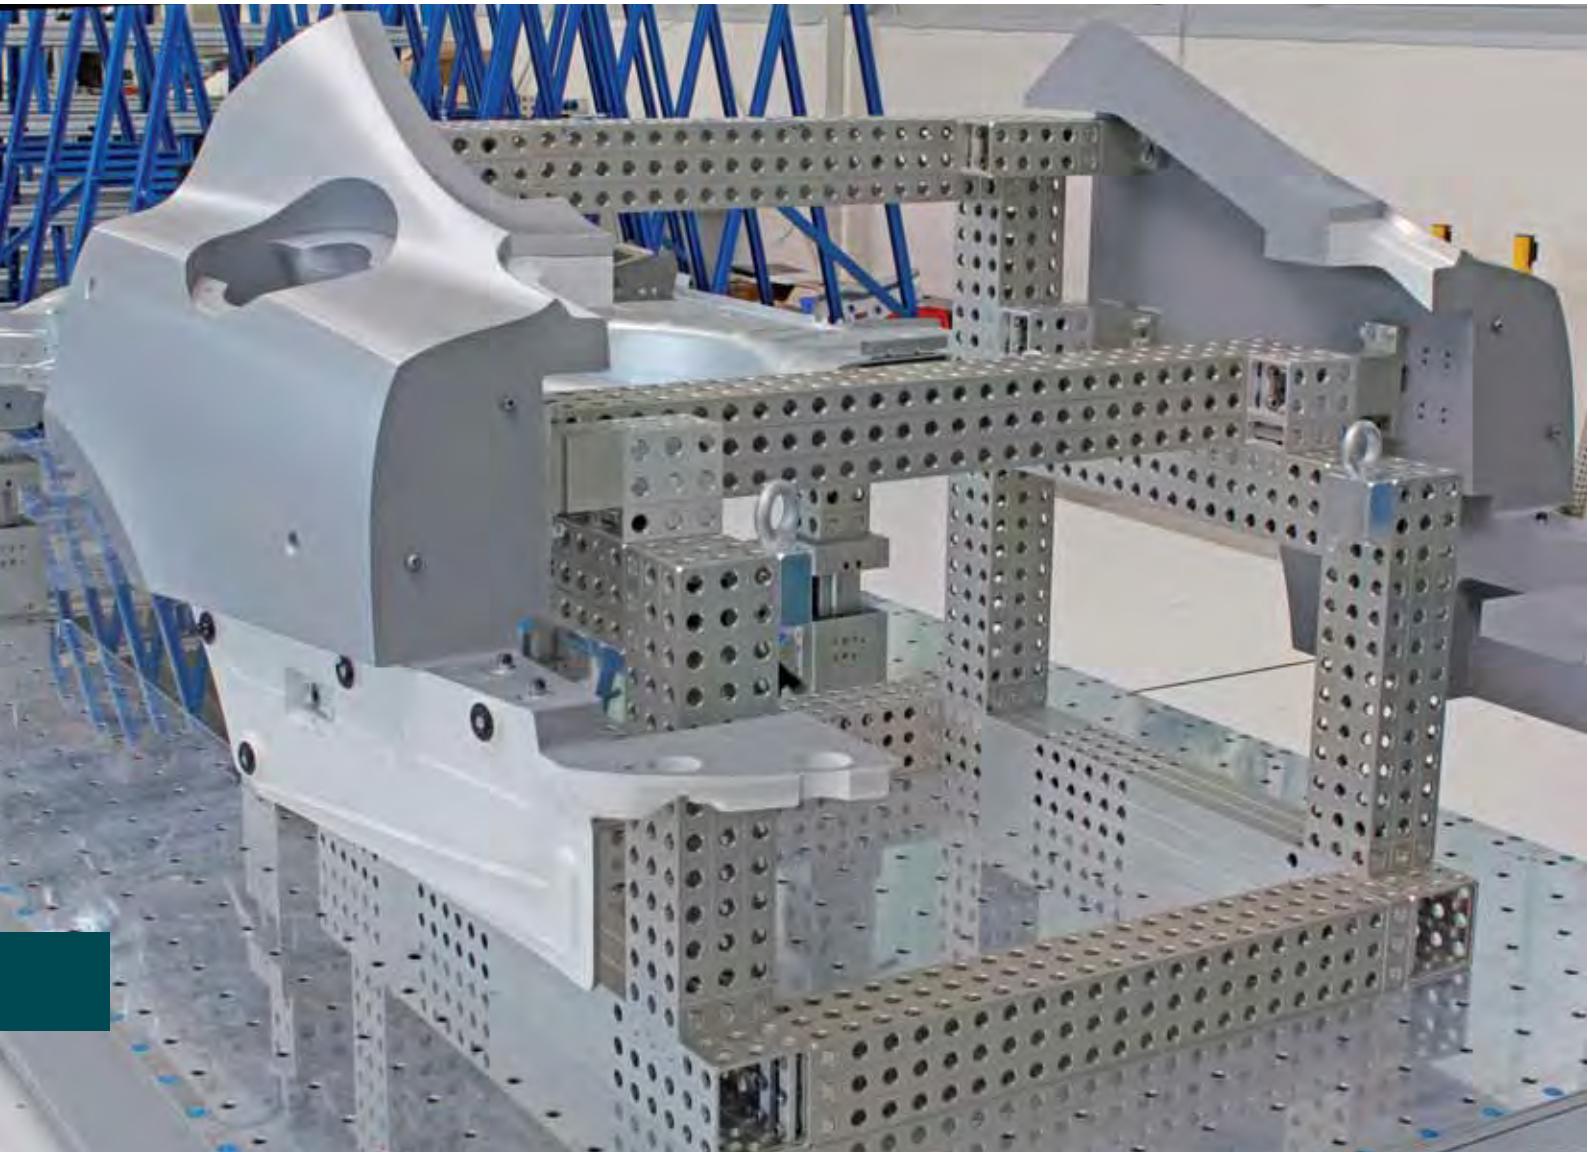

Tilt, turn and alignment unit

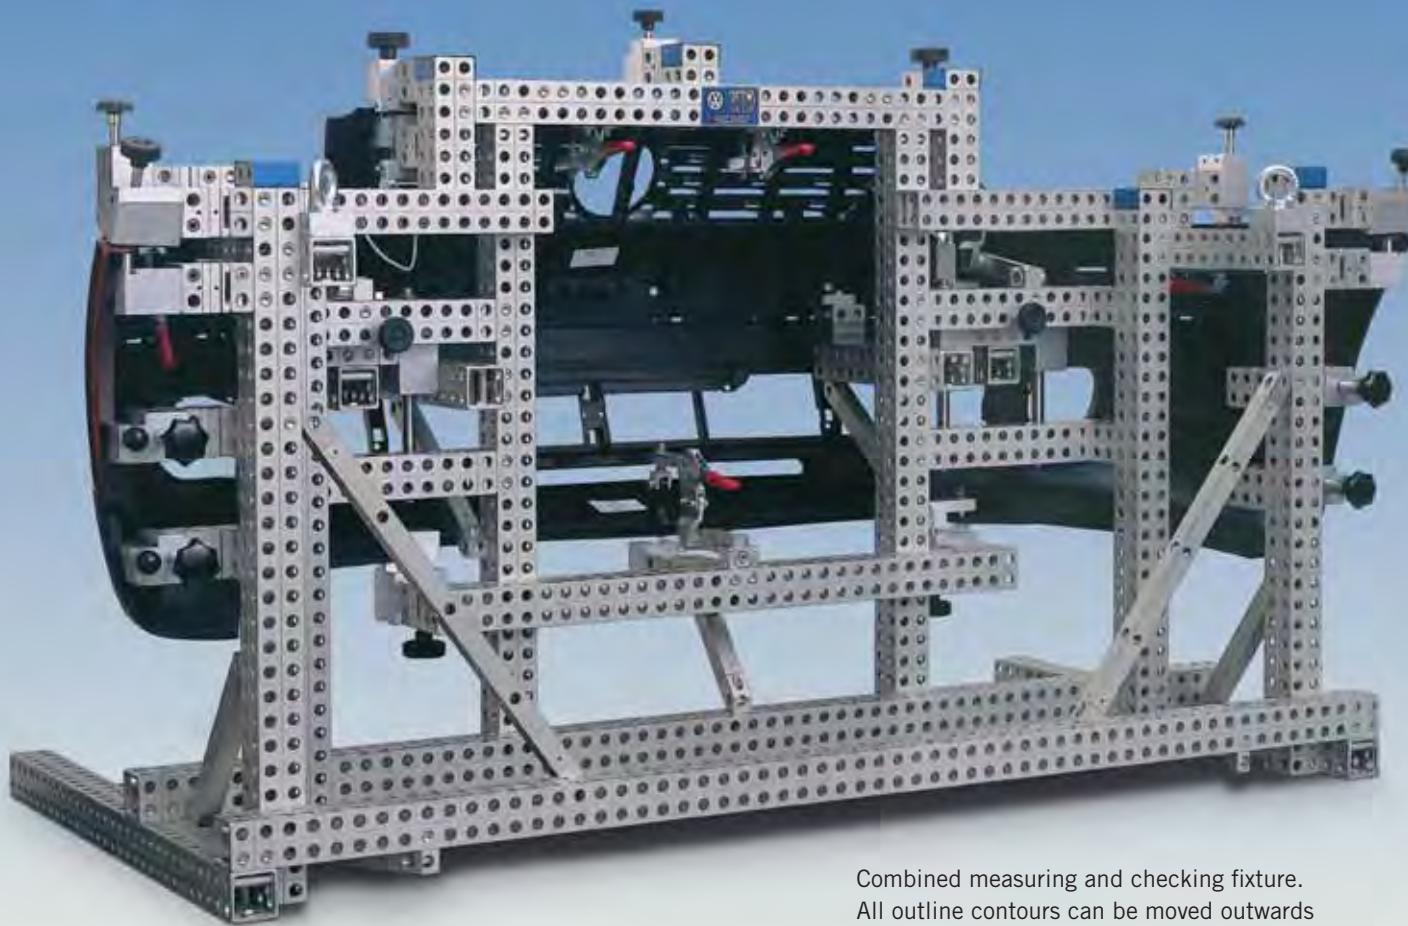

for car doors,
can be integrated
into fügemeisterbock.

Rear cubing

for supporting simulated rear
sidepanel, cross member and bumper
parts. The original trunk lid can also
be mounted.

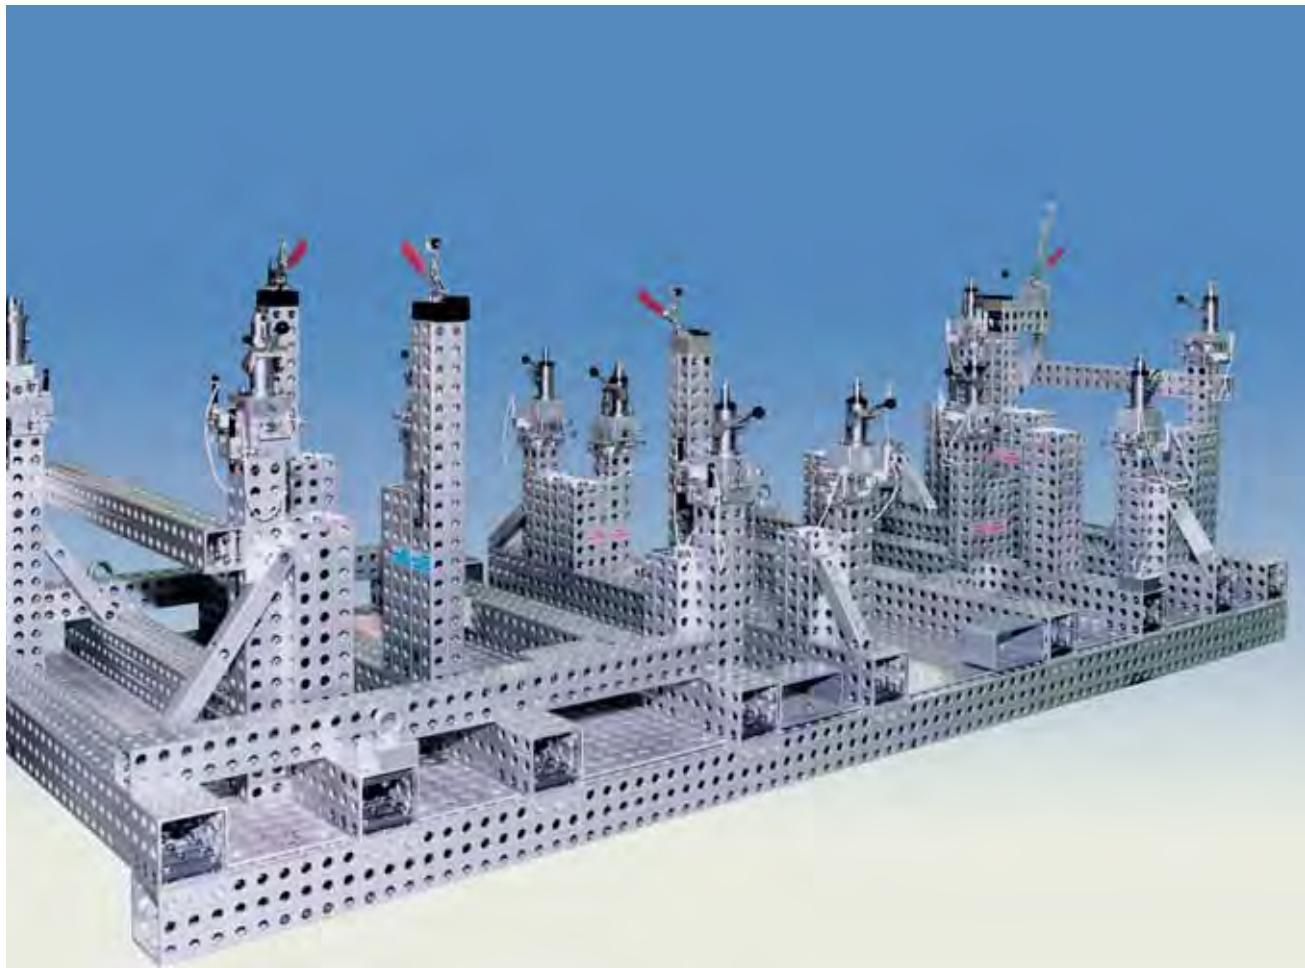

Combined measuring and checking fixture.
All outline contours can be moved outwards

Gap and Flush Gauge

for Radiator parts

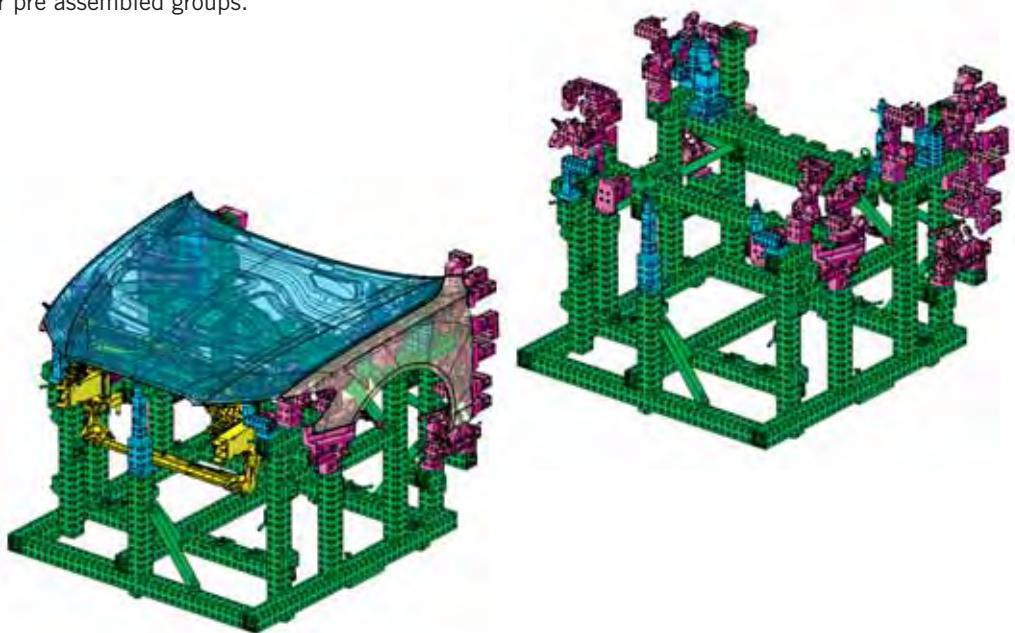

Measuring fixture

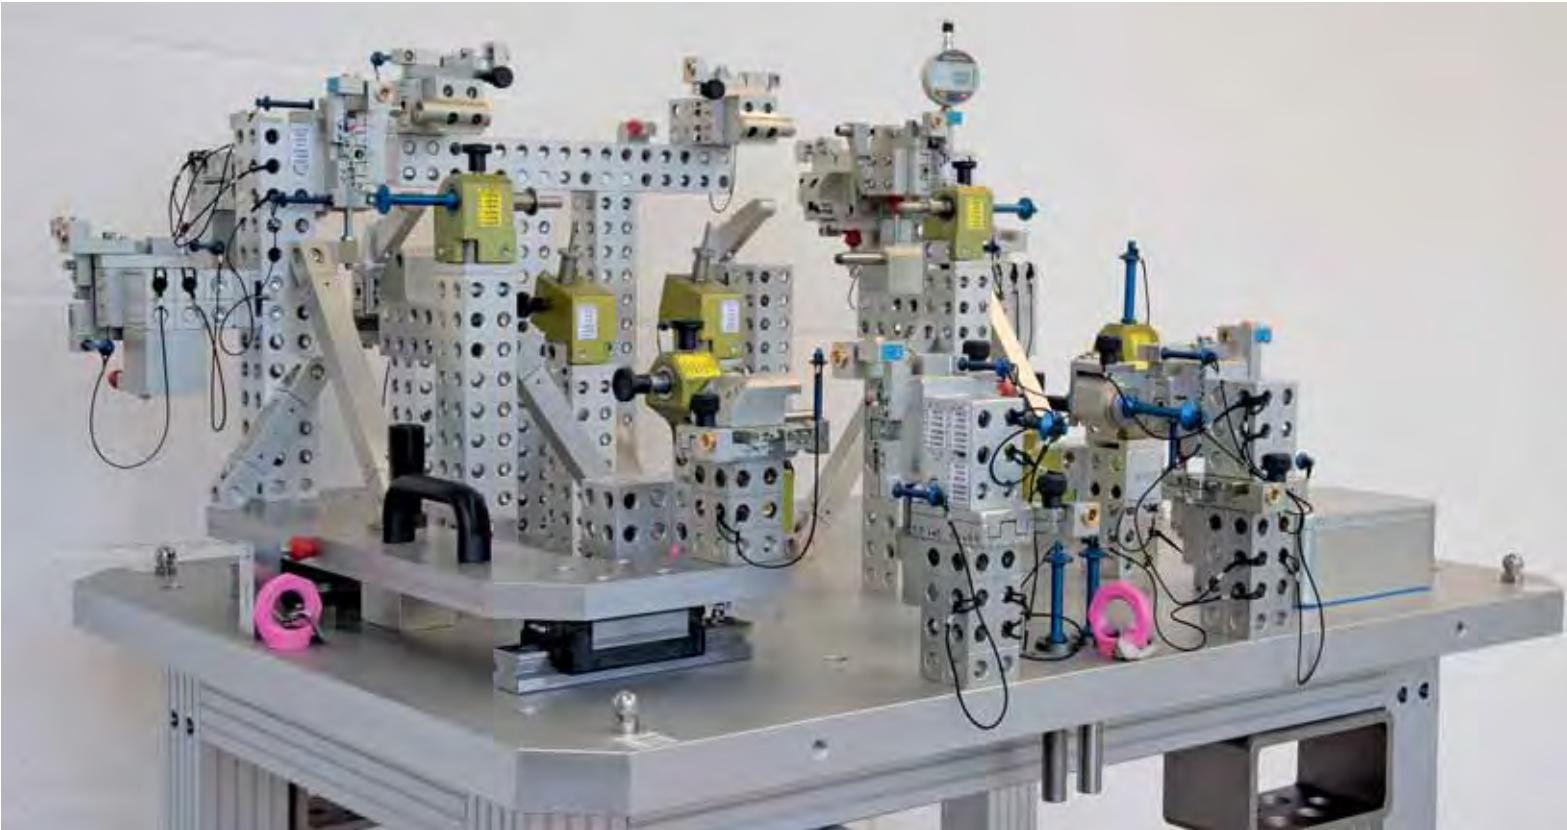

for front and rear floor as single or pre assembled groups.

Meisterbock

measuring fixture combination
for front end.

Fenders, bumpers,
power carriers and hood
can be mounted.

Combined measuring and checking fixture.

Gauges

Measuring and checking fixture for welded titanium pipe group.

All relevant areas requiring checking are measured using accurately positionable dial gauges, which can also be moved outwards

Information:

Weights mentioned in the catalogue are non-committal and approximate, and can deviate considerably i.e. through technical changes.

- We reserve the right to make technical changes.
- Where differences between photos and parts lists exist, the parts lists are decisive.
- Due to fluctuations of copper content in aluminum - alloy colour deviations may occur during anodizing.
- All Alufix components are also available anodized black e.g. for use with optical measuring systems.
Exceptions are standard hard anodized items such as pins, connection elements in steel etc.
These items maintain their usual characteristics but can be changed on request.

All details on our products in this catalogue, especially illustrations, drawings, dimensions and statements on performance are to be regarded as approximate average values. We reserve the right to change design, technical data, dimensions and weights.

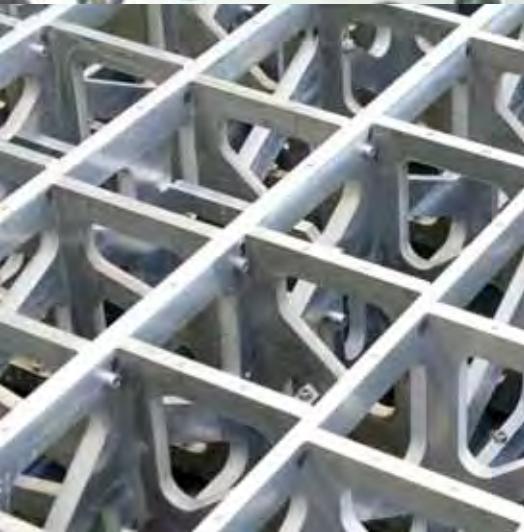

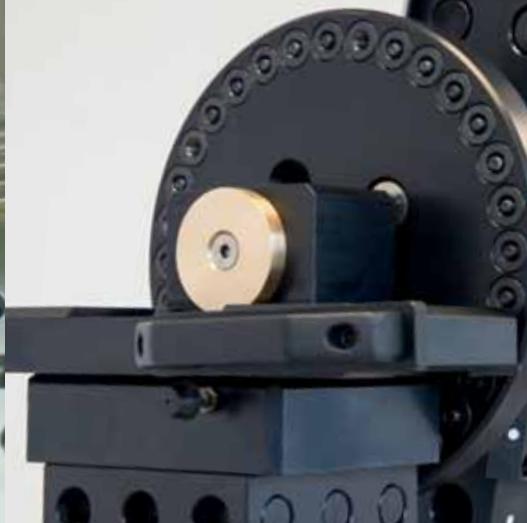

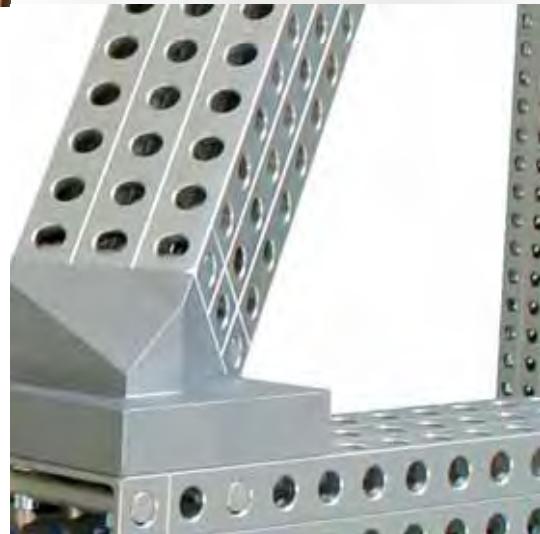

The indicated standards, similar technical regulations as well as technical details, descriptions and illustrations are valid at time of printing. Our general trading conditions are valid. Our quotations are decisive.
